

PaperStream Software Solutions

Capture. Optimize. Access.

Solutions Overview

Fujitsu Computer Products of America, Inc. (FCPA), is proud to provide document scanning software that helps organizations leverage and optimize what is most important when processing documents - the data. FCPA's PaperStream software portfolio helps organizations increase efficiencies, reduce costs, and minimize resources while at the same time, providing easy access to the information from those documents. With these software products, organizations can integrate a scalable, high-quality solution that best meets their scanning needs.

PaperStream IP TWAIN and ISIS

PaperStream IP TWAIN and ISIS is an in-box image clean up application that comes with all Fujitsu fi Series scanners. It is an industry recognized and unique image enhancement software that delivers powerful image correction allowing documents to be quickly converted into exceptionally high-quality, clean and clear images. PaperStream IP reduces the need to re-scan, saving time and resources, and improves OCR performance.

PaperStream Capture

PaperStream Capture is a simple front-end software that enhances the productivity of Fujitsu fi Series document scanners. PaperStream Capture is easy to use, needs minimal operator training time, and immediately increases productivity. It comes with predefined profiles for easy scanning and organizing. PaperStream Capture is fully integrated with Fujitsu Scanner Central Admin (SCA) enabling seamless software updates and profiles to the entire scanner fleet at no additional charge.

PaperStream Capture Pro

For organizations needing more functionality, such as enhanced indexing, extraction and document separation, PaperStream Capture Pro is the preferred front-end document scanning software for them. It's compatible with all Fujitsu fi Series scanners. PaperStream Capture Pro automates processes that were once manual, reducing time and human error. With its intuitive interface, users can easily navigate from capture to release in a fraction of the time. It is cost efficient as there are no cost per click or page, and organizations can scale up or down as scanning projects change. Also available are separate Import and QC/Validation licenses to provide distributed and more efficient scanning options.

fi-7160 Deluxe Bundle

By combining Fujitsu's best-in-class document scanner, the fi-7160, with PaperStream Capture Pro scanning software, FCPA has bundled a high value, out-of-the-box scanning solution. With the Deluxe Bundle you can save 25% on the combined cost of the scanner, the software license and software maintenance.

Business Value and Benefits

- Organize documents and the metadata on them
- Turn your documents into intelligent business data
- Reduce document management errors
- Increase productivity with scalable solutions for any size company with any volume of paper
- Reduce costs with no hidden charges or volume packs
- Access Fujitsu's industry leading support team
- Minimize your reliance on IT resources
- Eliminate physical storage space
