Green Procurement

To provide customers with products and services that have a light environmental footprint, we are implementing green procurement in concert with our business partners.

Procurement Activities Based on Green Procurement Direction

The Fujitsu Group summarized what it asks of its business partners in Japan and overseas regarding purchasing green parts, material and products in the "Fujitsu Group Green Procurement Direction". We have summarized green procurement requirements (table below) for our business partners and promote procurement from business partners that fulfill these requirements.

Using a Fujitsu Group Environmental Survey Sheet, we conduct a survey on business partners' status with regard to environment management system, CO₂ emission reduction, biodiversity preservation and water resource preservation activity, and ask them to take appropriate measures.

Green procurement requirements for business partners

Requirements	Materials/parts business partners*	Non-materials/parts business partners
① Establishment of environmental management systems (EMS)	○	○
② Compliance with regulations for Fujitsu Group specified chemical substances	○	—
③ Establishment of chemical substance management systems (CMS)	○	—
④ CO ₂ emission control/reduction initiatives	○	○
⑤ Biodiversity preservation initiatives	○	○
⑥ Aquatic resource preservation initiatives	○	○

* **Materials/parts business partners:** Business partners who supply components of Fujitsu Group products or OEM/ODM products

Establishment of Environmental Management Systems

We request our business partners to establish environmental management systems (EMS) to ensure that they continuously implement environmental burden reduction activities. In principal, we would like them to have third party certified EMS. Where this is not possible, we ask them to build an EMS incorporating the PDCA cycle suited to their circumstances.

CO₂ Emission Reduction Initiatives

The Fujitsu Group asks our business partners to actively engage in CO₂ emission reduction, in response to climate change represented by global warming. Specifically, we ask them to clearly express the intentions of their initiatives and request that they make efforts to achieve the objectives they set. Furthermore, we ask them to collaborate with external organizations, where possible, and to similarly encourage their own suppliers so that initiatives are expanded outside their business.

Acquiring Information on Chemical Substances Contained in Products

The Fujitsu Group is investigating information on chemical substances contained in suppliers' products by using AIS*¹ and MSDSplus*² offered by JAMP.*³ The investigations take place when products are designed, designs are changed or business partners are changed, and information gathered is shared through our internal chemical substance information management system.

Also, we are proactively participating in activities to standardize investigations related to green procurement promoted by JAMP and others.

*¹ **AIS (Article Information Sheet):** Information sheet for information on chemical substances in molded products.

*² **MSDSplus (Material Safety Data Sheet plus):** Information sheet for information on chemical substances in chemicals and preparations.

*³ **JAMP:** Joint Article Management Promotion-consortium

Establishment of a Chemical Substance Management System (CMS) for Product Substances

The Fujitsu Group asks its business partners to establish a chemical substances management system (CMS) based on industry-standard JAMP guidelines on the management of chemical substances contained in products.

We carry out CMS audits where Fujitsu's auditors directly confirm the management of chemical substances in products at the business partner's manufacturing bases, and if the system established is inadequate in structure or operation, auditors make requests for corrections and provide support. Afterwards, we regularly confirm the system state and its operational status through periodic audits. With the understanding of our business partners, the Fujitsu Group will continue carrying out management of chemical substances included in products.
