

Fujitsu Group Environmental Policy

Environmental Promotional Organization

We draw on the Group's integrated strengths to promote environmental activities according to an environmental policy based on "The FUJITSU Way."

Fujitsu Group Environmental Policy

October 2002

Philosophy

The Fujitsu Group recognizes that environmental protection is a vitally important business issue. By utilizing our technological expertise in the IT industry and our creative talents, we seek to contribute to the promotion of sustainable development. In addition, while observing all environmental regulations in our business operations, we are actively pursuing environmental protection activities on our own initiative. Through our individual and collective actions, we will continuously strive to safeguard a rich natural environment for future generations.

Principles

- We strive to reduce the environmental impact of our products throughout the product life cycle.
- We are committed to conserving energy and natural resources, and practice a 3R approach (reduce, reuse, recycle) to create best-of-breed eco-friendly products.
- We seek to reduce risks to human health and the environment from the use of harmful chemical substances or waste.
- Through our IT products and solutions, we help customers reduce the environmental impact of their activities and improve environmental efficiency.
- We disclose environment-related information on our business activities, products and services, and we utilize the resulting feedback to critique ourselves in order to further improve our environmental programs.
- We encourage our employees to work to improve the environment, bearing in mind the impact of their business activities and their civic responsibilities.

President
CEO & COO
Fujitsu Limited

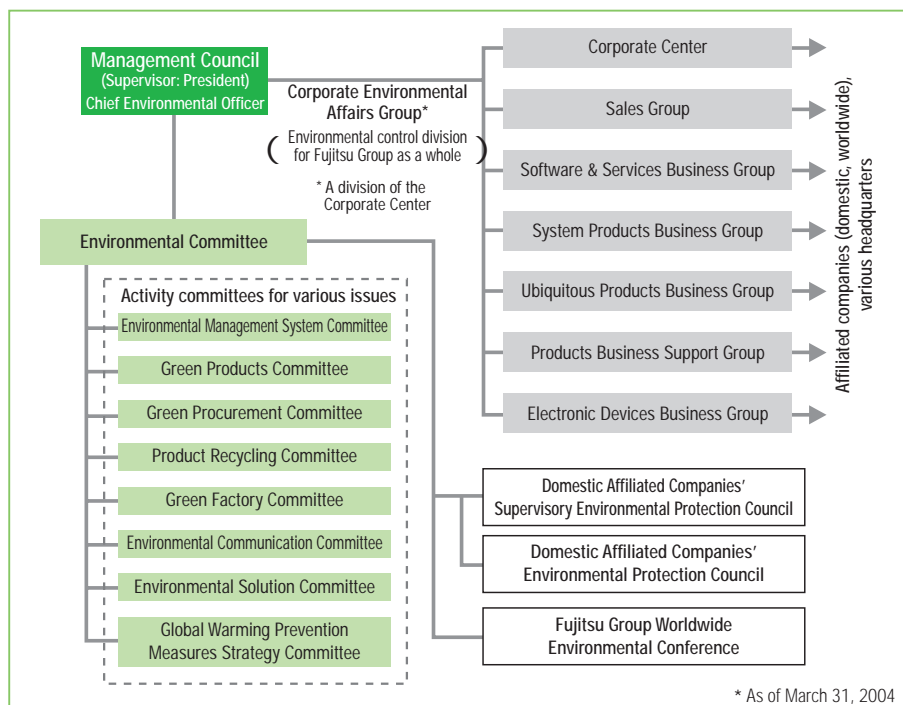

* The president's signature is that of the president in office when the "Fujitsu Group Environmental Policy".

Environmental promotional organizations

We have formed promotional organizations in conformity with the business group system to facilitate faster responses to directives from top management and to various other circumstances. To ensure environmental management corresponding to the reformation of our corporate structure, we established the Environmental Committee to supervise the activity committees responsible for various issues and to promote ongoing efforts to strengthen environmental activities contributing to the sustainable development of society.

Integrated group efforts

The Domestic Affiliated Companies' Environmental Protection Council holds meetings of 35 companies, primarily consolidated manufacturing subsidiaries in Japan, to promote cooperation in environmental activities within the Fujitsu Group. Participants have discussed the progress of the Fujitsu Environmental Protection Program (Stage III) and the constitution of the Fujitsu Group Environmental Protection Program (Stage IV). (2 meetings in fiscal 2003, 22 total)
