

The Fujitsu AutoGraFX[®] SceneCreator[™]

► Description

Fujitsu AutoGraFX SceneCreator is a professional design tool for creating engaging and sophisticated user interfaces for applications with graphical and interactive content. SceneCreator allows designers to focus on creativity while letting developers focus on programming. Each team member can work without blocking the other's progress.

- Fully featured authoring tool for modeling interactive content
- Provides a rapid end-to-end workflow solution that enables accelerated results
- Breaks down the barriers between design and development by allowing for interactivity, animation and transitions to be added without having to write code

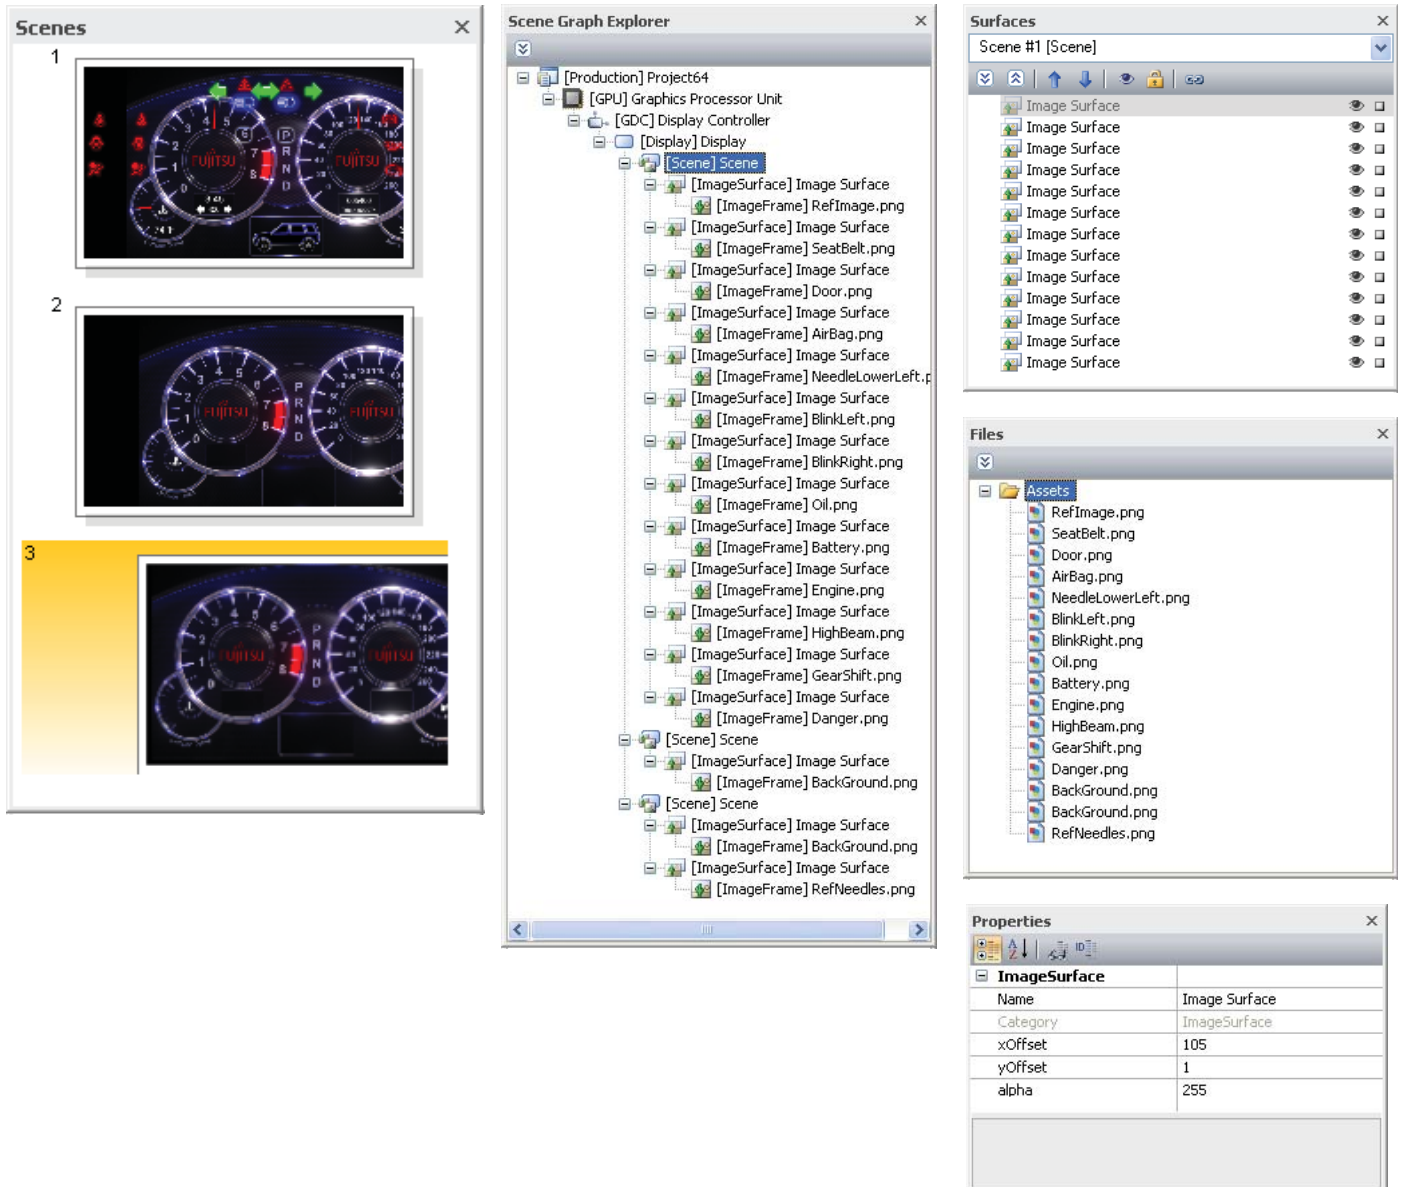

► Capabilities

- Model sophisticated user interfaces with ease
- Manage and render scenes using a hierarchical scene graph
- Create simple interactive scenes without programming
- Access and utilize hardware-specific features using visual objects
- Animate objects and create simple effects
- Import popular image formats
- AutoCode to targeted graphics hardware.

The Fujitsu AutoGraFX® SceneCreator™

► Features

- Easy to use, modern visual interface
- Intuitive workflow
- Real-time preview of artwork
- Artwork import capabilities (supports PNG, JPG, TIFF, GIF and BMP)
- Interoperability with other AutoGraFX applications
