Safety Information

The attached "Safety Precautions" manual contains important information about the safe and correct use of the ScanSnap. Make sure that you read and understand it before using the ScanSnap.
Read the following manuals according to your needs when using the ScanSnap.

### Before Using the ScanSnap

<table>
<thead>
<tr>
<th>Manual</th>
<th>Description and Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Safety Precautions</td>
<td>This manual contains important information about the safe use of the ScanSnap. Make sure you read this manual before using the ScanSnap. Safety Precautions is included in the package. In addition, when the software is already installed, this manual can be accessed by selecting [Start] menu → [All Programs] → [ScanSnap Manuals] → [iX100 Safety Precautions] (for Windows 8.1/Windows 8, by selecting [iX100 Safety Precautions] under [ScanSnap Manuals] on the All apps screen).</td>
</tr>
</tbody>
</table>

### When Setting Up the ScanSnap

<table>
<thead>
<tr>
<th>Manual</th>
<th>Description and Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>ScanSnap iX100 Getting Started</td>
<td>This manual explains the setup procedure from the moment you open the package to testing the operations. Getting Started is included in the package. In addition, when the software is already installed, this manual can be accessed by selecting [Start] menu → [All Programs] → [ScanSnap Manuals] → [iX100 Getting Started] (for Windows 8.1/Windows 8, by selecting [iX100 Getting Started] under [ScanSnap Manuals] on the All apps screen).</td>
</tr>
</tbody>
</table>

### When Operating the ScanSnap

<table>
<thead>
<tr>
<th>Manual</th>
<th>Description and Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>ScanSnap iX100 Basic Operation Guide (this manual)</td>
<td>This manual explains the basic operations and cleaning procedure for the ScanSnap.</td>
</tr>
</tbody>
</table>
| ScanSnap Manager Help | This Help file describes the windows, operational troubles and the solutions, as well as messages of the ScanSnap Manager. This manual can be accessed by one of the following methods:  
  - Right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar, and select [Help] → [Help] from the "Right-Click Menu" (page 45).  
  - Select [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Manager Help] (for Windows 8.1/Windows 8, select [ScanSnap Manager Help] under [ScanSnap Manager] on the All apps screen).  
  - Click the Help button for ScanSnap Manager.  
  - Press the [F1] key on the keyboard while a window is displayed.  
  - Click the [Help] button in any window. |
### Manual Description and Location

<table>
<thead>
<tr>
<th>Manual</th>
<th>Description and Location</th>
</tr>

Symbols Used in This Manual

The following indications are used in this manual to obviate any chance of accident or damage to you and people near you, and your property. Warning labels indicate the warning level and statements. The symbols indicating warning levels and their meanings are as follows.

<table>
<thead>
<tr>
<th>Indication</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="WARNING" /></td>
<td>This indication alerts operators of an operation that, if not strictly observed, may result in severe injury or death.</td>
</tr>
<tr>
<td><img src="image" alt="CAUTION" /></td>
<td>This indication alerts operators of an operation that, if not strictly observed, may result in safety hazards to personnel or damage to the product.</td>
</tr>
</tbody>
</table>
Arrow Symbols in This Manual

Right-arrow symbols (→) are used to connect icons or menu options you should select in succession.

Example: Select [Start] menu → [Computer].
Screen Examples in This Manual

Microsoft product screenshots are reprinted with permission from Microsoft Corporation. The screenshots used in this manual are of Windows 7. The actual windows and operations may differ depending on the operating system.

Icon in the Notification Area

The ScanSnap Manager icon is displayed in the menu which appears when you click in the notification area.

To have the ScanSnap Manager icon always displayed in the notification area, drag the icon and drop it onto the notification area.

The notification area is located at the far right of the taskbar.

The explanations in this manual use the case in which the ScanSnap Manager icon is always displayed in the notification area.
For Windows 8.1 or Windows 8 Users

To start ScanSnap applications or display Control Panel, use the All apps screen. The All apps screen is displayed by following the procedure below.

**Windows 8.1**

1. **Click** on the lower left side of the Start screen.
   
   To display , move the mouse cursor.

**Windows 8**

1. **Right-click the Start screen.**

2. **Click [All apps] on the app bar.**
When a ScanSnap model is referred to in this manual, "Color Image Scanner ScanSnap" is omitted. Also, the following abbreviations are used in this manual.

*1: The ScanSnap N1800 series is not included.
What You Can Do with the ScanSnap

Scanning Multiple Documents Continuously

When you scan multiple documents with the ScanSnap, you can scan one or two document at a time. To scan two documents at a time, you can insert two documents at a time or you can insert the next document while another document is being scanned.

- Scanning one document at a time
  After scanning a document is completed, when you insert the next document in the ScanSnap, the next scan is started automatically.
  For details, refer to "Scanning a Document" (page 20).

- Scanning documents by inserting two documents at a time or by inserting the next document while the current document is being scanned (dual scan)
  When scanning small size documents such as business cards and postcards, you can insert two documents at a time in the ScanSnap. Alternatively, you can insert the next document while another document is being scanned. In either method, you can scan up to 20 documents continuously in a single scanning operation.
  These scanning methods are referred to as dual scans.
  For details, refer to "Scanning Documents with the ScanSnap by Inserting Two Documents at a Time or by Inserting the Next Document While the Current Document Is Being Scanned" (page 25).

Scanning Documents Larger Than A4 or Letter Size by Directly Inserting Them in the ScanSnap

By folding an A3, B4, or Double Letter size document in half and scanning each side continuously, the scanned images of both sides can be automatically merged into a single image.
Scanned images can be merged only when there is text, diagram, or a table on the fold line of the folded document.
For details, refer to "Scanning Documents Larger Than A4 or Letter Size (by Directly Inserting Them in the ScanSnap)" (page 31).

Scanning Documents That Cannot Be Inserted Directly in the ScanSnap

You can use the optional Carrier Sheet to scan the following documents.

- Documents that are larger than A4/Letter size and not larger than A3 size
  For details, refer to "Scanning Documents Larger Than A4 or Letter Size (with the Carrier Sheet)" (page 78).

- Documents that can be damaged quite easily such as photographs, or non-standard size documents such as clippings
  For details, refer to "Scanning Documents Such as Photographs and Clippings" (page 83).
Connecting the ScanSnap via Wireless LAN

You can connect the ScanSnap and a computer or mobile device via wireless LAN. To connect them, you can use either the Access Point Connect mode in which a wireless access point is used for connection or the Direct Connect mode in which a computer or mobile device is directly connected to the ScanSnap. Select a suitable connection mode depending on whether there is wireless LAN in a place where you use the ScanSnap or not.

To configure the wireless settings for the ScanSnap, use the ScanSnap Wireless Setup Tool, which is installed together with ScanSnap Manager.

For details, refer to "Connecting the ScanSnap via Wireless LAN" (page 55):

- Access Point Connect mode
- Direct Connect mode
Scanning a Document

The procedure for scanning documents by inserting one document at a time is as follows. For details about documents that can be scanned, refer to "Documents to Scan" (page 66).

1. **Open the feed guide of the ScanSnap.**

   ![Feed Guide Diagram]

   **HINT**

   - If you want the document to be ejected from the front of the ScanSnap or when there is not enough space where the document exits the ScanSnap, open the output guide.
     For details about documents that can be scanned with the output guide open, refer to "Documents to Scan" (page 66).

   ![Output Guide Diagram]

   - How the document is ejected differs as below depending on whether the output guide is open or closed.
     - When the output guide is closed

       ![Closed Guide Diagram]

     - When the output guide is open

       ![Open Guide Diagram]

> The [Scan/Stop] button flashes in blue. The button returns to being lit normally when document scanning is enabled.
In addition, the ScanSnap Manager icon in the notification area located at the far right of the taskbar changes from \[\text{ScanSnap Manager icon}\] to \[\text{ScanSnap Manager icon}\].

2. Insert the document straight into the feeding section of the ScanSnap, with the scanning side facing up.

The document is pulled in until it is set inside the ScanSnap.

**ATTENTION**

- If you specify a standard size instead of selecting [Automatic detection] (default), insert the document by aligning it with the left edge of the feeding section.

  You can configure the scan settings in the “ScanSnap Setup Window” (page 47).

- When you perform scanning with the output guide closed, leave enough space at the back of the ScanSnap to allow the document to be completely ejected. In addition, when you scan long page documents, hold the scanned documents with your hands to prevent them from falling off the unit where the ScanSnap is placed on.

  Make sure that the area where the document exits the scanner is clear of any obstacles. Otherwise, paper jam may occur.
If you scan the following documents with the output guide open, a paper jam may occur and damage the documents. Scan the following documents with the output guide closed.
- Thick paper (80 g/m² [20 lb] or heavier)
- Postcards
- Business cards
- Plastic cards
- Carrier Sheet

3. Press the [Scan/Stop] button on the ScanSnap to start scanning.

**ATTENTION**
Do not perform the following operations during scanning. Doing so will stop scanning.
- Connect or disconnect the ScanSnap and other USB devices.
- Close the feed guide.
- Switch users.
- Allow the computer to enter sleep mode.

⇔ The [Scan/Stop] button on the ScanSnap flashes in blue while the documents are being scanned.
The [ScanSnap Manager - Image scanning and file saving] window appears.

⇔ When scanning is complete, the [ScanSnap Manager - Image scanning and file saving] window displays a scanning standby status.
4. Press the [Scan/Stop] button on the ScanSnap to finish scanning.
   ➤ The Quick Menu appears.

5. In the Quick Menu, click the icon of the application to link with ScanSnap Manager.
   For details about linking the following applications with ScanSnap Manager, refer to "Using the ScanSnap According to Your Needs" (page 71).
   - ScanSnap Organizer
   - Scan to CardMinder
The selected application starts up. For details, refer to the Advanced Operation Guide.

**ATTENTION**
- You cannot start scanning when the Quick Menu is displayed. Either select an icon from the Quick Menu and finish the process, or close the Quick Menu before you perform the next scan.
- Do not move, delete, or rename scanned images using other applications while the Quick Menu is displayed.

**HINT**
- Clicking ![description](image) displays the description of an application. Placing the mouse cursor over the icon of another application displays the description of the application.
- Performing a scan while an application that can be automatically linked with is active automatically starts the linkage between ScanSnap Manager and the application. For details, refer to the Advanced Operation Guide.
Scanning Documents with the ScanSnap by Inserting Two Documents at a Time or by Inserting the Next Document While the Current Document Is Being Scanned

When scanning small size documents such as business cards and postcards with the ScanSnap, you can insert two documents at a time or you can insert the next document while the current document is being scanned. These scanning methods are referred to as dual scans.

Documents can be inserted in the following two methods:

- Inserting two documents at a time in the ScanSnap
- Inserting the next document while the current document is being scanned

For details about documents that can be scanned, refer to "Documents to Scan" (page 66).

