VERITAS NETBACKUP™ APPLIANCE FOR REMOTE OFFICES
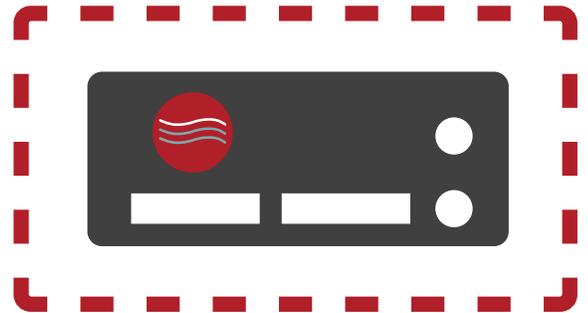

A SIMPLIFIED DATA PROTECTION SOLUTION DEPLOYABLE AS A VIRTUAL APPLIANCE FOR REMOTE OFFICES

VERITAS™

Veritas NetBackup™ Appliance for Remote Offices helps customers reduce data center footprint and simplify data protection in remote locations with an integrated virtual appliance. The easy to deploy and easy to power-up appliance centralizes and secures data backup between locations, and eliminates the need for additional remote IT staff. Built-in deduplication features provide cost-effective and fast backup and replication to help decrease bandwidth utilization up to 99 percent. With a unified data protection approach, your organization will have visibility and control of unencrypted data to identify areas of risk and help ensure that you are meeting regulatory mandates.

PRODUCT HIGHLIGHTS

- **Suitable for Remote Office or Branch Offices** – Deployed with 2 TB of usable capacity.

- **Ease of Deployment** – All-in-one solution combining software, server and networking in one converged platform making it easy to deploy without the need for onsite expertise and additional infrastructure.

- **Centralized Management** – Centralize remote office or branch office data in one location.

- **Protects Investment** – Fits into existing virtual infrastructure.

- **Simplified Operations** – Power up and walk through the installation wizard to start backing up in minutes.

- **Improves Resource Utilization** – Decrease network bandwidth utilization up to 99 percent with more robust protection for remote offices.

- **Eliminates Build-Your-Own Servers** – Reduce the operating cost, complexity, and frustrations of building and supporting your own media servers with the NetBackup Virtual Appliance for Remote Offices.

- **Built-in Security** – Stay Protected against malicious threats with a built-in Data Protection System.

- **Replicates Backup Images** – With Veritas NetBackup™ Auto Image Replication (AIR), backup images are replicated to a remote NetBackup domain for electronic vaulting and disaster recovery readiness.

- **Automates Monitoring** – Provides Inventory and configuration status, reports the status of software components through a call home feature, and automatically generates serial numbers.

- **Flexible Functionality** – Dual Functional Roles combining master/media server in a single appliance.

- **Bundled Licensing/SKU** – Veritas NetBackup™ Capacity license + NetBackup Virtual Appliance for Remote Offices and BETB included AND SKU for just NetBackup Virtual Appliance for Remote Offices (for use by eFlex customers that have existing FETB).

VERITAS NETBACKUP VIRTUAL APPLIANCE FOR REMOTE OFFICES

Capacity	2 TB usable
NetBackup Mode	Master/Media for Remote Offices and Branch Offices use case
I/O	1x10GB virtual interface on deployment NO FC, No Tape
Memory	16 GB, per OVA
CPU	8 virtual cores per OVA
Serial Number	Unique serial number per virtual appliance
Support	• Environment: Inventory, configuration, status. • Call-home feature • MyAppliances Portal • No hardware monitoring • Generates serial number
Network VLAN	Yes, in hypervisor
NIC Bonding	Yes, in hypervisor
Licensing/SKU	Bonded SKU, with NBUCapacity license and Virtual Appliance and BETB included included. AND SKU for just Virtual Appliance (for use by eFlex that have existing FETB. Perpetual license. OVA will be shipped with a trial bundle license that would be valid for 60 days. License must be validated as a Virtual Appliance.
Cloud Connectors	Yes
Built-in Security (Symantec™ Data Protection System)	Yes

MANAGEMENT

Through existing NetBackup Graphical User Interface.

PROTOCOL STANDARDS

IP RFC0791
