Main Business Activities

The Fujitsu Group creates and provides high-performance, high-quality solutions based on powerful information technologies.

Regarding Our Business Segments

In order to provide comprehensive solutions that combine world-class hardware, software and services and ensure high customer satisfaction throughout the time that customers use them, we have integrated our sales and system engineering groups in Japan and pursued other organizational reforms.

In light of these activities, in fiscal 2005 we reclassified our business segments from a product and technology-focused orientation to a customer-centric categorization.

• Technology Solutions

Covering the provision of comprehensive solutions consisting of the high-performance, high-quality products and services that customers demand, Technology Solutions is positioned as the principal business domain of the Fujitsu Group. We will aggressively pursue greater profitability and growth in this area.

• Ubiquitous Product Solutions

Ubiquitous Product Solutions includes products such as PCs, mobile phones and hard disk drives, which are integral to meeting individuals' needs in the era of ubiquitous networking. In this segment we will work to improve time to market and quality and to reduce costs.

• Device Solutions

In Device Solutions, through a series of restructuring initiatives and alliances, we are focusing our resources on leading-edge logic LSI devices. In this area, as well as in our related electronic components businesses, we will pursue advanced technologies that other companies cannot match, as well as higher quality and greater efficiency.

Business Segments	Sub-segments