ATTENTION

- When you select an option other than [Automatic detection] for [Paper size] in the [Paper] tab of the "ScanSnap Setup Window" (page 47), the dual scan function is disabled.
- Use a dual scan to scan a document within the following ranges. If one of the following ranges is exceeded, a length error occurs and part of the document may not appear in the scanned image.
  - Maximum scanning length: 863 mm (34 in.) (355.6 mm (14 in.) when [Excellent] is specified for [Image Quality] in the [Scanning] tab of the "ScanSnap Setup Window" (page 47))
  - Maximum number of documents for scanning: 20 sheets
- When you continue scanning by inserting the next document while the current document is being scanned, the [Scan/Stop] button flashes more quickly if the scanning length exceeds 650 mm (26
in.) . If this occurs, wait until scanning is complete without continuing to insert more documents. After scanning is complete, insert the next document. The next scan is started automatically.

1. Open the feed guide of the ScanSnap.

![Feed Guide](image)

HINT
- If you want the document to be ejected from the front of the ScanSnap or when there is not enough space where the document exits the ScanSnap, open the output guide.
  For details about documents that can be scanned with the output guide open, refer to "Documents to Scan" (page 66).

![Output Guide](image)

- How the document is ejected differs as below depending on whether the output guide is open or closed.
  - When the output guide is closed

![Close](image)

  - When the output guide is open

![Open](image)

- The [Scan/Stop] button flashes in blue. The button returns to being lit normally when document scanning is enabled.
  In addition, the ScanSnap Manager icon in the notification area located at the far right of the taskbar changes from ![ScanSnap Manager](image) to ![Normal](image).

2. Insert the document straight into the feeding section of the ScanSnap, with the scanning side facing up.

Insert each document in the center of the left or right half of the feeding section.
ATTENTION
When inserting the documents, insert them at least 10 mm (0.39 in.) apart from each other. If the space between the documents is less than 10 mm (0.39 in.), the scanned images may not be cropped correctly.

The document is pulled in until it is set inside the ScanSnap.

ATTENTION
- When you perform scanning with the output guide closed, leave enough space at the back of the ScanSnap to allow the document to be completely ejected. In addition, when you scan long page documents, hold the scanned documents with your hands to prevent them from falling off the unit where the ScanSnap is placed on.
  Make sure that the area where the document exits the scanner is clear of any obstacles. Otherwise, paper jam may occur.

- If you scan the following documents with the output guide open, a paper jam may occur and damage the documents. Scan the following documents with the output guide closed.
  - Thick paper (80 g/m\(^2\) [20 lb] or heavier)
  - Postcards
  - Business cards

3. Press the [Scan/Stop] button on the ScanSnap to start scanning.

ATTENTION
Do not perform the following operations during scanning. Doing so will stop scanning.
- Connect or disconnect the ScanSnap and other USB devices.
- Close the feed guide.
● Switch users.
● Allow the computer to enter sleep mode.

The [Scan/Stop] button on the ScanSnap flashes in blue while the documents are being scanned.

The [ScanSnap Manager - Image scanning and file saving] window appears.

HINT
When the [ScanSnap Manager - Image scanning and file saving] window is maximized, multiple scanned images are displayed in the preview area. When you use a dual scan, it is recommended that you maximize the [ScanSnap Manager - Image scanning and file saving] window to check that scanned images are created correctly while scanning documents.
When scanning is complete, the [ScanSnap Manager - Image scanning and file saving] window displays a scanning standby status.

HINT
To continue scanning, insert the next document to be scanned. When the document is inserted, scanning starts automatically.

4. Press the [Scan/Stop] button on the ScanSnap to finish scanning.
   ➤ The Quick Menu appears.

5. In the Quick Menu, click the icon of the application to link with ScanSnap Manager.
For details about linking the following applications with ScanSnap Manager, refer to "Using the ScanSnap According to Your Needs" (page 71).

- ScanSnap Organizer
- Scan to CardMinder

The selected application starts up. For details, refer to the Advanced Operation Guide.

**ATTENTION**
- You cannot start scanning when the Quick Menu is displayed. Either select an icon from the Quick Menu and finish the process, or close the Quick Menu before you perform the next scan.
- Do not move, delete, or rename scanned images using other applications while the Quick Menu is displayed.

**HINT**
- Clicking displays the description of an application. Placing the mouse cursor over the icon of another application displays the description of the application.
- Performing a scan while an application that can be automatically linked with is active automatically starts the linkage between ScanSnap Manager and the application.
For details, refer to the Advanced Operation Guide.
Scanning Documents Larger Than A4 or Letter Size (by Directly Inserting Them in the ScanSnap)

By folding an A3, B4, or Double Letter size document in half and scanning each side continuously, the scanned images of both sides are automatically merged and saved as a single image.

For details about documents that can be scanned, refer to "Documents to Scan" (page 66).

ATTENTION

- Scanned images are automatically merged only when there is text, diagram, or a table on the fold line of the folded document.
  - When scanned images are automatically merged

- When scanned images are not automatically merged

- After a document is scanned, if the scanned images are not merged automatically, you can use the ScanSnap Organizer Merge Pages function to merge the scanned images. For details, refer to the ScanSnap Organizer Help.
- For a document that will have scanned images which are merged automatically, you can use the optional Carrier Sheet to scan the document and merge the scanned images automatically. For details, refer to "Scanning Documents Larger Than A4 or Letter Size (with the Carrier Sheet)" (page 78).
- If scanned images are unexpectedly merged, clear the [Merge both side images] checkbox on the [Scanning mode option] window, and then scan the document again. To open the [Scanning mode option] window, click the [Option] button in the [Scanning] tab of the "ScanSnap Setup Window" (page 47).
1. Open the feed guide of the ScanSnap.

![Feed Guide]

◦ The [Scan/Stop] button flashes in blue. The button returns to being lit normally when document scanning is enabled.

   In addition, the ScanSnap Manager icon in the notification area located at the far right of the taskbar changes from to .

2. Fold the document in half so that the sides to be scanned are facing out.

   **ATTENTION**

   Fold the long side of the document in half. If the left and right areas of the folded document are different in size from each other, the scanned images may not be merged automatically.

3. Insert the document straight into the feeding section of the ScanSnap, with the scanning side facing up.
4. **Press the [Scan/Stop] button on the ScanSnap to start scanning.**

   - The [Scan/Stop] button on the ScanSnap flashes in blue and the [ScanSnap Manager - Image scanning and file saving] window appears while the document is being scanned.
   
   When scanning is complete, the scanned image of the scanning side is displayed in the preview area.

5. **Turn over the document and insert it as described in step 3.**

   - **ATTENTION**
     
     Make sure to scan the front and back sides of the document folded in half consecutively.

   - Scanning starts automatically.

6. **Press the [Scan/Stop] button on the ScanSnap to finish scanning.**

   - The Quick Menu appears.

7. **In the Quick Menu, click the icon of the application to link with ScanSnap Manager.**
When you select ScanSnap Organizer, you can manage scanned images by folder with ScanSnap Organizer.

For details, refer to "Managing Business Forms in ScanSnap Organizer" (page 72).

The selected application starts up. For details, refer to the Advanced Operation Guide.

**ATTENTION**
- You cannot start scanning when the Quick Menu is displayed. Either select an icon from the Quick Menu and finish the process, or close the Quick Menu before you perform the next scan.
- Do not move, delete, or rename scanned images using other applications while the Quick Menu is displayed.

**HINT**
- Clicking displays the description of an application. Placing the mouse cursor over the icon of another application displays the description of the application.
- Performing a scan while an application that can be automatically linked with is active automatically starts the linkage between ScanSnap Manager and the application. For details, refer to the Advanced Operation Guide.
ScanSnap Overview

This section provides an overview that you should be aware of before operating ScanSnap.

## USB connector

Used to connect a USB cable.

## WPS button

Press this button to connect to a WPS compatible device by using the push button method.

## Wi-Fi switch

Turn this switch on to connect the ScanSnap via wireless LAN.
Charging the Battery

The battery of the ScanSnap can be charged by connecting the ScanSnap and the computer with the supplied USB cable.
Charge the ScanSnap's battery in the following procedure.

**ATTENTION**
If you use the ScanSnap while charging the battery, the following conditions may occur:
- It takes time until charging completes.
- Charging does not complete.
- The ScanSnap turns off automatically.

1. **Connect the USB cable to the USB connector on the ScanSnap and the USB port on the computer.**

   ![Diagram of USB connection](image)

   - The battery indicator lights up in orange.
     When charging completes, the battery indicator turns off.

**HINT**
You can use the optional USB power adapter to charge the battery in a shorter time.
System Requirements

The ScanSnap has the following system requirements.
For the latest information on requirements, please visit the ScanSnap Support Site at:
http://scansnap.fujitsu.com/g-support/en/

| Operating system | Windows 8.1 (32-bit/64-bit) (*1)  
Windows 8 (32-bit/64-bit) (*1)  
Windows 7 (32-bit/64-bit)  
Windows Vista (32-bit/64-bit) (*2) |
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>CPU</td>
<td>Intel® Core™ i5 2.5 GHz or higher</td>
</tr>
<tr>
<td>Memory</td>
<td>4 GB or more</td>
</tr>
</tbody>
</table>
| Display resolution (*3) | Windows 8.1/Windows 8: 1024 × 768 pixels or higher  
Windows 7/Windows Vista: 800 × 600 pixels or higher |
| Disk space       | Free space required to install the software related to the ScanSnap is as follows: (*4)  
- ScanSnap Manager: 700 MB  
- ScanSnap Organizer: 670 MB  
- CardMinder: 660 MB  
- ABBYY FineReader for ScanSnap: 620 MB  
- ScanSnap Online Update: 10 MB  
- Scan to Microsoft SharePoint: 40 MB  
- ScanSnap iX100 Basic Operation Guide: 200 MB |
| USB port         | USB3.0 (*5)/USB2.0/USB1.1        |

*1: The software bundled with the ScanSnap operates as a desktop application.
*2: Service Pack 2 or later is required.
*3: When the font size is large, some screens may not be displayed correctly.
In such a case, use a smaller font size.
*4: To save scanned images, more free space is required.
For details about estimated image data size, refer to the ScanSnap Manager Help.
*5: When the ScanSnap is connected to a USB 3.0 port, the port operates as a USB 2.0 port.

**ATTENTION**
- If the system requirements above are not satisfied, the ScanSnap may not operate.
- If a USB port on the keyboard or on the monitor is in use, the ScanSnap may not operate.
- When using a commercially available USB hub, use a type that is powered from an electrical power supply (and that comes with an adapter).
- Scanning speed decreases in the following cases:
  - The CPU or the memory does not meet the recommended specifications.
  - The version of the USB port or the USB hub is USB 1.1.
- The actual disk space used for the installation of the software and the disk space required for the installation may be different because of the disk management in your Windows system.
- To scan a document, a disk space that is approximately three times larger than the size of the file to be saved is required.
If characters are not correctly displayed when using CardMinder, Scan to Mobile, Scan to Salesforce Chatter, Scan to SugarSync, or Scan to Dropbox, install the universal font (Arial Unicode MS) from the setup disk of Microsoft Office 2007 or later.

