FUJITSU

fi-6140Z & fi-6240Z

For professional grade speed and paper handling agility, the fi-6140Z and fi-6240Z set the highest performance benchmark within the fleet of compact Fujitsu scanners.

Scanning Performance

With duplex scanning speeds of up to 120 images per minute in Color, Grayscale, and Monochrome, the fi-6140Z and fi-6240Z balance high performance with one of the most advanced paper separation technologies in their class. Combining reverse roller technology with a host of intelligent features, the fi-6140Z and fi-6240Z deliver exceptional feeding reliability and operating productivity across a wide variety of scanning situations.

- Paper Protection technology: Protects valuable documents by halting the scanning process when the scanner recognizes that a jam is about to occur.
- Intelligent Multi-Feed Function (IMFF): Simplifies pre-scanning preparation and improves efficiency by ignoring documents that trigger false multi-feed alerts such as an attached receipt or sticky note.
- Intelligent Capture Correction Function (iCCF): Internal hardware-based Auto-color recognition, auto-size detection, and auto de-skew correction provides dramatic efficiency by combining fast scanning with simultaneous high speed image processing.
- Robust ADF: Plastic and embossed card support, long document scanning, and acceptance of a broad range of paper weights keeps 'document exceptions' low and operator efficiency high.

Centralized Efficiency

Whether the infrastructure is fixed or expanding, managing technology intelligently inside the organization is key to reducing total cost of ownership and the Fujitsu fi-6140Z and fi-6240Z provide system administrators with advanced software tools to centrally manage these scanners more productively and cost effectively.

- Agent, console and server remote scanner management
- Real-time Fujitsu scanner inventory
- Status and alert monitoring
- Centralized driver update deployment
- Consumable management
