

Ensuring the Reliability of Information Disclosure

Independent Assurance Report

Fujitsu Group Sustainability Report 2012 [Detailed Version] has been reviewed by an independent body, Ernst & Young Sustainability Co., Ltd., whose independent assurance report is attached.

Translation

The following is an English translation of an independent assurance statement prepared in Japanese and is for information and reference purposes only. In the event of a discrepancy between the Japanese and English versions, the Japanese version will prevail.

Independent assurance report

29 June 2012

Mr. Masami Yamamoto

President and Representative Director
FUJITSU LIMITED

1. Purpose and scope of our assurance engagement

We have performed certain assurance procedures, based on the engagement with Fujitsu Limited (the "Company"), on the Company's Key Sustainability Performance indicators. These comprise the environmental accounting data and the material environmental information¹ of the Company and its major subsidiaries for the year ended 31 March 2012, that were reported in the Fujitsu Group Sustainability Report 2012 [Detailed Version] (the "Report"). The assurance procedures are with respect to whether the key environmental performance indicators have been measured and calculated accurately, whether material information has been fully disclosed in accordance with the reporting standards for sustainability reports² and whether the Company's self-declaration on the GRI application level conforms to the application level criteria stipulated by the GRI guidelines.

The preparation of the Report is the responsibility of the Company's management. Our responsibility is to express an independent opinion on the Key Environmental Performance Indicators.

2. Outline of the assurance procedures performed

We have performed limited assurance procedures³ in accordance with the 2003 International Standard on Assurance Engagements (ISAE) 3000: Assurance Engagements other than Audits or Reviews of Historical Financial Information of the International Federation of Accountants (IFAC) and the 2008 Practical Guidelines for the Assurance of Sustainability Information of the J-SUS. Therefore, our assurance engagement provides relatively limited assurance compared to a reasonable assurance engagement.

3. Conclusion

Based on the assurance procedures performed, nothing has come to our attention that causes us to believe that the Key Sustainability Performance Indicators have not been measured and calculated accurately in accordance with the reporting standards of sustainability reports, that material information has not been disclosed in accordance with the 2011 Sustainability Reporting Assurance and Registration Criteria, or that the Company's self-declaration on the GRI application level does not conform to the application level criteria stipulated by the GRI guidelines, in all material respects.

4. Independence

Our assurance is compliant with the Ethics Regulations of J-SUS and there is no financial interest between the Company and us.

Akihiro Nakagome
Representative Director

¹ The scope of material environmental information is stipulated in the 2011 Sustainability Reporting Assurance and Registration Criteria of the Japanese Association of Assurance Organizations for Sustainability Information (J-SUS).

² The reporting standards refer to the 2012 Environmental Reporting Guidelines of Japan's Ministry of the Environment, the 2011 Sustainability Reporting Guidelines of the Global Reporting Initiative (the GRI), and the 2011 Sustainability Reporting Assurance and Registration Criteria of J-SUS in the context of specifying the material subject to disclosure and the application level criteria stipulated by the GRI guidelines.

³ We have mainly reviewed and assessed the Company's procedures for the collection and aggregation of data, performed analytical procedures, as well as recalculated and reconciled them with the corroborating evidence on the quantitative sustainability information on a test basis. In addition, we have mainly made inquiries and reviewed related records to verify the qualitative information and whether or not the Company's self-declaration on the GRI application level conforms to the application level criteria stipulated by the GRI guidelines.

This report has been duly granted the sustainability report audit and registration mark stipulated by the Japanese Association of Assurance Organization for Sustainability Information, which assures the reliability of the information presented here meets its standards.