**HINT**

For Windows 8.1, Windows 8, or Windows Vista, when the following software programs are installed, .NET Framework 3.5 SP1 (which requires 500 MB of free disk space at most) may be installed at the same time:

- ScanSnap Manager
- ScanSnap Organizer
- CardMinder
Overview of the ScanSnap Related Software

This section gives an overview of each bundled software and their functions. You can edit, manage, and arrange the scanned image by using the following software:

**ScanSnap Manager**

This scanner driver is required to scan documents with the ScanSnap. Scanned images can be saved as PDF or JPEG files to a computer.

You need to have ScanSnap Connect Application installed on your mobile device to save PDF or JPEG files to your mobile device.

You can download ScanSnap Connect Application for your mobile device from its application market.

**ScanSnap Organizer**

You can use this application to display image data (PDF or JPEG files) without opening them, create folders and arrange files as you like.

**CardMinder**

You can use this application to efficiently digitalize a large number of business cards.

Text recognition can be performed on business cards and you can create a database to facilitate card data management and searches. Data in the database can be printed and linked with various applications.

**ABBYY FineReader for ScanSnap**

This application can perform text recognition on the scanned images using OCR (Optical Character Recognition) to convert the image data to Word, Excel, or PowerPoint files that can be edited.

**ScanSnap Online Update**

This application checks if any updates have been released on the download server, and automatically updates the programs.

**Scan to Microsoft SharePoint**

You can easily save files in SharePoint using the ScanSnap.

**Evernote for Windows**

You can easily save files in Evernote using the ScanSnap.

**Dropbox for Windows**

You can easily save files to your Dropbox folder using the ScanSnap.

**SugarSync Manager for Windows**

You can easily save files to your SugarSync folder using the ScanSnap.
How to Install the Software

When you insert the Setup DVD-ROM into the DVD-ROM drive on your computer, the [ScanSnap Setup] window appears.

**ATTENTION**

- Do not connect the ScanSnap to the computer before installing the software. Doing so may cause the ScanSnap not to be recognized by the computer. In that case, install the software, and then reconnect the ScanSnap to the computer.
- If a DVD-ROM drive is not available, the installers for the software programs can be downloaded from the following web page.
  

The functions of each button in the [ScanSnap Setup] window are as follows.

<table>
<thead>
<tr>
<th>Button</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Readme</td>
<td>Displays the [Readme] window. You can refer to the Readme file of each software in this window.</td>
</tr>
<tr>
<td>Install Products</td>
<td>Displays the [Install Products] window. You can start installing software.</td>
</tr>
<tr>
<td>Manuals</td>
<td>Displays the [Manuals] window. You can refer to Safety Precautions, Getting Started, the Basic Operation Guide (this manual), and the manual of each software program in this window.</td>
</tr>
<tr>
<td>Browse DVD Contents</td>
<td>Opens Windows Explorer to display the files from the Setup DVD-ROM.</td>
</tr>
<tr>
<td>Support</td>
<td>Displays contact information for customer support.</td>
</tr>
</tbody>
</table>
ScanSnap Manager Icon

When ScanSnap Manager is running, the ScanSnap Manager icon is displayed in the notification area. The notification area is located at the far right of the taskbar. The ScanSnap Manager icon indicates whether or not ScanSnap Manager is successfully communicating with the ScanSnap. The appearance of the icon changes according to the communication status as shown below.

<table>
<thead>
<tr>
<th>Communication Status</th>
<th>ScanSnap Manager Icon</th>
</tr>
</thead>
<tbody>
<tr>
<td>Communicating</td>
<td><img src="image" alt="Icon" /> When the ScanSnap is connected to a computer with a USB cable</td>
</tr>
<tr>
<td></td>
<td><img src="image" alt="Icon" /> When the ScanSnap is connected to a computer via wireless LAN</td>
</tr>
<tr>
<td>Not communicating</td>
<td><img src="image" alt="Icon" /> When the ScanSnap is connected to a mobile device via wireless LAN</td>
</tr>
</tbody>
</table>

**HINT**

Turn the ScanSnap on to begin communication between ScanSnap Manager and the ScanSnap. For details about how to turn on the ScanSnap, refer to “Turning the ScanSnap On” (page 49).

You can display the menu for scanning documents and ScanSnap Manager settings from the ScanSnap Manager icon.

- Right-clicking
  - Displays the "Right-Click Menu" (page 45).
- Left-clicking
  - Displays the Left-Click Menu.
  - For details, refer to the Advanced Operation Guide.
Right-Click Menu

This menu appears when you right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar.

</tbody>
</table>
When you right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar, and select [Scan Button Settings] from the “Right-Click Menu” (page 45), the following ScanSnap setup window appears.

In the ScanSnap setup window, you can use the [Use Quick Menu] checkbox to specify whether or not to use the Quick Menu. You can also use the profile buttons and detail setting tabs to specify scan settings according to your scanning needs.

For details, refer to the ScanSnap Manager Help.
Turning the ScanSnap On or Off

This section explains how to turn the ScanSnap on or off and how to check the remaining battery power.

- "Turning the ScanSnap On" (page 49)
- "Turning the ScanSnap Off" (page 51)
- "Sleep Mode" (page 52)
- "Automatic Power OFF" (page 53)
- "Checking the Remaining Battery Power" (page 54)
Turning the ScanSnap On

1. Turn on the computer.

   **HINT**
   If you connect the ScanSnap and a mobile device via a wireless LAN and then scan a document, you do not have to turn on the computer.

   - The computer starts up and the ScanSnap Manager icon 🖫 appears in the notification area located at the far right of the taskbar.

   **HINT**
   - If the ScanSnap Manager icon 🖫 is not displayed in the notification area, select [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Manager] to start up ScanSnap Manager (for Windows 8.1/Windows 8, select [ScanSnap Manager] under [ScanSnap Manager] on the All apps screen to start up ScanSnap Manager).
   - If ScanSnap Manager does not automatically start when you log on to your computer, change the setting in the following procedure:

     1. Right-click the ScanSnap Manager icon 🖫 in the notification area and select [Preferences] from the "Right-Click Menu" (page 45).

     - The [ScanSnap Manager - Preferences] window appears.

     2. In the [Auto Startup] tab, select the [Start up ScanSnap Manager when you log on] checkbox.

2. Open the feed guide of the ScanSnap to turn the power on.

   **Example: When a USB Cable is Used for Connection**

   - The [Scan/Stop] button flashes in blue. The button returns to being lit normally when document scanning is enabled.

   In addition, the ScanSnap Manager icon in the notification area changes from 🖫 to 🖫.

   **ATTENTION**
   With some computers, the initialization of the ScanSnap may be performed several times when the computer is started up.
HINT

- It may take more time for the ScanSnap Manager icon in the notification area to change to depending on computer performance, operating environment, or loading, for example, when many software programs are running at the same time.
- When the ScanSnap is turned on, a pop-up balloon notifies you of the ScanSnap's communication status.

To disable notifications of the ScanSnap's communication status, change the setting in the following procedure:

1. Right-click the ScanSnap Manager icon in the notification area and select [Preferences] from the "Right-Click Menu" (page 45).
   - The [ScanSnap Manager - Preferences] window appears.

2. Clear the [Notify of the communication status] checkbox in the [Status Display] list.

![iX100 is ready to scan](image)
Turning the ScanSnap Off

1. Close the feed guide.

   ![Image of ScanSnap]

   Example: When a USB Cable is Used for Connection

   ✤ The [Scan/Stop] button turns off.

   In addition, the ScanSnap Manager icon in the notification area changes from 🔄 to 🏷.

   **ATTENTION**

   If moving the ScanSnap, first turn the power off and remove all cables.

**HINT**

- If the Wi-Fi switch is off, the power of the ScanSnap and the computer operate together. If you keep the ScanSnap connected to the computer, you do not have to worry about turning the power ON/OFF.

- With some computers, it may take 2 to 3 minutes until the light of the [Scan] button goes out after the computer is turned off.

- When the ScanSnap is turned off, a pop-up balloon notifies you of the ScanSnap's communication status.

   To disable notifications of the ScanSnap's communication status, change the setting in the following procedure:

1. Right-click the ScanSnap Manager icon 🔄 in the notification area and select [Preferences] from the "Right-Click Menu" (page 45).
   ✤ The [ScanSnap Manager - Preferences] window appears.

2. Clear the [Notify of the communication status] checkbox in the [Status Display] list.
Sleep Mode

When the ScanSnap is on and has not been used for one minute, it enters sleep (power saving) mode.
Automatic Power OFF

When the ScanSnap connected with a USB cable is turned on and left unused for the specified time (default is "4 hours"), it will turn itself off automatically.

When iX100 powered by a battery is turned on and left unused for the specified time (default is "5 minutes"), it will turn itself off automatically.

To turn the ScanSnap back on, perform one of the following operations:

- Press the [Scan/Stop] button on the ScanSnap
- Close the feed guide and open it again

HINT

- To continue using the ScanSnap, reset the time until auto power-off by performing one of the following:
  - Load a document in the ScanSnap
  - Press the [Scan/Stop] button on the ScanSnap
  - Close the feed guide and open it again
- You can change the time of the ScanSnap to turn off automatically or change the setting so that it will not turn off automatically. Set according to the following procedures:
  1. Right-click the ScanSnap Manager icon in the notification area and select [Preferences] from the "Right-Click Menu" (page 45).
     - The [ScanSnap Manager - Preferences] window appears.
  2. In the [Power] list, change the settings for [Power setting] based on how it is connected.
- When a USB cable is used for connection, a pop-up balloon notifies you 5 minutes before the ScanSnap turns off automatically.

- When the ScanSnap is powered by the battery, a pop-up balloon notifies you after the ScanSnap turns off automatically.
Checking the Remaining Battery Power

The ScanSnap has a battery.

To check the remaining battery power, right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar, and check [Battery] in the "Right-Click Menu" (page 45).

HINT

- The remaining battery power can be checked also in the [ScanSnap Manager - Scanner and driver information] window.
  To open the [ScanSnap Manager - Scanner and driver information] window, select [ScanSnap information] in the "Right-Click Menu" (page 45).
- If the remaining battery power is 10% or less, a pop-up balloon notifies you of the status.

- If no battery power remains and the ScanSnap is turned off, a pop-up balloon notifies you of the status.
Connecting the ScanSnap via Wireless LAN

By connecting the ScanSnap to a computer or a mobile device via wireless LAN, you can scan documents.

Select one of the following wireless modes to connect the ScanSnap to the computer or mobile device.

- **Access Point Connect mode**
  
  When a wireless LAN environment has already been configured, the ScanSnap and the computer or mobile device are connected via a wireless access point.

- **Direct Connect mode**
  
  When a wireless LAN environment has not been configured, the ScanSnap and the computer or mobile device are connected directly via wireless LAN.

