

Azure Migration and Modernization Program (AMMP)

The Azure Migration and Modernization Program offers companies the resources they need for the path to the cloud from start to finish.

It helps with common migration and modernization scenarios; infrastructure and database migration, virtual desktop infrastructure and app and data modernization.

AMMP to accelerate your Digital Transformation journey

The Azure Migration and Modernization Program gives a comprehensive and proven approach to best support your organizations' needs:

- Optimize costs, drive sustainable outcomes, reduce project risk and ensure resilience
- Resources and expert help at every stage of their cloud journey; technical skill building, free tools, in-depth experience

Discover the opportunity with Fujitsu

As well as accelerating customer deals on migration, Fujitsu has access to attractive benefits provided by Microsoft:

- Uncover transformation opportunities through app modernization and native cloud development
- Alleviate customer concerns around cost by leveraging partner benefits through AMMP
- No matter where you are in the cloud journey – AMMP offers support in the form of pilots, workshops, solution assessments and migration projects

“It improved, grew and strengthened our relationship with Microsoft...it accelerated the migration, it took 3 months rather than taking 10 months.”

Project Lead, Manufacturing

“Very positive cooperation with Microsoft. They were very impressed regarding the landing zone document.”

Project Lead, Manufacturing
