Emergency Room Simulation using the Lean method

Performance viewed from another angle

The world-class Toyota industrial management system can help organizations in the health care network improve their performance significantly.

The Fujitsu Lean National Practice has prepared a day-long seminar, in which a high-impact simulation of an emergency room will demonstrate the effectiveness of the Lean Healthcare approach, based on Toyota best practices.

Role play exercises will allow participants to grasp the relevance of applying Lean Healthcare principles in their work environment, especially through a more effective and efficient work organization.

An approach that delivers results

This simulation will demonstrate how the Lean Healthcare approach is an innovative method for resolving issues in the health care processes, such as:

- labour shortages,
- overly long waiting times,
- excessive costs,
- etc.

Fujitsu Lean National Practice invites you to experience this unique training.

You will see performance in a completely different light!

Training Day Agenda

- Introduction
- Current context in healthcare network
- Practical simulation of a traditional ER
- Presentation of Lean Healthcare approach
- Lunch
- Presentation of Lean Healthcare approach (cont.)
- Simulation of a Lean ER
- Implementation strategy
- Discussion of next steps, evaluation and feedback