The wireless mode automatically switches to the mode in accordance with the wireless LAN environment in which the ScanSnap is used.

When the ScanSnap is turned on, it is connected to the wireless access point that was set in the ScanSnap Wireless Setup Tool. If no wireless access point is detected, the mode is switched to the Direct Connect mode.

**HINT**

- When the wireless access point that was set in the ScanSnap Wireless Setup Tool is detected, even if the wireless access point is not connectable, the mode is not switched from the Access Point Connect mode to the Direct Connect mode.

  To switch the mode to the Direct Connect mode, turn off the ScanSnap and then turn it on again in an environment in which no wireless access point is detected.

- Even if the wireless access point that was set in the ScanSnap Wireless Setup Tool is detected after the mode is switched to the Direct Connect mode, the mode is still not switched to the Access Point Connect mode.

  To connect the ScanSnap in Access Point Connect mode, turn off the ScanSnap and then turn it on again.

For details about how to switch the wireless mode and how to set the wireless mode, refer to the ScanSnap Wireless Setup Tool Help.

- "Preparation" (page 56)
- "Setting a Wireless LAN Using the ScanSnap Wireless Setup Tool" (page 57)
- "Connecting a Computer in Access Point Connect Mode" (page 58)
- "Connecting a Mobile Device in Access Point Connect Mode" (page 60)
- "Connecting a Computer in Direct Connect Mode" (page 61)
- "Connecting a Mobile Device in Direct Connect Mode" (page 63)
- "Reconnecting to a Wireless Access Point Using the ScanSnap WPS Button" (page 64)
Preparation

To connect the ScanSnap via wireless LAN, prepare the following:

- An environment in which a wireless LAN is available
  
  To connect the ScanSnap and a computer or a mobile device in Access Point Connect mode, prepare the wireless LAN environment.
  
  When connecting the ScanSnap to a wireless access point, you may need information such as an SSID (network name) and a security key (password).
  
  For details, refer to the manual for the wireless access point.

```
ATTENTION
Do not place the following within 100 mm (3.9 in.) of the ScanSnap, or near your wireless access point.
- Obstacles that block radio waves (such as walls and metal plates)
- Devices that may cause signal interference (such as microwaves and cordless phones) and wireless devices
```

- ScanSnap Connect Application
  
  To connect the ScanSnap and a mobile device, you need to install ScanSnap Connect Application on your mobile device.
  
  Download ScanSnap Connect Application for the mobile device from the following application stores:
  - iTunes
  - App Store
  - Google Play
  - Amazon Appstore
Setting a Wireless LAN Using the ScanSnap Wireless Setup Tool

The ScanSnap Wireless Setup Tool is an application to configure the wireless settings required for connecting your ScanSnap via wireless LAN in a wizard format. The ScanSnap Wireless Setup Tool can be used to configure and check the following wireless LAN settings and connection.

- Connecting the ScanSnap to a wireless access point
- Registering the computer that will be connected to the ScanSnap via wireless LAN
- Setting the IP address, name, and password for the ScanSnap
- Checking the connection between the ScanSnap and the computer
- Checking the connection between the ScanSnap and the mobile device

Follow the procedure below to start the ScanSnap Wireless Setup Tool and configure the wireless settings.

1. Select [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Wireless Setup Tool] (for Windows 8.1 or Windows 8, select [ScanSnap Manager] → [ScanSnap Wireless Setup Tool] on the All apps screen).
   ➤ The ScanSnap Wireless Setup Tool will start running.

2. Click the [Wireless Network Setup Wizard] button in the main menu.
   ➤ The Wireless Network Setup Wizard appears.

3. Follow the instructions in the Wireless Network Setup Wizard to configure the wireless settings.
   Configure and check the wireless settings based on the wireless LAN environment in which the ScanSnap is used.

**HINT**

- For details and operation of ScanSnap Wireless Setup Tool, refer to the ScanSnap Wireless Setup Tool Help.
- The ScanSnap Wireless Setup Tool is also started up when the ScanSnap software is installed.
Connecting a Computer in Access Point Connect Mode

By using the ScanSnap Wireless Setup Tool Wizard, you can configure and check the connection between the ScanSnap and a computer.

For details, refer to "Setting a Wireless LAN Using the ScanSnap Wireless Setup Tool" (page 57).

The following explains how to connect the ScanSnap and a computer when the wireless settings have already been configured by using the ScanSnap Wireless Setup Tool Wizard.

1. Disconnect the USB cable connecting the ScanSnap to the computer.

   ATTENTION
   
   If the ScanSnap Manager icon is , exit ScanSnap Connect Application on the mobile device.

   The ScanSnap is automatically connected to a computer via wireless LAN and the ScanSnap Manager icon changes to .
   
   If the icon does not change, go to step 2.

   HINT
   
   - If the [Connect automatically to previous ScanSnap by Wi-Fi] checkbox is selected and the previously connected ScanSnap is available for the connection, the computer is connected to the ScanSnap automatically.
   - The computer can be connected to only one ScanSnap.
   - Only one computer can be connected to the ScanSnap via wireless LAN.
   - When you use automatic connection for the ScanSnap that had been connected with a wireless LAN before, if the password for the ScanSnap to be connected is changed, a pop-up balloon notifies you of the status.

2. Right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar and select [Connect by Wi-Fi] from the "Right-Click Menu" (page 45).

   The [ScanSnap Manager - Connect by Wi-Fi] window appears.

3. From the list of the ScanSnap units to be connected, select the ScanSnap that you want to connect, and click the [Connect] button.

   ATTENTION
   
   - If the [ScanSnap Manager - Enter Destination Password] window appears, enter the password to connect.

   The default password is the last four digits of the ScanSnap serial number.
The password can be changed with the ScanSnap Wireless Setup Tool. For details, refer to the ScanSnap Wireless Setup Tool Help.

- If the intended ScanSnap for connection does not appear in the list of the ScanSnap units to be connected, refer to the ScanSnap Manager Help.

⚠️ The ScanSnap is connected to the computer via wireless LAN and the ScanSnap Manager icon changes to 📱.

**HINT**

When the ScanSnap and a computer are connected via wireless LAN, a pop-up balloon notifies you of the communication status.

![iX100-xxxxxx ready to scan](image)
Connecting a Mobile Device in Access Point Connect Mode

By using the ScanSnap Wireless Setup Tool Wizard, you can configure and check the connection between the ScanSnap and a mobile device.

For details, refer to "Setting a Wireless LAN Using the ScanSnap Wireless Setup Tool" (page 57).

The following explains how to connect the ScanSnap and a mobile device when the wireless settings have already been configured by using the ScanSnap Wireless Setup Tool Wizard.

1. **Start ScanSnap Connect Application on your mobile device.**
   - The mobile device will automatically be connected to an available ScanSnap on the same network.

   **HINT**
   - If more than one available ScanSnap is detected when ScanSnap Connect Application is set for a mobile device not to be connected to a ScanSnap automatically, tap the name of the scanner that you want to connect the mobile device to under [Scanner] on the [Connect to] screen. For details, refer to the ScanSnap Connect Application User's Guide for your mobile device.
   - When the ScanSnap and a mobile device are connected via wireless LAN, communication with ScanSnap Manager is disconnected, and the pop-up balloon notifies you of the communication status.

   ![Connection of iX100 has been switched to the mobile device]

   ![iX100 is being used by a mobile device]

   - With the ScanSnap and the mobile device already connected via wireless LAN, when you log onto the computer which is connected to the ScanSnap, a pop-up balloon notifies you of the status.
Connecting a Computer in Direct Connect Mode

By using the ScanSnap Wireless Setup Tool Wizard, you can configure and check the connection between the ScanSnap and a computer.

For details, refer to "Setting a Wireless LAN Using the ScanSnap Wireless Setup Tool" (page 57).

The following explains how to connect the ScanSnap and a computer when the computer to be connected has already been registered by using the ScanSnap Wireless Setup Tool Wizard.

1. **Click** in the notification area located at the far right of the taskbar, and connect the following network displayed in the wireless network list.

   The network name (SSID) and the security key are printed on the label attached to the bottom of the scanner.

   **HINT**
   The network name (SSID) and the security key can be checked or changed with the ScanSnap Wireless Setup Tool.

2. **Disconnect the USB cable connecting the ScanSnap to the computer.**

   **ATTENTION**
   If the ScanSnap Manager icon is , exit ScanSnap Connect Application on the mobile device.

   The ScanSnap is automatically connected to a computer via wireless LAN and the ScanSnap Manager icon changes to .

   If the icon does not change, go to step 3.

   **HINT**
   ● If the [Connect automatically to previous ScanSnap by Wi-Fi] checkbox is selected and the previously connected ScanSnap is available for the connection, the computer is connected to the ScanSnap automatically.
   ● The computer can be connected to only one ScanSnap.
   ● Only one computer can be connected to the ScanSnap via wireless LAN.
   ● When you use automatic connection for the ScanSnap that had been connected with a wireless LAN before, if the password for the ScanSnap to be connected is changed, a pop-up balloon notifies you of the status.

3. **Right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar and select [Connect by Wi-Fi] from the "Right-Click Menu" (page 45).**
The [ScanSnap Manager - Connect by Wi-Fi] window appears.

4. **From the list of the ScanSnap units to be connected, select the ScanSnap that you want to connect, and click the [Connect] button.**

**ATTENTION**
- If the [ScanSnap Manager - Enter Destination Password] window appears, enter the password to connect.
  The default password is the last four digits of the ScanSnap serial number.
  The password can be changed with the ScanSnap Wireless Setup Tool. For details, refer to the ScanSnap Wireless Setup Tool Help.
- If the intended ScanSnap for connection does not appear in the list of the ScanSnap units to be connected, refer to the ScanSnap Manager Help.

The ScanSnap is connected to the computer via a wireless access point and the ScanSnap Manager icon changes to 📦.

**HINT**
When the ScanSnap and a computer are connected via wireless LAN, a pop-up balloon notifies you of the communication status.

![ScanSnap Manager icon]
Connecting a Mobile Device in Direct Connect Mode

When you connect a mobile device to the ScanSnap in Direct Connect mode, you do not need to configure settings in the ScanSnap Wireless Setup Tool. For details, refer to the ScanSnap Connect Application User's Guide.
Reconnecting to a Wireless Access Point Using the ScanSnap WPS Button

If the Wi-Fi indicator lights up or flashes in orange, reconnect the ScanSnap to a WPS compatible wireless access point. The reconnection can be established easily by pressing the WPS button on the ScanSnap.

**ATTENTION**
Perform the following before you connect using the WPS button.
- If the ScanSnap Wireless Setup Tool is running while the ScanSnap is being connected to the computer with a USB cable, exit the ScanSnap Wireless Setup Tool.
- If scanning is currently being performed from ScanSnap Manager or a mobile device, end the scanning operation.

**HINT**
Button names and operating procedures may differ depending on the wireless access point. For details, refer to the manual for your wireless access point.

