

Targets and Achievements

Establishing clear objectives that apply to all business areas of the Fujitsu Group, as well as carrying out well-planned and continuous environmental protection efforts.

Environmental Protection Program (Stage IV)

The Fujitsu Group establishes mid-range environmental action programs to provide concrete objectives for implementing environmental policies. In the Stage IV Fujitsu Group Environmental Protection Program, which covers fiscal 2004 through fiscal 2006, we expanded the scope of our environmental efforts to include all areas of the Group (design, development and manufacturing divisions, headquarters bodies, sales units, and software & services divisions), and through systemic environmental protection activities we strove to contribute to the building of a sustainable society.

In fiscal 2006, which was the last year of the Stage IV program, our results included achieving goals related to the provision of Super Green Products and certified Environmentally Conscious Solutions, construction of recycling systems in North America and Asia, and promotion of green procurement and green factories.

We did not, however, achieve our target recycling ratio for waste plastics, due to insufficient types of recyclable materials that can be reused and other reasons. However, we will continue our efforts to find and create new types of recyclable materials.

Stage IV Fujitsu Group Environmental Protection Program (fiscal 2004 to 2006)

Items	Fujitsu Group Targets	Performance (fiscal 2006)	Status*	Related Pages
Strengthening Environmental Management	To establish an EMS-based framework for environmental management across the entire Fujitsu Group by the end of fiscal 2005.	We established environmental management frameworks in all Group companies, acquiring ISO14001 globally integrated certification including overseas locations at the end of 2005.	○	P35~
Green Procurement	To increase the procurement ratio from suppliers who have implemented an environmental management system (EMS) to 100% by the end of fiscal 2006.	We achieved the targeted 100% procurement ratio for all procured items for the whole Fujitsu Group.	○	P37
Environmental Measures for Products	All business units to provide Super Green Products (with top-class environmental characteristics) in their principal product line offerings by the end of fiscal 2006.	All business units now provide Super Green Products.	○	P39~
	All Fujitsu-brand products to be made free of Fujitsu-specified hazardous substances by the end of fiscal 2005.	We started providing products free of Fujitsu Group-specified hazardous substances in April 2006 (with certain exceptions*) * These exceptions are: • Products such as certain medical equipment that is not subject to the RoHS directive and products for special systems in which reliability is seen as critical. • Products supplied to customer specifications	○	
Product Recycling	To establish recycling systems in Europe by the end of fiscal 2004, and in North America and Asia by the end of fiscal 2006.	In Europe, we implemented recycling systems in conformance with local recycling regulations and completed operational preparations at our principal subsidiaries in North America and Asia.	○	P43~
	To increase the reuse and recycling rate of collected end-of life products in Japan to 90% by the end of fiscal 2006.	We achieved a reuse and recycling rate of 90% by the end of fiscal 2005 and maintained a 90% or better level in fiscal 2006.	○	
	To increase the utilization rate of recovered waste plastic for the Fujitsu Group in Japan to 20% by the end of fiscal 2006.	With a recovered waste materials utilization rate of 18% at the end of fiscal 2006, this goal remains unmet. We will continue to work to identify recyclable materials.	×	
Environmentally Conscious Solutions	To provide Environmentally Conscious Solutions in all areas of our software and services business by the end of fiscal 2006 in order to help customers reduce their environmental burdens.	We are now supplying Environmentally Conscious Solutions in all areas (total: 82 products).	○	P42
Global Warming Countermeasures	To reduce CO ₂ emissions resulting from energy consumption down to or below the actual emission levels of fiscal 1990 by the end of fiscal 2010. (15% reduction from fiscal 2000 levels by end of fiscal 2006.)	CO ₂ emissions due to energy consumption were about 1,149,000 tons. This corresponds to a 29% reduction from fiscal 2000 levels (6.1% higher than 1990 levels).	○	P45~
	To reduce greenhouse gases other than CO ₂ by 10% from the actual fiscal 1995 emission levels by the end of fiscal 2010.	Emissions made up of other greenhouse gasses (PFC, HFC, and SF ₆) were about 381,000 tons, a 47.1% increase compared to fiscal 1995 levels.	Continuing	
	To contribute to the reduction of greenhouse gases by efficient physical distribution, product recycling, development of energy saving products, and other measures.	We strengthened our environmental activities in our logistics divisions.	Continuing	
Promotion of Green Factories	To reduce, by the end of fiscal 2006, the discharge of chemical substances that are subject to the Pollutant Release and Transfer Register (PRTR) by 15% compared to the actual fiscal 2001 discharge levels.	Emissions of specified chemical substances were 47.3 tons, a decline of 53.0% compared with fiscal 2001.	○	P47~
	To reduce the amount of generated waste by 3% compared to the actual amount in fiscal 2003 by the end of fiscal 2006.	The amount of waste generated was 29,845 tons, a decline of 41% compared with fiscal 2003.	○
