## Promoting CO<sub>2</sub> Emission Reductions with Our Business Partners

### Our Approach

The reduction of CO<sub>2</sub> emissions through society-wide energy saving has become a critical theme for global warming prevention. Fujitsu Group believes that it is necessary to work toward CO<sub>2</sub> emission reductions along its entire supply chain, which is why we advocate measures to reduce or limit the CO<sub>2</sub> emissions of our business partners.

From FY 2013, we are expanding the scope of these measures to encourage business partners beyond component suppliers and to include other areas such as construction, facilities, maintenance, and software. Specifically, we are surveying the status of business partners' activities for CO<sub>2</sub> emissions reduction and offering support and appeals for extra efforts to business partners that do not meet standards set by our Group. Going forward, we intend to leverage the green procurement expertise of the Fujitsu Group to work with our business partners to drive forward initiatives and contribute to decreasing the environmental burden of society overall.

### Summary of FY 2015 Achievements

Targets under the Fujitsu Group Environmental Action Plan (Stage VII) (toward FY 2015)	Expand activities of reducing CO <sub>2</sub> emissions to all types of suppliers.
FY 2015 Targets	Reach a <b>100%</b> of business partners implementing CO <sub>2</sub> reduction or limitation measures.
FY 2015 Key Performance	Reached <b>100%</b> of business partners implementing CO <sub>2</sub> reduction or limitation measures.

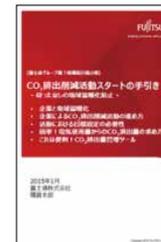

### FY 2015 Performance and Results

#### Surveyed Status of Business Partners' Initiatives to Support Their Efforts

The Fujitsu Group has made it an objective to have business partners engage in stage 2 activities (see figure on the right) and we encourage their implementation. Specifically, we conducted a survey of business partners distributing our Group's original environmental survey sheet to our new business partners and checked the status of their activities for reducing CO<sub>2</sub> emissions. For business partners who have not reached stage 2 activities, we provide our own check lists featuring easily actionable case studies as opportunities for partners to start implementing activities.

We also compiled a leaflet that we supply as a guide for activities. The leaflet contains reference information and details on how companies can proceed with regard to global warming issues.

Moreover, we re-confirmed CO<sub>2</sub> emission reduction activities for business partners who had reached stage 2 by the end of FY 2014 and encouraged them to continue those activities.

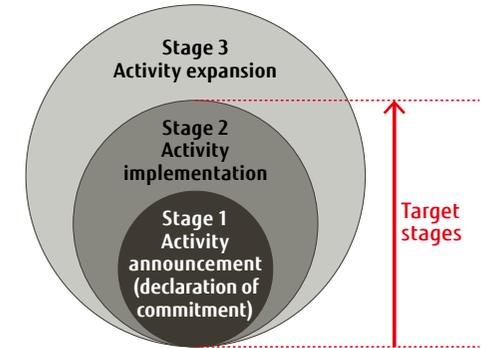

Leaflet distributed to business partners

#### Achieved 100% Implementation Ratio with Business Partners Undertaking Initiatives to Reduce CO<sub>2</sub> Emissions

Fujitsu achieved its target of a 100% ratio of business partners undertaking initiatives to reduce CO<sub>2</sub> emission four months early in FY 2015, the final year of Environmental Action Plan (Stage VII). This result was due to unified, Group-wide effort and use of know-how that we accumulated implementing these activities during FY 2013 and 2014.

### Drawing Up an Activity Evaluation Index

<b>Stage 1</b> Activity announcement (declaration of commitment)	The stage when the significance of reducing/limiting CO <sub>2</sub> is understood and a declaration of commitment is made as a company.
<b>Stage 2</b> Activity implementation	The stage when initiatives are implemented, each with fixed numerical targets, policies, or plans.
<b>Stage 3</b> Activity expansion	The stage when activities are expanded from inside to outside the company (such as support for the upstream supply chain or cooperative efforts to review approaches with external organizations).

### FY 2016 Targets and Plans

#### Strengthening Activity Implementation in Our Upstream Supply Chain

In Environmental Action Plan (Stage VIII), Fujitsu is continuing to pursue the objective of "Reducing CO<sub>2</sub> emissions," which is an environmental challenge on a global scale.

In requests to our business partners, we are adding encouragement for them to recommend initiatives to their tier one business partners (i.e., Fujitsu's tier two business partners), and thereby aim to expand this effort in our upstream supply chain.

Through initiatives like these, we hope to broaden the circle of our activities to our entire supply chain.
