Promoting CO₂ Emission Reductions with Our Business Partners

Our Approach

The reduction of CO₂ emissions through society-wide energy saving has become a critical theme for global warming prevention. Fujitsu Group believes that it is necessary to work toward CO₂ reductions in-house, as well as along its entire value chain, which is why we advocate measures to reduce or limit the CO₂ emissions of our business partners.

From FY 2013, we are expanding the scope of these measures to business partners beyond component suppliers to include other areas such as construction, facilities, maintenance, and software. Specifically, we are surveying the status of business partners' activities for CO₂ emissions reduction and offering support and appeals for extra efforts to business partners that do not meet standards set by our Group. Going forward, we intend to leverage the green procurement expertise of the Fujitsu Group to work with our business partners to drive forward initiatives and contribute to decreasing the environmental burden of society overall.

Summary of FY 2014 Achievements

Targets under the Fujitsu Group Environmental Action Plan (Stage VII) (toward FY 2015)	Expand activities of reducing CO ₂ emissions to all types of suppliers.
FY 2014 Targets	Reach a 100% of business partners implementing CO ₂ reduction or limitation measures. (Achieved ahead of schedule—the target was the end of FY 2015.)
FY 2014 Key Performance	Reached 100% of business partners implementing CO ₂ reduction or limitation measures.

FY 2014 Performance and Results

Surveyed and Supported Initiatives at Business Partners

We are distributing our Group's original environmental surveys to our business partners and checking the status of their activities for reducing CO₂ emissions. For business partners who have not reached stage 2 activities (the implementation of CO₂ reduction and limitation activities with numerical targets), we provide our own check lists featuring easily actionable case studies as opportunities for partners to start implementing activities.

In addition, we have compiled a leaflet that we supply as a guide for activities. The leaflet contains information on topics from how companies can proceed with regard to global warming issues to reference information on publicly disclosed activities.

Moreover, we confirmed changes in CO₂ emission reduction activities for business partners surveyed in the previous fiscal year and encouraged them to continue those activities.

Leaflet distributed to business partners

Achieved 100% Implementation Ratio with Business Partners Undertaking Initiatives to Reduce CO₂ Emissions

In FY 2014, the second year of the Fujitsu Group Environment Action Plan (Stage VII), we set a target to strive for a 100% implementation ratio achieved ahead of schedule, given the results of our target achievements in the plan's first year. We managed to achieve this 100% ratio thanks to persistent encouragement and patient explanations resulting in cooperation from partners who were facing difficulties implementing these activities.

Drawing Up an Activity Evaluation Index

Stage 1 Activity announcement (declaration of commitment)	The stage when the significance of reducing/limiting CO ₂ is understood and a declaration of commitment is made as a company.
Stage 2 Activity implementation	The stage when initiatives are implemented, each with fixed numerical targets, policies, or plans.
Stage 3 Activity expansion	The stage when activities are expanded from inside to outside the company (such as support for the upstream supply chain or cooperative efforts to review approaches with external organizations).

FY 2015 Targets and Plans

Achieve Targets Ahead of Schedule and Formulate New Initiatives

We are striving for early achievement of our targets ahead of year's end in FY 2015, the final year of the Fujitsu Group Environment Action Plan (Stage VII), by encouraging business partners that are now part of the Plan and by endeavoring to reach a 100% Stage 2 compliance ratio.

On top of this, we are discussing and formulating green procurement initiatives for the Environment Action Plan (Stage VIII).
