The above information shows the general technical specifications of the product and does not represent actual configuration. For specific configurations and their availability, please check with your local distributors.

- The addres initialized from Ziff Davis (BusinessWinstone 2001) Battery Wark V1.0.1 performed on systems with maximum battery life settings. Actual battery life will vary based on screen brightness, sound volume settings, running applications, connected peripherals, power management settings, battery conditioning, and other customer preferences. Modular Bay devices or hard drive usage may also have a significant impact on battery life.
 Dynamic Video Memory Technology (DVMT) dynamically responds to application requirement and efficiently allocates the proper amount of memory (max. 64MB) for optimal graphics and system performance. The memory size available to the Operating System will be less than the size of installed memory module.
 Maximum 56Kbps performance varies according to your local service providers' services.
 This term does not represent actual data rate of 100/10Mbps and simply indicates compliance with IEEE 802.3. IEEE 802.3.0 and IEEE 802.3.0 and IEEE 802.3.0 statiands. Actual maximum data rate depends on network configure Hard Disk Lock. Hard Disk Lock requires an exoless BIOS setup. BIOS settings can be configured to prompt for password to access BIOS setup. BIOS settings can be configured to prompt for password at every first bootup or all bootup sequences. Access to BIOS setup is needed to configure Hard Disk Lock. Hard Disk Lock requires an access key to rehinology and Stetex OmniPass to remember customer's list of users.

It is natural for all thin-film transistor (TFT) liquid crystal displays (LCD) to show a small number of missing or discoloured dots. These are commonly known as non-conforming pixels. This is a technology limitation of TFT LCD and does not represent a defect. Fujitsu warranty does not cover limitations in technology such as non-conforming pixels.

Specifications reflected above are engineering and hardware specifications. They do not represent actual usage or operating dimensions, sizes, performances and weights as these are dependent on factors such as operating temperature, type of operating system and application used, connected devices and accessories as well as hardware configurations of the notebook. Please check the compatibility of 3rd party accessories before purchase. Ambient temperature: 5' to 35'C/41 to 95'F (operating), -10' to 60'C/14 to 140'F (non-operating). Relative humidity: 20% to 80% RH (operating and non-operating).
