# For the Environment

Passing on a Beautiful Environment to Future Generations

Consideration for the environment is one of the core values articulated i *The FUJITSU Way*, and this in turn informs the Fujitsu Group Environme Policy. We create a mid range environmental protection program with concrete targets for implementing this environmental policy and, by wor to achieve these targets, aim to contribute to sustainable development.

Initiatives in this Area

• Achievements of the Fujitsu Group Environmental Protection Program

Fujitsu Group Environmental Policy

Since Fujitsu's founding in 1935, we have made environmental preservation one of the most important elements in our management, based on our philosophy of "manufacturing in harmony with nature." To promote environmental management that reflects the distinctive identity of the Fujitsu Group, we have established the Fujitsu Group Environmental Policy.

Green Policy 21

We want every employee of the Fujitsu Group to understand the approach, which has applied since our founding, of manufacturing in harmony with nature and to put this approach into practice in their daily work. For this purpose, we have established "Green Policy 21" as a concept to guide our actions—a concept that goes beyond any mere statement of intent.

We have adopted as our slogan "We make every activity green," and we put this idea into practice in all areas of our business.

Fujitsu Group Environmental Policy

Philosophy

The Fujitsu Group recognizes that environmental protection is a vitally important business issue. By utilizing our technological expertise in the IT industry and our creative talents, we seek to contribute to the promotion of sustainable development. In addition, while observing all environmental regulations in our business operations, we are actively pursuing environmental protection activities on our own initiative. Through our individual and collective actions, we will continuously strive to safeguard a rich natural environment for future generations.

Principles

• We strive to reduce the environmental impact of our products throughout the product life cycle.
• We are committed to conserving energy and natural resources, and practice a 3R approach (reduce, reuse, recycle) to create best-of-breed eco-friendly products.
• We seek to reduce risks to human health and the environment from the use of harmful chemical substances or waste.
• Through our IT products and solutions, we help customers and society to reduce the environmental impact of their activities and improve environmental efficiency.
• We disclose environment-related information on our business activities, products and services, and we utilize the resulting feedback to critique ourselves in order to further improve our environmental programs.
• We encourage our employees to work to improve the environment, bearing in mind the impact of their business activities and their civic responsibilities.
