

Editorial Policy

Reporting According to Fujitsu Group CSR Priority Issues

The 2011 Fujitsu Group Sustainability Report reports in accordance with the five CSR priority issues stipulated by the Fujitsu Group in December 2010, and includes typical examples of specific content relating to those issues.

Furthermore, given the enormous effect on society of the Great East Japan Earthquake that occurred in March 2011, it also sums up the Fujitsu Group's responses to that disaster.

■ This Report Focuses on Items Seen as Important

Of the various responses we have made to these priority issues, this report focuses on those items seen to be of prime importance. Items that could not be covered here are reported on the Fujitsu website.

Our basic editorial policy is to consider issues from two standpoints: the importance to society and stakeholders and the importance to the Fujitsu Group. In particular, we consider directions for this report based on opinions we receive from third parties, general readers, and stakeholders. We also continue to report on items featured in previous reports that each department considers to be still of prime importance to the Group.

Furthermore, we consider GRI guideline compliance and the comprehensiveness of the report from the standpoint of the ISO 26000 social responsibility standard.

■ Target Readership

This report is written for the following readership: all Fujitsu stakeholders including customers, employees, stockholders and investors, suppliers and business partners, international society and local communities, public institutions, and governments and specialists such as CSR survey institutions.

■ Reporting Period

This report focuses on activities in FY 2010, from April 1, 2010 to March 31, 2011, and the data presented is actual performance data from that period. Content from times outside that period, however, is also presented.

■ Organizations Covered

While the whole of the Fujitsu Group is the object of this report, when it is necessary to indicate the range of applicability, we will specify Fujitsu Group (to indicate the Group as a whole) or Fujitsu (to indicate Fujitsu, Ltd. as an independent entity).

Note that for environmental reporting, the object is Fujitsu itself plus a total of 130 companies (including companies outside Japan) centering on consolidated subsidiaries that build environmental management systems. Also, environmental burden data reporting covers Fujitsu itself, Fujitsu Laboratories, Ltd. (17 locations), and 27 main manufacturing subsidiaries (of which 24 are in Japan and three are overseas). Environmental accounting data covers Fujitsu itself and 30 main subsidiaries (of which 26 are in Japan and four are overseas).

The organizations that are covered in environmental activities reporting are listed on the following website.

A Note Concerning Future Projections, Forecasts and Plans

This report not only describes past and present facts related to the Fujitsu Group but also includes future projections, forecasts and plans. Such projections, forecasts and plans are based on data available when the report was prepared, and therefore involve a degree of uncertainty. Accordingly, future results of operating activities and other new developments may differ from the projections, forecasts and plans included in this report. We ask our readers' understanding of the fact that the Fujitsu Group cannot be responsible for such eventualities.

Translation

The following is an English translation of an independent assurance statement prepared in Japanese and is for information and reference purposes only. In the event of a discrepancy between the Japanese and English versions, the Japanese version will prevail.

Independent assurance report

5 August 2011

Mr. Masami Yamamoto

President and Representative Director
FUJITSU LIMITED

1. Purpose and scope of our assurance engagement

We have performed certain assurance procedures, based on the engagement with Fujitsu Limited (the "Company"), on the Company's Key Sustainability Performance indicators. These comprise the environmental accounting data and the material environmental information¹ of the Company and its major subsidiaries for the year ended 31 March 2011, that were reported in the Fujitsu Group Sustainability Report 2011 (the "Report"). The assurance procedures are with respect to whether the key environmental performance indicators have been measured and calculated accurately, whether material information has been fully disclosed in accordance with the reporting standards for sustainability reports² and whether the Company's self-declaration on the GRI application level conforms to the application level criteria stipulated by the GRI guidelines.

The preparation of the Report is the responsibility of the Company's management. Our responsibility is to express an independent opinion on the Key Environmental Performance Indicators.

2. Outline of the assurance procedures performed

We have performed limited assurance procedures³ in accordance with the 2003 International Standard on Assurance Engagements (ISAE) 3000: Assurance Engagements other than Audits or Reviews of Historical Financial Information of the International Federation of Accountants (IFAC) and the 2008 Practical Guidelines for the Assurance of Sustainability Information of the J-SUS. Therefore, our assurance engagement provides relatively limited assurance compared to a reasonable assurance engagement.

3. Conclusion

Based on the assurance procedures performed, nothing has come to our attention that causes us to believe that the Key Sustainability Performance Indicators have not been measured and calculated accurately in accordance with the reporting standards of sustainability reports, that material information has not been disclosed in accordance with the 2011 Sustainability Reporting Assurance and Registration Criteria, or that the Company's self-declaration on the GRI application level does not conform to the application level criteria stipulated by the GRI guidelines, in all material respects.

4. Independence

Our assurance is compliant with the Ethics Regulations of J-SUS and there is no financial interest between the Company and us.

Akihiro Nakagome
Representative Director
Ernst & Young ShinNihon Sustainability Institute Co., Ltd.

¹ The scope of material environmental information is stipulated in the 2011 Sustainability Reporting Assurance and Registration Criteria of the Japanese Association of Assurance Organizations for Sustainability Information (J-SUS).

² The reporting standards refer to the 2007 Environmental Reporting Guidelines of Japan's Ministry of the Environment, the 2006 Sustainability Reporting Guidelines of the Global Reporting Initiative (the GRI), and the 2011 Sustainability Reporting Assurance and Registration Criteria of J-SUS in the context of specifying the material subject to disclosure and the application level criteria stipulated by the GRI guidelines.

³ We have mainly reviewed and assessed the Company's procedures for the collection and aggregation of data, performed analytical procedures, as well as recalculated and reconciled them with the corroborating evidence on the quantitative sustainability information on a test basis. In addition, we have mainly made inquiries and reviewed related records to verify the qualitative information and whether or not the Company's self-declaration on the GRI application level conforms to the application level criteria stipulated by the GRI guidelines.

Ensuring the Reliability of Information Disclosure

The 2011 Fujitsu Group Sustainability Report has been reviewed by an independent body, Ernst & Young ShinNihon Sustainability Institute Co., Ltd., whose independent assurance report is appended. Furthermore, this report has been duly granted the sustainability report audit and registration mark stipulated by The Japanese Association of Assurance Organizations for Sustainability Information, which assures that the reliability of the information presented here meets its standards.
