

# See the way ahead with Fujitsu's BPI Journey

Transform your  
business so nothing  
will hold you back

## Modernizing business processes, with intelligence

Bring your organizational processes and IT closer together with insights to help you truly transform and achieve operational excellence. Fujitsu's Business Process Intelligence (BPI) framework uses a data-driven approach to understand your end-to-end processes and enable a sustainable, intelligent enterprise.

By enhancing your digital transformation plans with BPI, you can realize value at every stage of your journey and deliver better outcomes across your organization.

## Fujitsu's BPI Journey Framework

Fujitsu's BPI Journey Framework is powered by SAP Signavio and includes solutions and capabilities around process insights, process mining, business process management, customer journey, process governance and automation.

Our approach is industry-agnostic, focusing on delivering business outcomes rather than solution features. This allows us to transform business processes for any organization, irrespective of its size or industry.

We offer our BPI Journey Framework as a value-added service that distinguishes Fujitsu as a capable delivery partner, and a thought leader in Business Transformation for SAP and non-SAP customers.

# Adapting to evolving business challenges

Today's enterprises operate in a complex business landscape, with pressures around:

## Global uncertainty

Against a backdrop of supply chain issues, volatile energy costs, geopolitical tensions, and increasingly sophisticated cyber threats, enterprises are seeking to adapt their business processes. Through process transformation, we help you to enhance security, maintain compliance, and be flexible to adapt quickly to the next global crisis – all while maintaining a sustainable growth trajectory.

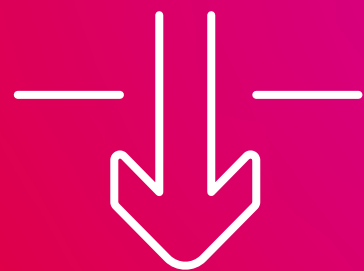

## Sustainability

In every sector, it's recognized that we must adjust business in a way that makes a positive impact on our environment, society, and economy. As a result of gaining a comprehensive understanding of key processes at different levels, you'll be able to make better-informed decisions and develop more effective strategies around sustainability issues in the future.

## Cost optimization

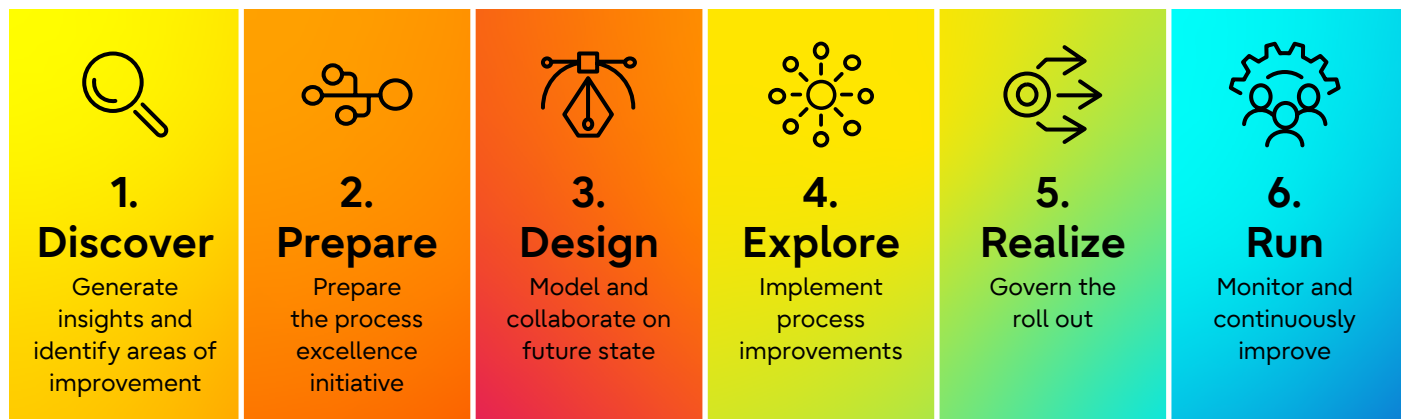

Organizations are under pressure to lower costs and increase process efficiency, all while delivering more value to customers. To achieve this, it's crucial that businesses and their IT no longer operate in isolation. Instead, you need to understand how to streamline your existing business processes by integrating them more closely with your IT operations. And when you have this, you can meet the high expectations of your customers, vendors, and employees – for less of the cost.

# Supporting your SAP S/4HANA transformation with Business Process Intelligence (BPI)

Leveraging BPI, Fujitsu will support you to adopt, refine, and manage your critical business processes, regardless of where you are in your S/4HANA transformation journey.

To deliver value, we combine Fujitsu's methodology for value realization with a BPI workstream powered by the **SAP Signavio Process Transformation Suite**. Aligned with SAP's Activate methodology, together we:

As a customer-centric, result-driven organization, we work with customers to map existing processes, identify potential challenges during transition, and align strategies with the company's unique requirements, targets, and desired outcomes.

## Fujitsu's SAP offerings leveraging BPI

Fujitsu has also integrated its BPI component into many of our global SAP offerings, such as:

### Fujitsu S/4HANA Value Assessment

Which helps you to see the way ahead from a desired business outcome standpoint.

### Fujitsu S/4HANA Transformation Services

Our team guides you through the migration, adoption, and day-to-day operations of S/4HANA.

### Fujitsu iAMS

Fujitsu's intelligent Application Managed Services (iAMS) helps you modernize your application landscape, executed through Fujitsu Global Delivery Centers along with Regional Centers.

### Fujitsu Industry solutions

We combine our industry solutions and technical capabilities with SAP's latest offerings, such as SAP Signavio, to connect information across your business, at every level. So, you'll get visibility and insight like never before. This means you'll gain greater control to improve areas involving loss prevention, energy efficiency, waste reduction, circular economy, and overall carbon neutrality.

## Why Fujitsu?

Fujitsu has been working with SAP for more than 40 years to deliver sustainable solutions across a range of industries, including manufacturing, retail, and public sector, just to name a few.

As a strategic partner and a customer of SAP Signavio, Fujitsu actively participates in co-development and other initiatives that enhance the SAP Signavio Process Transformation Suite, such as the newly introduced **One Process Acceleration Layer (OPAL)**.

Drawing on our highly skilled consultants and extensive partner ecosystem, we'll help you leverage the power of SAP S/4HANA and transform into an intelligent enterprise, unlocking tangible business values and co-creating solutions so you can innovate and thrive.

Ultimately, you can rely on us to help you to see the big picture, from a desired standpoint of productivity, business outcomes, and sustainability.