1. **Turn on the ScanSnap.**
   For details, refer to "Turning the ScanSnap On" (page 49).

2. **Turn on the Wi-Fi switch on the back of the ScanSnap.**
   ![Wi-Fi Switch](image)
   - After blinking blue, the Wi-Fi indicator lights up in blue or orange.

3. **Press the WPS button of the wireless access point.**
4. **Press and hold (3 seconds or longer) the WPS button on the back of the ScanSnap within 2 minutes after pressing the WPS button of the wireless access point.**

![WPS Button](image)

- The ScanSnap is connected to the wireless access point and the Wi-Fi indicator lights up in blue.

  If connection cannot be established, the Wi-Fi indicator blinks or lights up in orange.

**ATTENTION**

If you cannot connect the ScanSnap to a wireless access point, refer to "Troubleshooting" in the ScanSnap Manager Help.

**HINT**

For details about the Wi-Fi indicator status, refer to "Parts and Functions" (page 36).
Documents to Scan

This section explains about the conditions for documents that can be loaded directly into the ScanSnap and the conditions for documents that can be scanned using the Carrier Sheet.

- "Documents That Can Be Loaded Directly into the ScanSnap" (page 67)
- "Documents That Can Be Scanned Using the Carrier Sheet" (page 69)
Documents That Can Be Loaded Directly into the ScanSnap

Conditions for documents that can be loaded directly into the ScanSnap are as follows:

<table>
<thead>
<tr>
<th>Eject method (*1)</th>
<th>With the output guide closed</th>
<th>With the output guide open</th>
</tr>
</thead>
<tbody>
<tr>
<td>Document type</td>
<td>Office paper, postcards, business cards</td>
<td></td>
</tr>
</tbody>
</table>

Plastic cards conforming to the ISO7810 ID-1 type (54 × 86 mm/3.37 × 2.13 in.) (*2)

<table>
<thead>
<tr>
<th>Paper weight</th>
<th>52.3 to 209.3 g/m² (14 to 56.1 lb)</th>
</tr>
</thead>
<tbody>
<tr>
<td>When merging scanned images automatically (*3)</td>
<td>52.3 to 104.7 g/m² (14 to 28 lb)</td>
</tr>
</tbody>
</table>

Plastic cards

0.76 mm (0.03 in.) or less (embossed cards can be used)

<table>
<thead>
<tr>
<th>Paper size</th>
<th>Width</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>25.4 to 216 mm (1 to 8.5 in.)</td>
</tr>
<tr>
<td></td>
<td>For a dual scan, a total width of 200 mm (7.87 in.) or less for two documents</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th></th>
<th>Length</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>25.4 to 360 mm (1 to 14.17 in.)</td>
</tr>
<tr>
<td></td>
<td>For long page documents, up to 863 mm (34 in.)</td>
</tr>
</tbody>
</table>

When merging scanned images automatically (*3)

- A3 (297 × 420 mm)
- B4 (257 × 364 mm)
- Double Letter (11 × 17 in. (279.4 × 432 mm))

*1: For details about the eject methods, refer to "Parts and Functions" (page 36).

*2: A dual scan cannot be used for plastic cards.

*3: Fold in half to scan.

**ATTENTION**

- The following types of documents must not be scanned:
  - Documents attached with the metals such as paper clips or staples that can damage the inside of the ScanSnap
    Remove the metals for scanning.
  - Documents on which the ink is still wet
    Wait until the ink dries completely to scan these documents.
  - Documents larger than 216 × 863 (mm)/8.5 × 34 (in.) (width × length)
  - Documents other than paper such as fabric, metal foil and OHP film
  - When you scan picture postcards, be aware that the picture side may get damaged. It is the responsibility of the customer to scan picture postcards.
  - Be careful of the following when you scan plastic cards:
    - Cards that are bent may not be fed properly.
    - If the surface of the card is dirty with grease marks such as fingerprints, perform scanning after wiping the dirt off.
- Insert the plastic card straight into the feeding section of the ScanSnap. Do not tilt the plastic card when you insert it because the plastic card may not be fed properly.

- When you scan plastic cards with strong luster, some parts of the image may appear lighter or darker than the original.

  Example: gold colored credit card

- When you scan an embossed card, insert it in the direction shown below.

- If the embossed characters are not coated in gold or silver and the background color of the card and the color of the embossed characters are similar, it may be difficult for the ScanSnap to recognize embossed characters.

  In which case, performing the following may result in an improvement.

  1. Click the [Option] button in the [Scanning] tab of the "ScanSnap Setup Window" (page 47).
     - The [Scanning mode option] window appears.

  2. Select the [Increase text contrast] checkbox.
Documents That Can Be Scanned Using the Carrier Sheet

The optional Carrier Sheet is a sheet designed to transport documents through the ScanSnap. You can scan documents that are larger than A4/Letter size, photographs, and clippings. Conditions for documents that can be scanned using the Carrier Sheet are as follows:

- Do not use a damaged Carrier Sheet. Otherwise, it may damage or cause the ScanSnap to malfunction.
- Be careful not to cut your finger on the edge of the Carrier Sheet.

<table>
<thead>
<tr>
<th>Eject method</th>
<th>With the output guide closed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Document type</td>
<td>Documents that cannot be loaded directly into the ScanSnap</td>
</tr>
<tr>
<td>Paper weight</td>
<td>Up to 52.3 to 209.3 g/m² (14 to 56 lb)</td>
</tr>
<tr>
<td>When scanning documents folded in half:</td>
<td>Up to 104.7 g/m² (28 lb)</td>
</tr>
<tr>
<td>Paper size</td>
<td>Carrier Sheet size (216 × 297 mm)</td>
</tr>
<tr>
<td></td>
<td>A3 (297 × 420 mm) (*1)</td>
</tr>
<tr>
<td></td>
<td>A4 (210 × 297 mm)</td>
</tr>
<tr>
<td></td>
<td>A5 (148 × 210 mm)</td>
</tr>
<tr>
<td></td>
<td>A6 (105 × 148 mm)</td>
</tr>
<tr>
<td></td>
<td>B4 (257 × 364 mm) (*1)</td>
</tr>
<tr>

</tr>
<tr>
<td>Custom size</td>
<td>Width: 25.4 to 216 mm (1 to 8.5 in.)</td>
</tr>
<tr>
<td></td>
<td>Length: 25.4 to 297 mm (1 to 11.69 in.)</td>
</tr>
</tbody>
</table>

*1: Fold in half to scan.

Documents for Which the Carrier Sheet is Recommended for Scanning

It is recommended that you use the Carrier Sheet to scan the following documents.

- Documents written in pencil
  Because there may be black traces left on the documents, it is recommended that you use the Carrier Sheet to scan such documents.
  When you scan such documents directly without using a Carrier Sheet, dirt will accumulate on the rollers, which may cause feeding errors. Clean the rollers occasionally.
  For details about how to perform cleaning, refer to "Cleaning the Inside of the ScanSnap" (page 112).
- Carbonless paper
Because carbonless paper may contain chemicals that can harm the ScanSnap internal rollers, it is recommended that you use the Carrier Sheet to scan such documents.

Make sure to clean the rollers occasionally to maintain the scanner performance when scanning carbonless paper directly without using the Carrier Sheet. For details about how to perform cleaning, refer to "Cleaning the Inside of the ScanSnap" (page 112).

Depending on the type of carbonless paper, the life span of the scanner may be shortened compared to scanning office paper.

- Scanning the following types of documents without using the Carrier Sheet can result in documents being damaged or scanned incorrectly
  - Documents smaller than 25.4 × 25.4 (mm)/1 × 1 (in.) (width × length)
  - Documents whose paper weight is less than 52.3 g/m² (14 lb)
  - Documents with an uneven surface (such as envelopes and paper sheets with attached materials)
  - Wrinkled or curled documents
  - Folded or torn documents
  - Tracing paper
  - Coated paper
  - Photographs (photographic paper)
  - Perforated or punched documents
  - Documents that are not rectangular or square
  - Carbon paper or thermal paper
  - Documents with memo papers or sticky notes attached

ATTENTION

- Using the Carrier Sheet
  - Be careful of the following when you use the Carrier Sheet:
    - Do not stain, or cut the end with a black & white pattern. Otherwise, the Carrier Sheet will not be recognized properly.
    - Do not place the Carrier Sheet upside down. Otherwise, a paper jam may occur and damage the Carrier Sheet and the document inside.
    - Do not fold or pull the Carrier Sheet.
    - Paper jams may occur when several small size documents such as photographs and postcards are placed inside the Carrier Sheet to be scanned at once. It is recommended that you scan such documents one at a time.

- Storing the Carrier Sheet
  - Be careful of the following when you store the Carrier Sheet:
    - Do not leave your document inside the Carrier Sheet for a long time. Otherwise, the ink on the document may be transferred onto the Carrier Sheet.
    - Do not leave the Carrier Sheet in high temperature places such as under direct sunlight or near a heating apparatus for a long time. Also, do not use the Carrier Sheet in high temperature places. The Carrier Sheet may be deformed.
    - To avoid deformation, store the Carrier Sheet on a flat surface without any weight on it.
Using the ScanSnap According to Your Needs

This section explains how to scan a document and link with a bundled application according to your needs when using the ScanSnap.

- "Managing Business Forms in ScanSnap Organizer" (page 72)
- "Saving Business Cards in CardMinder" (page 75)
Managing Business Forms in ScanSnap Organizer

This section explains how to digitize business forms such as quotation sheets and manage the data for each customer company in ScanSnap Organizer.

1. **Scan a quotation sheet with the ScanSnap.**
   For details about scanning a document, refer to "Scanning a Document" (page 20).
   ⇒ The Quick Menu appears.

2. **Click the [ScanSnap Organizer] icon** in the Quick Menu.
   ⇒ The [ScanSnap Organizer] window appears.
3. Click on the [Home] tab.  
   A new cabinet is created in the folder list.

4. Rename the created cabinet to the customer company name.

   **HINT**
   To create multiple cabinets for each customer company, repeat steps 3 to 4.

5. Select the scanned image of the quotation sheet from the file list, and drag and drop it to the cabinet for the customer company.
The scanned image of the quotation sheet is moved to the cabinet for the customer company.

HINT
ScanSnap Organizer has various functions for using saved files.
For details, refer to the ScanSnap Organizer Help.
Saving Business Cards in CardMinder

This section explains how to digitize business cards and save the card data in CardMinder.

ATTENTION

If you do not log on as a user with Administrator privileges, you may not be able to link the ScanSnap with another application properly.

1. **Scan business cards with the ScanSnap.**
   For details about scanning business cards, refer to the following.
   - "Scanning a Document" (page 20)
   - "Scanning Documents with the ScanSnap by Inserting Two Documents at a Time or by Inserting the Next Document While the Current Document Is Being Scanned" (page 25)
   ➔ The Quick Menu appears.

