Fujitsu Linerless Label Paper Roll(58mm width / 80mm width) *8 Supply

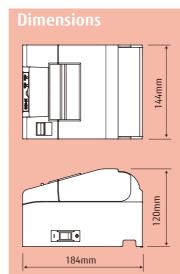

*1 When using printer vertically, connectors of AC cable and Interface cable should not be out of the printer case. (The connector of AC Cable should be "Angled" shape.)
*2 Depending on the region, this font is not included.
*3 This character set is for Standard version. Depending on the region, this set is different.
*4 This is selectable as a factory option.
*5 JavaPOS Driver supports RSZ32C Interface and USB Interface.
*6 Depending on the region, SUSE 9.3 is supported.
*7 Operation condition is under 250 transactions/day(Itransaction=25LF + 1cut), 340days/year, print duty less than 9%, and the life of Head or Cutter using specified paper by our company.
If unspecified paper is used, the life of printer might be shortened than expected. Also, it might be a cause of the trouble of the printer.
*8 Fujitsu Linerless Label must be used for this printer. Otherwise, the printer might be in defect. Please contact the dealer for purchasing labels. Note: Pick up the label by each after printing.

All specifications are subject to change without notices.

Fujitsu Linerless Label

http://www.fujitsu.com/jp/fit/en/

Fujitsu Linerless Label Printer **FP-1000L**

Fujitsu Linerless Label printer FP-1000L takes over the most of the functions of Thermal Printer FP-1000, and it can print special label, Linerless Label.

Using this label enables to improve your operations especially in Order Entry Scenes such as Quick Service Restaurants.

•No need a motion to peel Liner off

- •No need to dispose Liner, No waste
- •No mistakes and Fast operation

Fujitsu Isotec Limited

Usage, It's up to you! Improve your operation for your customer.

When the customer orders foods, drinks and other side menus, orders should be correctly cooked and the ordered menu should be passed to the customer. But especially in the crowded shop, and it is hard for the shop to pass the correct order to the customers.but customers do not want to wait. See examples below.

Example 1 At Coffee shop

When the customer orders coffee and pays the check, Receipt is printed and also the order is printed by FP-1000L on Linerless Label. The shop clerk picks it up and sticks it on the cup. The clerk in the kitchen makes sure the order, and carries it out.

•The printing is clear, and no mistakes happens until the coffee is passed to the customer.

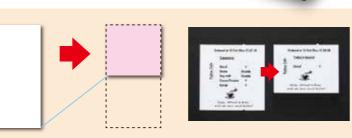

•Even though the Linerless Label is Thermal paper, you can stick it on the cup poured the hot drinks. Also, the surface of the label repels water, and it enables easier to use it in the kitchen area.

TUNA SALAD

THANK YOU

25 16 JAN 24 16 4.18 0.37

\$1.55

·Compared to the fix-sized label such as Die-cut label, Length is not fixed, and Layout can be changed freely.

•There is no need to dispose Liner so that your motion is fast, and no wastes should be processed.

When the expiration date should be indicated on deli or other foods,

this printer is effective. Depending on contents, not only the valid date, you can also print Logos of your shop, images of your product and the barcodes on each sheet.

Example **4 Order for Delivery**

When the delivery shops like Pizza or Fried Chicken shops deliver to the customer, Receipt content in the label printing is convenient. You can put it on the box, and it is not blown away.

At Bakery shop

Would you like to appeal your shop name and your products? You can use this printer in such a case. At the bakery shop, for example, you can show the shop name, baking time, and QR code of your shop's information on Linerless Label. The customer can put this label on any place at home to see the baking time to reserve his/her favorite bread and call the shop for asking to keep it.

After check, just stick the label with your shop and product information on the plastic bag, and pass it to customer.

Useful for many scenes

Not only for order entry scenes, but also FP-1000L can be used in any scenes if you are using normal labels. Usage depends on you!

Warehouse

1000

*Please test if this label can stick on the object to be stuck before using.

Features of FP-1000L

Fujitsu FP-1000L Linerless Label Printer is designed based on FP-1000 Thermal Printer, and the most of the functions are inherited from FP-1000.

Driver/Software Installation

FP-1000LL supports the same driver and software as FP-1000L. FP-1000L can be used as a receipt printer for emergeny

Windows Driver, OPOS Driver and Utility Software can be easily installed. Just follow the user guide in original Installer

IP address setting in Network environment can be quickly and easily setup with standard LAN setup tool.

Top Margin 3mm

** Take off each receipt every time after printing in case of 3mm setting.

>>	➡
abc —	🔺 3mm
	L

Barcode / 2-Dimension code

FP-1000L supports Barcodes and 2-Dimension codes (QR code).

Large Logo Store Memory

Image data can be stored up to 576KB. You can store several Logo data.

Buzzer beeps when Label printed.

Buzzer is a standard equipment for the notice of order receipt printed. Various functions like Buzzer On/Off and 5 patterns of beep sound suite versatile restaurant environment.

Ex. You can select different sound patterns for Foods and beverages.
