## Speedy and versatile

Transform your paper documents into useful electronic data in a flash with the Fujitsu fi-6670 production scanner. Image processing is made easy, with the ability to continuously scan 200 sheet documents containing paper of different weights, quality and sizes. The fi-6670 can even scan paper up to 3 m long enabling digitization of electrocardiograms, instrumental data readings and other long documents.

## "Intelligent" functions/design for efficient operation

The ability to adapt to different paper types is the key to a true batch document scanner. The fi-6670 comes loaded with features allowing the scanner to work autonomously.

### ■ Intelligent multi-feed function

The intelligent multi-feed function simplifies pre-scanning preparation and improves efficiency by identifying documents that tend to trigger false multi-feed alerts, such as documents with photos or sticky notes attached.

### ■ Straight paper path

The straight paper path virtually eliminates paper jams while permitting a greater diversity of paper types.

### ■ Dust resistant sealed optical units

The sealed optical units in the fi-6670 ensure that image quality is maintained, even in the most demanding environments such as factories and warehouses.

## PaperStream IP – produce high quality image processing

PaperStream IP is the scanner driver for fi Series which is compatible with the TWAIN and ISIS standards. With its advanced image processing, various documents can be automatically and easily converted into image files suitable for OCR (Optical character recognition).

## PaperStream Capture – enhanced batch scanning

PaperStream Capture is an application to scan and manage the scanned images using fi Series scanners. Whether it is adjusting the scanning settings or performing batch scanning, you can complete the tasks easily with the user-friendly UI. With the seamless linkage with PaperStream IP, you can perform high quality image processing and batch scanning at the same time.

The fi-6670CGA version has the optional Kofax VRS accelerator board installed.
