

An ERP solution for Assembly Manufacturers

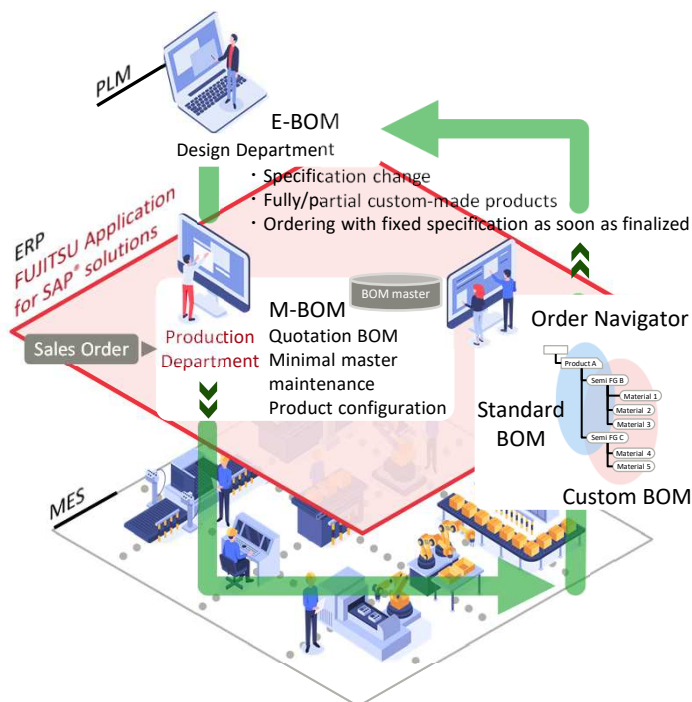

Realize Mass Customization through Product Configuration Management

Mass customization is the future trend in manufacturing, but the current reality is that mass customization still relies on complex design changes and manufacturing ordering operations. Based on its expertise and experience in manufacturing, Fujitsu offers the [FUJITSU Application for SAP® solutions](#) to minimize the complex business operation of manufacturers who embrace mass customization.

■ About FUJITSU Application for SAP® solutions

FUJITSU Application for SAP® solutions provides usability to support complex manufacturing shop-floor business operations efficiently. This solution is designed for manufacturers who are considering implementing or manufacturers who have adopted SAP® S/4HANA. In order for the manufacturer to realize mass customization, the solution supports responding quickly to frequent customer's requirements by reducing the workload of front desk operations and shortening the cycle of business operations.

■ Key Features

- Minimal master maintenance operation**
 Streamline business operations by eliminating operations of manual creating prior master for low-repetitive material. (Material master is created automatically in the transaction creating process)
- Realize efficient manufacturing ordering operation by Order Navigator**
 Streamline business operations by integrating operations involving multiple functions under a single window during design change.
- Improve efficiency of configurator master maintenance**
 Reduce the work-load of front-end operations by configurator Optimize master maintenance job with complex constraints and conditions.

FUJITSU Application for SAP® solutions Product Videos

The [concepts](#) and [features](#) of the FUJITSU Application for SAP® solutions are explained in our easy-to-understand videos. The videos show our approach to achieving mass customization, and explanation of feature with the actual system screens used for [sales quotation](#) and [manufacturing ordering](#) business process.

Value Proposition

Reduce operation workload by registering master automatically

- Only minimum information is required in orders creating for custom-made product.
- Create masters for custom-made product in SAP S/4HANA automatically.
- Simplify complex master registration operation

Streamline ordering business operations

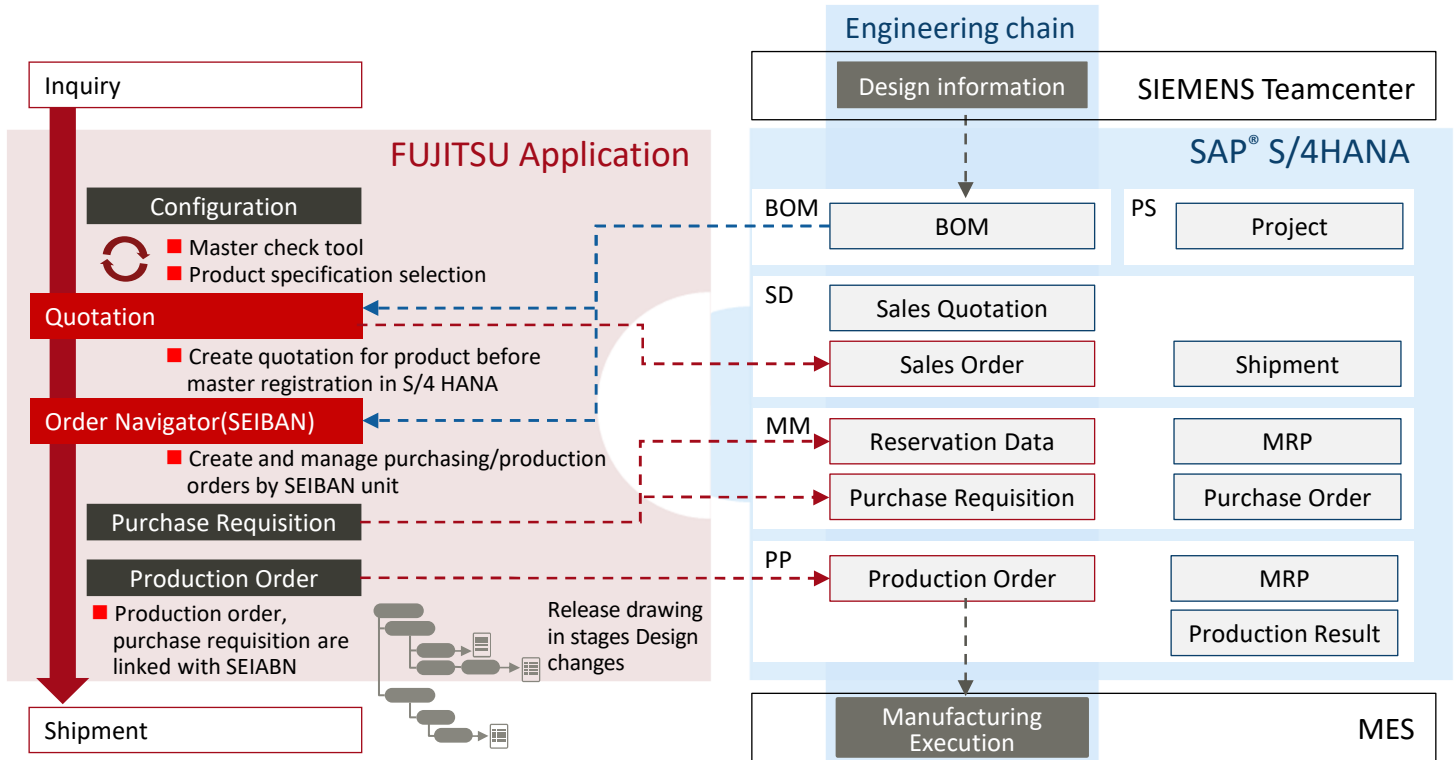

- Improve business operation efficiency by unique features in FUJITSU Application for SAP® Solutions, such as create BOM, ordering with fixed specification as soon as the order is finalized, confirm order progress and confirm the impact from design change without switching windows

Optimize maintenance operation of complex specification combination master

- Enable master operation by managing and classifying complicated/enormous constraints and conditions (Rules information)
- Enable to verify the accuracy/error of rule configuration before master registration through visual inspection
