

Environmental Policy

Setting forth a “Fujitsu Group Environmental Policy” and engaging in environmental protection activities throughout the Group.

Fujitsu Group Environmental Policy

(October 2002)

Philosophy

The Fujitsu Group recognizes that environmental protection is a vitally important business issue. By utilizing our technological expertise in the IT industry and our creative talents, we seek to contribute to the promotion of sustainable development. In addition, while observing all environmental regulations in our business operations, we are actively pursuing environmental protection activities on our own initiative. Through our individual and collective actions, we will continuously strive to safeguard a rich natural environment for future generations.

Principles

- We strive to reduce the environmental impact of our products throughout the product life cycle.
- We are committed to conserving energy and natural resources, and practice a 3R approach (reduce, reuse, recycle) to create best-of-breed eco-friendly products.
- We seek to reduce risks to human health and the environment from the use of harmful chemical substances or waste.
- Through our IT products and solutions, we help customers reduce the environmental impact of their activities and improve environmental efficiency.
- We disclose environment-related information on our business activities, products and services, and we utilize the resulting feedback to critique ourselves in order to further improve our environmental programs.
- We encourage our employees to work to improve the environment, bearing in mind the impact of their business activities and their civic responsibilities.

Fujitsu Group Environmental Policy

Since its founding in 1935, Fujitsu has made environmental preservation one of the most important elements in its management, based on its philosophy of “manufacturing in harmony with nature.”

In 1992, the year when Agenda 21* was adopted at the Rio de Janeiro Global Summit, we established “Fujitsu’s Commitment to the Environment.” This was created in the mold of the Global Environment Charter announced by the Japanese Federation of Economic Organizations in the previous year. In October 2002, when the Johannesburg Summit was held and summit participants were debating how to execute Agenda 21 in a more effective way, we revised this commitment to create the Fujitsu Group Environmental Policy. Our objective in this revision was to implement environmental management in a way that reflects the distinct character of the Fujitsu Group’s business, responding to more and more diverse problems where environmental management is increasingly vital.

* Agenda 21

A concrete plan of action for sustainable development, to be carried out by various countries and international organizations. It involves programs to deal with environmental issues, including social and economic problems such as population, poverty and human settlement issues, as well as soil, forests, the atmosphere, desertification, agriculture, biodiversity, water, hazardous wastes and chemical materials.

Green Policy 21

We want every employee of the Fujitsu Group to understand the approach, which has applied since our founding, of manufacturing in harmony with nature and to put this approach into practice in their daily work. For this purpose, we have established “Green Policy 21” as a concept to guide our actions—a concept that goes beyond any mere statement of intent.

We have adopted as our slogan “We make every activity green,” and we put this idea into practice in all areas of our business.

Environmental Concept “Green Policy 21”