2. **Click the [Scan to CardMinder] icon** in the Quick Menu.
   ➔ The [CardMinder] window appears.
3. **Check the card data.**

Make sure that the text on the card images are displayed correctly in the Edit Data pane. If the card data must be corrected, click the text to be corrected and then directly edit it.

**HINT**

When you scan double-sided business cards, you must scan one side of each card and edit the card data in CardMinder.

For details, refer to the CardMinder Help.
Useful Usages

This section explains how to use the Carrier Sheet to scan documents that are larger than A4/Letter size or documents such as photographs and clippings that can be damaged quite easily.

- "Scanning Documents Larger Than A4 or Letter Size (with the Carrier Sheet)" (page 78)
- "Scanning Documents Such as Photographs and Clippings" (page 83)
Scanning Documents Larger Than A4 or Letter Size (with the Carrier Sheet)

Documents larger than A4/Letter size (such as A3, 11 × 17 in. and B4) can be scanned with the optional Carrier Sheet. By folding the document in half and scanning both sides, one at a time, the two sides are merged into a single image.

For details about documents that can be loaded, refer to "Documents That Can Be Scanned Using the Carrier Sheet" (page 69).

**ATTENTION**

The [Deskew by text on document] checkbox in the [Scanning mode option] window will be disabled. To open the [Scanning mode option] window, click the [Option] button in the [Scanning] tab of the "ScanSnap Setup Window" (page 47).

**HINT**

Both sides of a double-sided A4/Letter size document or smaller can also be scanned and merged into a single image.

1. Right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar, and select the [Scan Button Settings] from the "Right-Click Menu" (page 45).
   - The ScanSnap setup window appears.

2. In the [Paper] tab, select [Automatic detection] in [Paper size], and then click the [Carrier Sheet Settings] button.
   - The [Carrier Sheet Settings] window appears.

3. Select [one double-page spread image] in [Save as] and click the [OK] button.
   - For details, refer to the ScanSnap Manager Help.
4. Click the [OK] button to close the ScanSnap setup window.

5. Place the document inside the Carrier Sheet.
   1. Fold the document in half so that the sides to be scanned are facing out.
      Fold it tightly and smooth out any creases.

   2. Open the Carrier Sheet to bind the document.
      Align the fold line with the right edge of the Carrier Sheet so that the document fits in the upper right-hand corner of the Carrier Sheet.
6. Insert the part with the black and white pattern straight into the feeding section of the ScanSnap, with the front side of the Carrier Sheet facing up.

![Inserting Carrier Sheet]

The Carrier Sheet is pulled in until it is set inside the ScanSnap.

**HINT**
Note that the front side of the Carrier Sheet has a black and white pattern at the top and a thick vertical line in the upper right-hand corner.

7. Press the [Scan/Stop] button on the ScanSnap to start scanning.

- Scanning starts and the [ScanSnap Manager - Image scanning and file saving] window appears. When the front side of the Carrier Sheet is scanned, the scanned image is displayed in the preview area.

**HINT**
If you perform a scan using the Carrier Sheet with the output guide open, a paper jam may occur and damage the documents. Make sure to close the output guide when you perform a scan using the Carrier Sheet.

Output Guide
8. Turn over the Carrier Sheet and insert it as described in step 6.

**ATTENTION**
Make sure to scan the front and back side of the Carrier Sheet consecutively.

- Scanning starts automatically and the [ScanSnap Manager - Image scanning and file saving] window appears. When scanning is completed, scanned images of the front and back side of the document inside the Carrier Sheet are displayed as a double-page spread image in the preview area.

**HINT**
Repeat steps 5 to 8 to scan more documents larger than A4/Letter size. You can continue to scan documents that can be inserted directly in the ScanSnap.
For details about scanning a document, refer to "Scanning a Document" (page 20).

9. Press the [Scan/Stop] button on the ScanSnap to finish scanning.
- The scanned images of the front and back sides of the document are saved as a double-page spread image.
ATTENTION

- There may be a line or a gap appearing between the front and back side images. Also when you scan a thick document in the Carrier Sheet, the scanned image on the left and the scanned image on the right of a double-page spread image may skew towards each other from the top.

These symptoms may be improved when you place the document in the Carrier Sheet as follows:
- Fold the document properly
- Neatly align the edges of the document with the edges of the Carrier Sheet
- Turn over the Carrier Sheet to the other (reverse) side

- If [Automatic detection] is specified for [Paper size] in the [Carrier Sheet Settings] window, an optimal size will be selected automatically from the available standard sizes (A3, B4, or 11 x 17 in.) in [Paper size]. Note that the size of the image may become smaller than the original document depending on the document.

Example: When characters and illustrations are printed to fit in A4 size in the center of an A3 size document, the scanned image is output in B4 size.

To output the scanned image in its original size, specify the document size in [Paper size].

- Part of the scanned image around where the document is folded may appear missing. In that case, place the document so that its edge is about 1 mm (0.04 in.) inside from the edge of the Carrier Sheet.
Scanning Documents Such as Photographs and Clippings

Using the optional Carrier Sheet allows you to scan documents that can be damaged quite easily such as photographs, or non-standard size documents that are difficult to load directly such as clippings.

For details about documents that can be loaded, refer to "Documents That Can Be Scanned Using the Carrier Sheet" (page 69).

ATTENTION

The [Deskew by text on document] checkbox in the [Scanning mode option] window will be disabled.
To open the [Scanning mode option] window, click the [Option] button in the [Scanning] tab of the "ScanSnap Setup Window" (page 47).

1. Right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar, and select the [Scan Button Settings] from the "Right-Click Menu" (page 45).
   ⇒ The ScanSnap setup window appears.

2. In the [Paper] tab, select [Automatic detection] in [Paper size], and then click the [Carrier Sheet Settings] button.

   ⇒ The [Carrier Sheet Settings] window appears.

3. Select [two separate images (front and back)] in [Save as] and click the [OK] button.
   For details, refer to the ScanSnap Manager Help.
4. Click the [OK] button to close the ScanSnap setup window.

5. Place the document inside the Carrier Sheet.
   Open the Carrier Sheet and place the top of the document against the top center of the Carrier Sheet.

6. Insert the part with the black and white pattern straight into the feeding section of the ScanSnap, with the scanning side of the document inside the Carrier Sheet facing up.
The Carrier Sheet is pulled in until it is set inside the ScanSnap.

**ATTENTION**
If you perform a scan using the Carrier Sheet with the output guide open, a paper jam may occur and damage the documents. Make sure to close the output guide when you perform a scan using the Carrier Sheet.

Output Guide

7. **Press the [Scan/Stop] button on the ScanSnap to start scanning.**

   When scanning is complete, the scanned image of the document that is inside the Carrier Sheet is displayed in the preview area.

**HINT**
Repeat steps 5 to 7 to scan more documents such as photographs and clippings. You can continue to scan documents that can be inserted directly in the ScanSnap. For details about scanning a document, refer to "Scanning a Document" (page 20).
8. Press the [Scan/Stop] button on the ScanSnap to finish scanning.

The scanned image is saved.

**ATTENTION**

- The scanned image is output at the center of the page in the size specified for [Paper size] in the [Carrier Sheet Settings] window.
- If [Automatic detection] is specified for [Paper size] in the [Carrier Sheet Settings] window, an optimal size will be selected automatically from the available standard sizes (A3, B4, or 11 × 17 in.) in [Paper size]. Note that the size of the image may become smaller than the original document depending on the document scanned, or part of the image may appear missing.

Example: When the contents are printed to fit in A5 size in the center of an A4 size document, the scanned image is output in A5 size.

To output the scanned image in its original size, specify the document size in [Paper size].

**HINT**

In the following cases, place a blank (white) sheet of paper underneath the document when scanning:

- The scanned image is not saved in the correct size (when [Automatic detection] is selected for [Paper size] in the [Carrier Sheet Settings] window)
- Shadows appear around the edges of the scanned image
- Black lines appear around the edges of a uniquely shaped cutting
Troubleshooting

This section explains how to solve troubles you may encounter upon installing or uninstalling the bundled software.

- "How to Find Your Solution" (page 88)
- "If Your First Attempt to Install Failed" (page 89)
- "If You Have Installed the Software Before" (page 90)
- "When the ScanSnap Manager Icon Does Not Appear" (page 98)
- "When ScanSnap Manager Does Not Operate Normally" (page 100)
- "When You Cannot Uninstall the Software" (page 108)

For details about the troubles you may encounter and the solutions while using the ScanSnap, refer to the following:

- "Troubleshooting" in the ScanSnap Manager Help

To display this section, right-click the ScanSnap Manager icon in the notification area, and select [Help] → [Troubleshooting] from the "Right-Click Menu" (page 45).

- ScanSnap Support Site (http://scansnap.fujitsu.com/g-support/en/)

If you cannot solve the problem after referring to the above section, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.
How to Find Your Solution

When software installation fails, or the ScanSnap does not operate normally after installation is complete, refer to the flow chart below for troubleshooting.

Yes

No

1. Have you installed the software before?

2. Is the installation complete?

3. Does the ScanSnap Manager icon 📦 appear in the notification area?

4. Topic to Be Referred to

<table>
<thead>
<tr>
<th>No.</th>
<th>Topic to Be Referred to</th>

<td>&quot;When ScanSnap Manager Does Not Operate Normally&quot; (page 100)</td>
</tr>
</tbody>
</table>
If Your First Attempt to Install Failed

This section explains how to troubleshoot when the first attempt to install the bundled software failed.

If any software bundled with the ScanSnap (including models other than iX100) has been installed before, refer to "If You Have Installed the Software Before" (page 90).

1. Restart the computer and log on as a user with Administrator privileges.

2. Reinstall the software.
   For details, refer to "How to Install the Software" (page 43).
If You Have Installed the Software Before

This section explains how to troubleshoot if your attempt to reinstall the software bundled with the ScanSnap (including models other than iX100) failed.

- "Uninstalling the Software" (page 91)
- "Removing the Installation Information" (page 92)
- "Installing the Software from the [ScanSnap Setup] Window" (page 96)
- "Installing One Software at a Time" (page 97)
Uninstalling the Software

Uninstall the software that is already installed.
The uninstallation procedure is as follows.

1. **If the ScanSnap is connected to the computer, unplug the USB cable from the computer.**

2. **Log on as a user with Administrator privileges.**

3. **If anti-virus software is running, disable the software temporarily.**
   
   **ATTENTION**
   
   If you cannot disable the anti-virus software, check if the software is set to lock the application.

4. **Uninstall the software.**
   
   The following software programs must be uninstalled:
   - ScanSnap Manager
   - ScanSnap Organizer
   - CardMinder
   
   For details, refer to "Uninstalling the Software" (page 117).

---

- If the software was successfully uninstalled, proceed to "Installing the Software from the [ScanSnap Setup] Window" (page 96).
- If the software still remains in the list, proceed to the next topic "Removing the Installation Information" (page 92).
Removing the Installation Information

If the name of the software that you tried to uninstall still remains in the list in [Programs and Features] of the Control Panel, or if the software cannot be uninstalled for some reason, the installation information needs to be removed.

