Water Use Volume Results.....	49	Fax Questionnaire .....	54

## Editorial Policy

The Fujitsu Group Environmental Report is compiled to inform all our stakeholders about our environmental plans, goals and achievements in an easily comprehensible manner by describing them in detail and illustrating them with graphs and flow charts, etc. This report for 2002 focuses on the environmental burden imposed by Fujitsu Group operations, our activities to protect the environment, our R&D activities related to environmental technologies and the measures we are taking to control environmental risks. We hope it will foster two-way communication between the Fujitsu Group and society at large concerning these and related issues. We plan to continue promoting this dialogue by publishing this report each June, working at the same time to make the environmental report much easier to read.

We refer in this report to various guidelines, including the *2001 Environmental Report Guidelines* issued by Japan's Ministry of the Environment, the *Environmental Reporting Guidelines* issued by Japan's Ministry of Economy, Trade & Industry (METI), and the *GRI Guidelines*.
