# Accelerate your business with multi-cloud IT infrastructure

PRIMEFLEX for Nutanix Enterprise Cloud

FUJITSU

More agility

Deploy systems faster

Improve scalability

More resilience

Save money

What do organisations expect of infrastructure that spans multiple types of clouds?
Can a unified infrastructure approach **really** deliver?

Managing across different clouds can be costly and confusing...

Better to go with an enterprise cloud that spans them all

Private Cloud

Public Cloud

Edge Cloud

Enterprise Cloud

Take the easy way with **multi-cloud capable** PRIMEFLEX for Nutanix Enterprise Cloud:

- Ramp across private, public and edge clouds fast
- Reduce storage costs
- Simplify management
- Grow as you go

What is PRIMEFLEX for Nutanix Enterprise Cloud?

A multi-cloud, multi-hypervisor infrastructure with high performance, energy-efficient Fujitsu PRIMERGY standard x86 servers combined with software-defined compute, virtualisation and storage technology with built-in data services for application orchestration, data protection, space efficiency and security.

Six reasons to invest in PRIMEFLEX for Nutanix Enterprise Cloud

#1 Start FAST
Deploy cluster in under 15 minutes

#2 Get brilliant performance
250,000+ IOPS per server

#3 Mitigate risk
Built-in resiliency across clouds, clusters, nodes and components

#4 Increase capacity
Up to 4x greater storage efficiency

#5 Manage easily
Single console monitoring with simple one-click management

#6 Scale to size
Scale to an endless number of systems with unlimited storage

## With PRIMEFLEX for Nutanix Enterprise Cloud, you can

Reduce cost
All-in-one system eliminates cost of external storage environment: storage arrays, SAN switches, management tools and staff.

Increase storage efficiency
Set up a tiered storage architecture to keep hot data on solid state drives, and colder data on hard disk drives with lower cost per gigabyte.

Speed up your applications
Deliver a high-performance, responsive virtual IT infrastructure that provides consistent IOPS with sub-millisecond response.

> We value Fujitsu as a strong solution partner who provided us with professional and expert support in our migration to a hyper-converged system based on Nutanix software and PRIMERGY server technology."