Remove the installation information in the following procedure.

**ATTENTION**

If you cannot successfully remove the installation information, contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider.

1. Log on as a user with Administrator privileges.

2. Insert the Setup DVD-ROM into the DVD-ROM drive.
   - The [ScanSnap Setup] window appears.

3. Click the [Close] button to close the [ScanSnap Setup] window.

4. Start up the tool for removing the installation information.
   1. From Windows Explorer, open the [Tool] folder in the Setup DVD-ROM.
   2. Right-click "SSClean.exe" and select [Run as administrator] from the displayed menu.
      - The [User Account Control] window appears.
   3. Click the [Yes] button ([Continue] button in Windows Vista).
      - The [Remove Installation Information] window appears.

5. Select the software from which you want to remove the installation information.
   - ScanSnap Manager
     1. Select [ScanSnap Manager] and click the [Remove] button.
A confirmation message appears.

2. Click the [Yes] button.

A message appears to check whether or not to remove the profile information.

3. Click the [Yes] button to remove and the [No] button to keep the profile information.
ATTENTION
If the problem persists when you kept the profile information then reinstalled the software, try again after removing the profile information.

 tabIndex
The installation information is removed, and the following message appears.

4. Click the [OK] button to close the [Remove Installation Information] window.

- ScanSnap Organizer/CardMinder/ScanSnap Online Update
  1. Select [ScanSnap Organizer], [CardMinder], or [ScanSnap Online Update], and click the [Remove] button.

 tabIndex
A confirmation message appears.

2. Click the [Yes] button.
The installation information is removed, and the following message appears.

3. Click the [OK] button to close the [Remove Installation Information] window.

6. By repeating step 5, remove the installation information of all the software listed in the [Remove Installation Information] window.

7. Click the [Close] button to close the [Remove Installation Information] window.

8. Confirm that the installation folder no longer exists.
   
   If the [ScanSnap] folder remains in the following location, rename the folder (such as [-ScanSnap]). This folder can later be deleted once the installation is successfully completed.

   Path: DriveName (such as C):\Program Files\PFU

After completing the procedure, proceed to "Installing the Software from the [ScanSnap Setup] Window" (page 96).
Installing the Software from the [ScanSnap Setup] Window

Once the software is uninstalled or the installation information is removed, install the software from the [ScanSnap Setup] window.

Install the software in the following procedure.

1. **Restart the computer.**

2. **Log on as a user with Administrator privileges.**

3. **If anti-virus software is running, disable the software temporarily.**

   **ATTENTION**
   
   If you cannot disable the anti-virus software, check if the software is set to lock the application.

4. **Install the software.**

   For details, refer to "How to Install the Software" (page 43).

If you did not perform the procedure in "Removing the Installation Information" (page 92) and then failed to install the software, perform the following procedures again:

- "Uninstalling the Software" (page 91)
- "Removing the Installation Information" (page 92)
- "Installing the Software from the [ScanSnap Setup] Window" (page 96)

If you still could not reinstall the software after performing the above procedures, proceed to "Installing One Software at a Time" (page 97).
Installing One Software at a Time

Install the software one by one in the following procedure.

1. **Restart the computer.**

2. **Log on as a user with Administrator privileges.**

3. **If anti-virus software is running, disable the software temporarily.**

   **ATTENTION**
   
   If you cannot disable the anti-virus software, check if the software is set to lock the application.

4. **Insert the Setup DVD-ROM into the DVD-ROM drive.**

   ➔ The [ScanSnap Setup] window appears.

5. **Click the [Close] button to close the [ScanSnap Setup] window.**

6. **Install the software.**

   Open the Setup DVD-ROM from Windows Explorer, and run the "setup.exe" of each software.
   
   - **ScanSnap Manager**
     
     \[DVD-ROM\] drive:\Software\ScanSnap\setup.exe
   
   - **ScanSnap Organizer**
     
     \[DVD-ROM\] drive:\Software\Organizer\setup.exe
   
   - **CardMinder**
     
     \[DVD-ROM\] drive:\Software\Card\setup.exe

   Install one of the software above, and then install the following application.
   
   - **ScanSnap Online Update**
     
     \[DVD-ROM\] drive:\Software\Online Update\Setup.exe

   ➔ The setup window appears.

   Follow the instructions on the screen to continue with the installation.

   If you cannot proceed further because a message appears to indicate that the software is already installed, start over again from the procedure in "Uninstalling the Software" (page 91).

   **ATTENTION**
   
   If the "setup.exe" for a software program is not included in the Setup DVD-ROM, download the installer for the software program from the following web page, then install it.

7. **Restart the computer.**
When the ScanSnap Manager Icon Does Not Appear

This section explains how to troubleshoot when the ScanSnap Manager icon does not appear in the notification area even though the software is installed and the ScanSnap is connected to the computer.

- "Displaying the ScanSnap Manager Icon" (page 99)
Displaying the ScanSnap Manager Icon

1. Start up ScanSnap Manager by selecting [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Manager] (for Windows 8.1/Windows 8, start up ScanSnap Manager by selecting [ScanSnap Manager] under [ScanSnap Manager] on the All apps screen).

   HINT
   If the problem is solved, you can change the setting so that ScanSnap Manager will start up automatically from the next time you log on to the computer. The procedure is as follows.
   
   1. Right-click the ScanSnap Manager icon in the notification area located at the far right of the task bar and select [Preferences] from the "Right-Click Menu" (page 45).
      The [ScanSnap Manager - Preferences] window appears.
   2. In the [Auto Startup] list, select the [Start up ScanSnap Manager when you log on] checkbox.

If the problem persists, refer to "When ScanSnap Manager Does Not Operate Normally" (page 100).
When ScanSnap Manager Does Not Operate Normally

If the ScanSnap Manager icon in the notification area located at the far right of the taskbar is displayed as even though the software is installed and the ScanSnap is connected to the computer, perform the following procedures.

- "Removing Unnecessary Icons from the Notification Area" (page 101)
- "Checking the Connection between the ScanSnap and the Computer" (page 102)
- "Checking If ScanSnap Manager Is Operating Normally" (page 103)
- "Removing the ScanSnap’s Connection Information" (page 106)
Removing Unnecessary Icons from the Notification Area

1. Check the software icons in the notification area, and exit the software that you are not using.
   - The icon is removed from the notification area.

2. Right-click the ScanSnap Manager icon in the notification area and select [Exit] from the "Right-Click Menu" (page 45).

3. Start up ScanSnap Manager by selecting [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Manager] (for Windows 8.1/Windows 8, start up ScanSnap Manager by selecting [ScanSnap Manager] under [ScanSnap Manager] on the All apps screen).

If the problem persists, refer to "Checking the Connection between the ScanSnap and the Computer" (page 102).
Checking the Connection between the ScanSnap and the Computer

1. **Unplug the USB cable from the computer and the ScanSnap, then plug it back in.**
   
   Make sure to leave at least 5 seconds between unplugging and plugging the cable. If you are using a USB hub, connect the USB cable to the computer directly.

   If the problem persists, refer to "Checking If ScanSnap Manager Is Operating Normally" (page 103).
Checking If ScanSnap Manager Is Operating Normally

1. **Turn off the ScanSnap and then turn it on again.**
   Make sure to leave at least 5 seconds between turning off and on the ScanSnap.
   
   If the problem persists, proceed to step 2.

2. **If you are using a USB hub, connect the ScanSnap to the computer directly with a USB cable.**
   
   If the problem persists, proceed to step 3.

3. **If there is more than one USB port on the computer, connect the USB cable to a different USB port.**
   
   If the problem persists, proceed to step 4.

4. **If a USB device other than the ScanSnap is connected to the computer, disconnect it.**
   
   If the problem persists, proceed to step 5.

5. **If anti-virus software is running, disable the software temporarily.**
   
   **ATTENTION**
   If you cannot disable the anti-virus software, check if the software is set to lock the application.
   
   If the problem persists, proceed to step 6.

6. **Check the privileges to access the installation files.**
   1. Select [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Support Tool] (for Windows 8.1/Windows 8, select [ScanSnap Support Tool] under [ScanSnap Manager] on the All apps screen).
      
      The [ScanSnap Support Tool] window appears.
   2. Click the [Check] button on the [Recover] tab, and proceed by following the instructions displayed on the screen.
If the message "The recommended privileges have been applied." appears, turn off the ScanSnap and then turn it on again. Make sure to leave at least 5 seconds between turning off and on the ScanSnap.

If the message "Failed to change the privileges. Uninstall ScanSnap Manager then install it again." appears or the problem still persists, proceed to step 7.

7. **Recover the connection with the ScanSnap.**

1. Select [Start] menu → [All Programs] → [ScanSnap Manager] → [ScanSnap Support Tool] (for Windows 8.1/Windows 8, select [ScanSnap Support Tool] under [ScanSnap Manager] on the All apps screen).
   - The [ScanSnap Support Tool] window appears.

2. Click the [Recover] button on the [Recover] tab, and proceed by following the instructions displayed on the screen.
8. Turn off the ScanSnap and restart the computer.

If the problem persists, refer to "Removing the ScanSnap's Connection Information" (page 106).
Removing the ScanSnap's Connection Information

The ScanSnap might have been connected to the computer before the software was installed. In this case, the ScanSnap's connection information needs to be removed. Remove the ScanSnap's connection information in the following procedure.

1. **Connect the ScanSnap to the computer, and turn on the ScanSnap.**

2. **Open Device Manager.**
   - **Windows 8.1**
     Click on the lower left side of the Start screen → [Control Panel] under [Windows System] → [Hardware and Sound] → [Device Manager].
   - **Windows 8**
     Right-click the Start screen, and select [All apps] on the app bar → [Control Panel] under [Windows System] → [Hardware and Sound] → [Device Manager].
   - **Windows 7**
     Select [Start] menu → [Control Panel] → [Hardware and Sound] → [Device Manager].
   - **Windows Vista**
     Select [Start] menu → [Control Panel] → [System and Maintenance] → [Device Manager].

3. **Select [Imaging devices] and right-click on [ScanSnap iX100] (or [Other devices] → [ScanSnap iX100]), and then select [Uninstall] from the displayed menu.**

4. **If other USB ports have been used to connect to the ScanSnap, perform steps 1 to 3 for each of the ports.**

5. **Turn off the ScanSnap.**

6. **Unplug the USB cable from the computer.**

7. **Restart the computer.**

8. **Connect the USB cable to the computer.**

9. **Turn on the ScanSnap.**
   - The ScanSnap Manager icon appears in the notification area. Make sure that the displayed icon is .

106
If the problem persists, refer to "If You Have Installed the Software Before" (page 90).
If the problem still persists, perform the procedures described in "When ScanSnap Manager Does Not Operate Normally" (page 100) once again.

