Costs and Economic Benefits in FY 2014

The results of this accounting for FY 2014 showed expense of 51.5 billion yen (a 13% increase from the previous year) and the economic benefits were 86.2 billion yen (a 10% increase from the previous year). Thus both costs and benefits increased. Also, our capital investment was 1.1 billion yen (a 61% decrease from the previous year).

Driving forward our R&D on products and solutions to contribute to environmental conservation for customers and society led to broad increases in R&D costs and economic benefits (calculated by our own method for estimating economic benefits).

Environmental Liabilities

Our Liabilities toward the Environment

The Fujitsu Group, in properly forecasting expected future environmental liabilities and communicating our soundness and stance of not deferring environmental liabilities, has recorded a liability of 10.23 billion yen in soil-pollution cleanup costs, high-level polychlorinated biphenyl (PCB) waste disposal costs, and asbestos processing costs during facilities demolition. This total is the amount we calculate, as of the end of FY 2014, to be necessary for the Fujitsu Group in Japan to carry out these tasks in the next FY and beyond.
