Secure Government Cloud Services Transformation

With the Australian Government's Cloud Strategy, Government agencies and organisations are under increased pressure to increase velocity, increase agility and deliver highly quality services to their organisation and citizens. This must be done with security at the heart of all solutions, for those who require OFFICIAL:Sensitive or PROTECTED level security, Fujitsu has a set of services which can reduce the risk profile and accelerate the establishment of secure cloud solutions.

PROTECTED Enterprise Applications

Focus on accelerating your adoption of business applications with the security and compliance of a PROTECTED environment.

Consume your applications within a Software as a Service model, which underpin your accelerated innovation and digital transformation roadmap.

PROTECTED Cloud Managed Service

Consume a highly automated managed service to power the protected foundations of your digital transformation services.

Consume, leverage and build upon secure, sovereign cloud services to deliver business value to your organisation and citizens.

shaping tomorrow with you

Accelerate your cloud strategy

Fujitsu's Secure Government Cloud Services assist your agency to rapidly and successfully adopt cloud with a focus on your business value, rather than the hygiene factors of your protected foundations.

Reducing complexity

Fujitsu has taken the guess work out of architecting accredited workloads by developing our cloud architecture patterns that have been successfully accredited up to PROTECTED. Agencies know where they want to get to but they don't quite know how to get there while still achieving a successful accreditation, we do.

Accelerate Adoption

Deliver value earlier by removing the painstaking tasks of gaining security sign off. Fujitsu is able to provide a managed service that targets the essential 8 requirements within our secure Cyber Resilience Centre, allowing you to focus on improving your services and the value delivered by your agency.

Ensure your organisational security

Fujitsu's Secure Government Cloud Services deliver surety of your secure fundamental cloud services.

Mitigate Security Threats

Secure against threats with Fujitsu's "Secure by design" solution, which monitors traffic for policy violations, data leakage, malware attacks, restricted access to external websites.

Log all activities and proactively hunt for threats and potential vulnerabilities.

Attain PROTECTED Compliance

With Fujitsu's Secure Government Cloud Services, your secure compliance is guaranteed to PROTECTED and above.

Compliance is maintained with continuous monitoring which can be further enhanced with benchmark standards such as ISO 27001 and CIS.

Extend your cloud services

Fujitsu's Secure Government Cloud Services support an integrated, protected, multi-cloud service; leveraging the highly secure sovereign Vault Protected Cloud and the highly scaleable and feature rich Azure Protected Cloud.

Secure Government Cloud Services

Avoid lock-in and mitigate your business risks to support your multi-cloud and hybrid cloud strategy, with Fujitsu's Secure Government Cloud Services