If the above procedures do not solve the problem, please attach the data of your system information to an email and send it to your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider. For details about how to collect system information, refer to "Troubleshooting" in the ScanSnap Manager Help.
When You Cannot Uninstall the Software

This section explains how to troubleshoot when you cannot uninstall the following software programs:
- ScanSnap Manager
- ScanSnap Organizer
- CardMinder
- ScanSnap Online Update

1. **Restart the computer and log on as a user with Administrator privileges.**

2. **Remove the installation information.**
   - For details, refer to "Removing the Installation Information" (page 92).

3. **Install the software.**
   - For details, refer to "How to Install the Software" (page 43).

4. **Uninstall the software.**
   - For details, refer to "Uninstalling the Software" (page 117).
Cleaning

This section explains about the cleaning materials and how to clean the ScanSnap.

- "Specifications of Cleaning Materials" (page 110)
- "Cleaning the Outside of the ScanSnap" (page 111)
- "Cleaning the Inside of the ScanSnap" (page 112)
- "Cleaning the Carrier Sheet" (page 115)
Specifications of Cleaning Materials

Cleaning materials and their part numbers are as below.

<table>
<thead>
<tr>
<th>Product Name</th>
<th>Part No.</th>
<th>Unit</th>
<th>Note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cleaner F1</td>
<td>PA03950-0352</td>
<td>1 bottle</td>
<td>Size: 100 ml</td>
</tr>
<tr>
<td>Cleaning Paper (*1)</td>
<td>CA99501-0012</td>
<td>1 pack</td>
<td>10 sheets</td>
</tr>
<tr>
<td>Cleaning Wipe (*2)</td>
<td>PA03950-0419</td>
<td>1 pack</td>
<td>24 packets</td>
</tr>
<tr>
<td>Lint-free dry cloth (*3)</td>
<td>Commercially available</td>
<td>-</td>
<td>-</td>
</tr>
</tbody>
</table>

*1: Used with Cleaner F1.

*2: The cleaning wipes are wet tissues that have been soaked with Cleaner F1. In place of this product, you can use a cloth soaked with Cleaner F1.

*3: Any lint-free cloth can be used.

Contact your FUJITSU scanner dealer or an authorized FUJITSU scanner service provider for details about purchasing the cleaning materials.

For details, refer to the following web page:
http://scansnap.fujitsu.com/
Cleaning the Outside of the ScanSnap

Clean the outside of the ScanSnap in the following procedure.

1. Unplug the cables from the ScanSnap.

2. Clean the outside of the ScanSnap with a dry cloth, or a cloth moistened with Cleaner F1/mild detergent.

ATTENTION
- Never use paint thinner or any other organic solvents. The shape or color may be changed.
- When cleaning the ScanSnap, prevent liquids from entering the ScanSnap.
- It may take a long time for Cleaner F1 to dry if an excessive amount is used. Moisten the cloth with moderate quantity. Wipe off the cleaner completely with a soft cloth to leave no residue on the cleaned parts.
Cleaning the Inside of the ScanSnap

Scanning repeatedly may cause dust and paper dust to accumulate inside the ScanSnap resulting in a scanning error.

As a guideline, the inside of the ScanSnap should be cleaned every 100 sheets scanned. Note that this guideline varies depending on the types of documents you scan. For instance, it may be necessary to clean the scanner more frequently when you scan documents on which the toner is not sufficiently fused.

<table>
<thead>
<tr>
<th>HINT</th>
</tr>
</thead>
<tbody>
<tr>
<td>To check the number of sheets scanned with the ScanSnap, see [Total Page Count] in the [ScanSnap Manager - Scanner and driver information] window.</td>
</tr>
<tr>
<td>To open the [ScanSnap Manager - Scanner and driver information] window, right-click the ScanSnap Manager icon in the notification area located at the far right of the taskbar, and click [Help] → [ScanSnap information] from the &quot;Right-Click Menu&quot; (page 45).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>WARNING</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do not use aerosol spray or spray that contains alcohol to clean the scanner. Paper dust and other dust blown up by strong air from the spray may enter inside of the scanner which may cause scanner failure or malfunction.</td>
</tr>
<tr>
<td>Also note that sparks generated by static electricity may cause a fire.</td>
</tr>
</tbody>
</table>

1. **Clean the glass and idler rollers.**
   1. Open the feed guide.
      
      The ScanSnap is turned on and a roller rotation sound comes out of the ScanSnap. After the sound stops, proceed to the next step.

      2. Open the top cover and output guide.

      3. Clean the following locations with a cloth moistened with Cleaner F1.

         | ATTENTION |
         |-----------------------------------------------|
         | ● Do not use water or mild detergent to clean the inside of the ScanSnap. |
         | ● It may take a long time for Cleaner F1 to dry if an excessive amount is used. Moisten the cloth with moderate quantity. |
Wipe off the cleaner completely to leave no residue on the cleaned parts.

- Glass (× 2, one on the top cover and one on the opposite side)
  Gently wipe the dirt and dust off the surface of the glass sections.
- Idler roller (× 12, located on the top cover)
  Gently wipe the dirt and dust off the rollers as you rotate them manually. Be careful not to damage the surface of the rollers. Make sure that they are cleaned properly because residue on the rollers will affect the feeding performance.

2. **Clean the feed roller and eject roller.**

1. Press the [Scan/Stop] button for three seconds with the top cover open.

2. Clean the following locations with a cloth moistened with Cleaner F1.

**ATTENTION**
- Do not use water or mild detergent to clean the inside of the ScanSnap.
- It may take a long time for Cleaner F1 to dry if an excessive amount is used. Moisten the cloth with moderate quantity.
  Wipe off the cleaner completely to leave no residue on the cleaned parts.
Press the [Scan/Stop] button to rotate the roller. Gently wipe the dirt and dust off while taking care not to damage the surface of the roller. Make sure that they are cleaned properly because residue on the roller will affect the feeding performance.

**Eject roller (× 1)**

Press the [Scan/Stop] button to rotate the roller. Gently wipe the dirt and dust off while taking care not to damage the surface of the roller. Make sure that they are cleaned properly because residue on the roller will affect the feeding performance.

If eject roller is difficult to clean, try cleaning it from the back while you keep the top cover slightly open.

**HINT**

Pressing the [Scan/Stop] button seven times will rotate the feed roller and the eject roller one revolution.

3. **Close the top cover and the output guide.**

   ![Output Guide](image)

   ![Top Cover](image)

   ![Feed Guide](image)

   It clicks when it returns to its original position.

**ATTENTION**

Make sure that the top cover is completely closed.

Otherwise, paper jams or other feeding errors, or image faults may occur.
Cleaning the Carrier Sheet

As you keep using the Carrier Sheet, dirt and dust will accumulate on the surface and the inside. Clean the Carrier Sheet regularly because it may result in scanning errors. The procedure for cleaning the Carrier Sheet is as follows.

**Cleaning**

Gently wipe the dirt and dust off the surface and the inside of the Carrier Sheet with a dry cloth, or a cloth moistened with Cleaner F1/mild detergent.

**ATTENTION**

- Do not use paint thinner or any other organic solvents.
- Do not use force to rub. The Carrier Sheet may be damaged or deformed.
- Be careful not to leave any crease on the Carrier Sheet.
- After cleaning the inside of the Carrier Sheet with a cloth moistened with Cleaner F1/mild detergent, make sure that it is completely dry before closing the Carrier Sheet.
- The Carrier Sheet should be replaced approximately every 500 scans.
Appendix

- "Uninstalling the Software" (page 117)
- "Specifications of Optional Parts" (page 119)
- "Specifications of Wireless LAN" (page 120)
- "Specifications of the ScanSnap" (page 121)
Uninstalling the Software

This section explains how to uninstall the following software programs:

- ScanSnap Manager
- ScanSnap Organizer
- CardMinder
- ABBYY FineReader for ScanSnap
- Scan to Microsoft SharePoint

**HINT**
If all of the following software programs are uninstalled, ScanSnap Online Update is also uninstalled at the same time:

- ScanSnap Manager
- ScanSnap Organizer
- CardMinder

The procedure is as follows.

1. **Turn on the computer and log on as a user with Administrator privileges.**

2. **Exit all running software programs.**

3. **Select [Start] menu → [Control Panel] → [Uninstall a program] under [Programs] (for Windows 8.1/Windows 8, select [Control Panel] under [Windows System] → [Uninstall a program] under [Programs] on the All apps screen).**

   The [Uninstall or change a program] window appears with a list of currently installed software programs.

4. **Select a software program to uninstall.**

   **HINT**
   To uninstall more than one software program, repeat steps 4 to 6 for each software program.

5. **Click the [Uninstall] button.**

   A confirmation message appears.

6. **Click the [Yes] button.**

   The software program is uninstalled.

**ATTENTION**
If you cannot successfully uninstall the following software programs, refer to "When You Cannot Uninstall the Software" (page 108):

- ScanSnap Manager
- ScanSnap Organizer
- CardMinder

# Specifications of Wireless LAN

The following table summarizes the wireless LAN specifications of the ScanSnap.

<table>
<thead>
<tr>
<th>Model name</th>
<th>iX100</th>
</tr>
</thead>
<tbody>
<tr>
<td>Observed standards</td>
<td>IEEE802.11b/IEEE802.11g/IEEE802.11n</td>
</tr>
<tr>
<td>Frequency range</td>
<td>2.412 GHz to 2.472 GHz</td>
</tr>
</tbody>
</table>
| Channels | Access Point Connect mode: 1 to 13 ch  
Direct Connect mode: 1 to 11 ch |
| Transfer speed (standard) | IEEE802.11b Max.: 11 Mbps  
IEEE802.11g Max.: 54 Mbps  
IEEE802.11n Max.: 72.2 Mbps (Only supports 20 MHz bandwidth) (*1) |
| Communication mode | Access Point Connect mode (infrastructure) (*2)  
Direct Connect mode (access point) |
| Communication distance (predicted) | Indoors, 50 m (Recommended: indoors, within 25 m) (*3) |
| Security | Access Point Connect mode  
WPA-PSK (TKIP/AES), WPA2-PSK (TKIP/AES), WPA (TKIP/AES), WPA2 (TKIP/AES), WEP (64-bit/128-bit) (*4)  
Direct Connect mode  
WPA-PSK (TKIP/AES), WPA2-PSK (TKIP/AES), WEP (64-bit/128-bit) |
| Easy installation | WPS 2.0 supported (button/PIN code) (*5) |

*1: The values indicated on these standards are the maximum value, and do not indicate actual communication speed.

*2: To use the wireless function, you need a wireless access point that supports the same standards.

*3: The specifications may vary based on the connected wireless access point and the surrounding environment.

*4: The following EAP types are supported.  
EAP-MD5, PEAPv0, EAP-TLS, EAP-TTLS, EAP-FAST, LEAP

*5: You need a wireless access point or wireless client that supports the WPS function.
Specifications of the ScanSnap

The following table summarizes the specifications of the ScanSnap.
