

# Work smarter, not harder

Fujitsu Smart Working excels in human digitalization by boosting profitability of work

To survive in profitable way in the highly challenging and competitive global market economy, all the factors of productivity from machine, materials and work force, should be managed in an impressive way. Like, employees should possess needed skills and competences to be able to maintain the flow and to successfully complete the tasks. Is productivity an issue for your organization? Are you able to exploit the power of new electronic tools to the fullest? Are innovations on your agenda?

Why should you be interested? Well, motivated employees accomplish 16% more than unmotivated. The Fujitsu Smart Working development program has increased productivity by even 40% by deploying new, smart working practices. We can help our customers with working smarter, not harder. That's why.

## Improving productivity of work with Smart Working

Fujitsu Smart Working can help your organization in boosting your productivity by unleashing more time to do actual work. Smart Working can support your business to:

1. Avoid project delays with better time management
2. Improve meetings and time spent on meetings
3. Ensure data security with better documentation practices
4. Continuous improvement through introduction to Lean
5. Mobilize your business and work
6. Enhance collaboration and employees' ICT skills
7. Improve communication with the right tools & channels
8. Utilize social media efficiently

### Measurable Benefits

- Improved productivity
- Increased work satisfaction
- Enhanced time management
- The efficient use of communication and mobility tools

### How do we work?

- **Current state analysis**
- Data driven targets setting with measurable results
- Piloting first, followed by scaling
- Enhancing continuous improvement approach
- With modular approach
- Cloud based video channel
- Online facilitation and tutoring with recorded best practices

The approach is based on Lean techniques and tools, it will engage employees to innovate, to identify new ways of working, and bring those into practice. Smart Working is promoting a culture of continuous improvement, giving elements and tools to move those into the daily life.

## Fujitsu XpressWay for Smart Working

FUJITSU XpressWay is a consultative approach to launch development programs like Smart Working with. By carrying out the **Smart Working current state analysis** you pave the way for best practices for efficient working, methods and operating models in all of the following areas:

- Practices
- Competence
- Service
- Tools
- Equipment

Start working smarter by ordering the current state analysis. This analysis gives data driven findings and recommendations on what to focus on. The analysis is available for a cost of 10.000€ (+VAT).

After analyzing the current status of your productivity environment, Fujitsu may apply respective coaching and adoption of best practices for the identified development areas. Our methods will then include eliminating unnecessary work, reducing unnecessary meetings, increasing transparency and communication to increase focus on value adding activities.

The approach is suitable for all industries from service sector to manufacturing.

### What do you need to provide?

A successful delivery requires the following elements from you:

- Commitment for the Smart Working current state analysis from someone at a managerial position
- Nominated owner and sponsor
- Positive mindset and openness towards the change

*Once the outcome of the analysis is clear, be ready to*

- *Allocate resources for the Smart Working implementation, in order to successfully deliver the changes*
- *Nominate change agents (Smart Guys) within your organization. Our Smart Working specialists are available for corrective actions, execution and follow-up.*
