Fujitsu G651

Multi-Cassette Bulk Note Acceptor and Sorter

Performance, Reliability and High Capacities: The G651 Bulk Note Acceptor and Sorter
G651 Combines Compact Design with High-Capacity and Versatility

Enhanced Functional Features

- Best-in-class bill validation technology at an affordable cost, making it the smart choice for multiple applications and verticals, ensuring a more rapid ROI
- Industry leading Fujitsu-patented bill validation technology verifies, sorts, images and securely stores all deposited media
- Four high-capacity deposit cassettes and one large capacity reject cassette
- End-to-end highest performance unit with the fastest validation, sort, and deposit transactions in the industry.
- Supports major world currencies including mixed new and used notes, paper and polymer notes
- Fujitsu offers robust SDK in middleware that enables you to more quickly integrate your application software.

Benefits

- Lower cost of ownership by more efficiently managing currency management system and cash-in-transit costs.
- Leverages many of the same major components and cassettes as Fujitsu's family of bill recycling units
- Supports provisional credit, giving the OEM customer the immediate benefit of improved cash flow before cash is actually removed from unit, transported by the CIT vendor and settled in bank's back office.
- "Direct deposit" feature enables G651 to accept deposit quickly and be ready for next customer transaction almost immediately.
- Unit can be integrated easily into cabinet or safe and then safely "racked out" to provide access to the entire transport path and quick access to all cassettes.

G651 Solution Overview

Fujitsu G651 Solution Overview

When it comes to performance, reliability and capacities, the Fujitsu G651 Banknote Acceptor and Sorter is in a class by itself.

Leveraging the same proven technology that is currently available on Fujitsu high-end recyclers and ATMs, the G651 has greater capacity than many acceptors costing thousands more. The G651 can support up to 4 deposit cassettes with over 8,000 notes capacity and has a convenient lockable and removable reject cassette that can store up to 350 unfit, counterfeit or additional validated notes.

With greater capacities and flexibility, the G651 may be the ideal OEM solution for payment terminals, front or back-end cash management or large-format operations where large sums of cash are handled on a daily basis.

With Fujitsu's superior bill handling and bill validation technology you will experience some the highest acceptance rates in the industry with 99% acceptance a common occurrence. And with Fujitsu's patented anti-counterfeit technology, you can be ensured that what you accept is the genuine article.

With Fujitsu's best-in-class bill validation, mixed new and used, paper or polymer notes are no problem. Up to 200 mixed notes can be placed in the depository module in one bundle.

The G651 bill validator supports provisional credit thereby improving and maximizing your customer's cash flow and the information passed along to your cash-in-transit company.

In addition, the Fujitsu-patented BV is designed to protect your investment far into the future. With the introduction of new currencies, new polymer notes, and anti-counterfeiting measures, it is important you have the most flexible BV technology available. The G651 BV can support up to 256 different denomination templates. Adding new currencies or denominations is simply a matter of downloading new firmware. No costly hardware upgrades or on-site visits are required.

Depending on your integration and installation requirements, the G651 can be configured for front or rear access. And its unique "racked out" design permits easy access to the escrow area, the transport path and cassettes to clear jammed notes or foreign objects.

If you are unsure if the G651 is the right investment for your customers, contact Fujitsu. We have developed financial tools that will help you to quickly determine the ROI for your specific environment.

G651 Product Specifications

Dimensions (W x D x H)	360mm x 610mm x 755mm
Weight	130 kg
Maximum Deposit	200 Notes Dispense
Deposit Cassette Capacity	~2,000 Notes* x 4 Cassettes
Reject Bin Capacity	350 notes
Acceptable Media Range	Max. (mm) 86mm x 182mm
Thickness (mm)	0.09 ~ 0.20
Processing Speed	7 notes a second
Interface Specifications	USB 1.1 Full Speed CEN / XFS
Electrical Requirements	DC +24V +/- 10% Avg.22.5A Peak 31.0A
Temperature	Operation: 5°C - 50°C Stop State:-5°C - 50°C
Relative Humidity	Operation: 20% - 80% Stop State: 10% - 90%
RoHS Compliance	Yes
UL Compliance	Yes 

Fujitsu Frontech North America reserves the right to change specifications without notice

*Actual number of notes depends on fitness of currency, new versus used
