Creating a New Environmental Action Plan for the Next Generation

Launching the Stage V Fujitsu Group Environmental Protection Program

Formulating the Stage V Environmental Protection Program

The Fujitsu Group establishes mid-range (three-year) environmental action plans to provide concrete objectives for implementing our environmental policy. Our newest plan, the Stage V Fujitsu Group Environmental Protection Program, starts in fiscal 2007.

This program is based on two fundamental approaches. The first is to seek an awareness of issues above and beyond those arising from the results of the previous program (Stage IV, which ran from fiscal 2004 to 2006). The second is to ask what direction environmental management in the Fujitsu Group should take based on careful observation of global and societal conditions and changes in the business environment in which we operate.

These approaches have been incorporated in two basic policies and five priority areas of the Stage V program. In this new program, we are asking each and every employee in the Fujitsu Group to participate in environmental activities related to their daily work and to strive to help the Group achieve the objectives of the program.

Basic Policies

We carry out environmental activities based on the Fujitsu Group Environmental Protection Program. Over the years, these activities have resulted in the strengthening of environmental activities at business sites and the development of environmental activities in all business units in the Group.

In creating the Stage V program, we recognized (1) the importance of having all employees grapple with

environmental activities in their daily work and (2) the necessity of expanding the scope of our environmental activities throughout our entire supply chain from the standpoints of fulfilling our social responsibilities to our diverse stakeholders and fully complying with global environmental regulations. With this awareness, we established the following two basic policies.

- Develop environmental activities in which all employees can play an active role in their daily work.
- Expand the scope of environmental activities to encompass the entire supply chain.

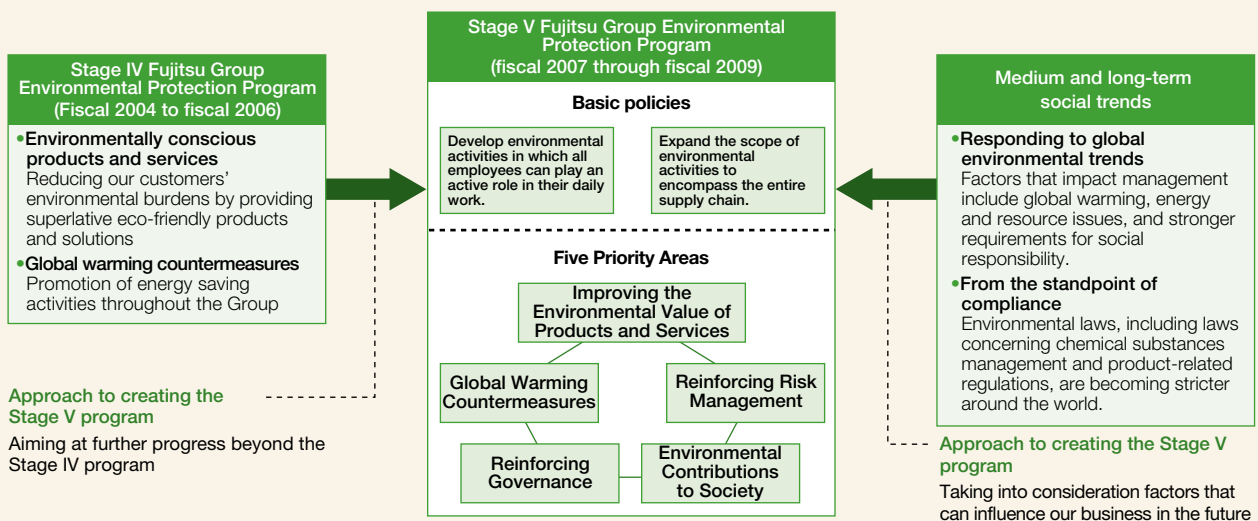

Five Priority Areas

In addition, taking into consideration the impact of future societal trends on our business, and building on the progress achieved in the Stage IV program, we have defined five priority areas of focus going forward:

- Improving the environmental value of products and services
- Global warming countermeasures
- Reinforcing governance
- Reinforcing risk management
- Environmental contributions to society

The Stage IV Fujitsu Group Environmental Protection Program sets the concrete objectives in these five priority areas that we will strive to achieve in the three years from fiscal 2007 through fiscal 2009.

Approach and Priorities in Formulating the Stage V Fujitsu Group Environmental Protection Program

Stage V Fujitsu Group Environmental Protection Program (fiscal 2007 through fiscal 2009)

Five Priority Areas	Stage V Targets	Related pages
Improving the Environmental Value of Products and Services	Increase the number of Super Green Products Targeting the Green Products being newly developed in all business units, by the end of fiscal 2009 we aim to increase to over 20% the proportion of products that are Super Green Products with top-class environmental characteristics.	P39~
	Achieve an improved environmental efficiency factor By fiscal 2009 we will strive to achieve an environmental efficiency factor of "2" (i.e., twice the environmental efficiency) relative to products in fiscal 2005 for newly developed Green Products in all business units.	P39~
	Increase resource reuse and recycling for collected end-of-life products By the end of fiscal 2009 we aim to increase the volume of reused and recycled resources by 15% relative to fiscal 2005. Also, we will maintain the 90% resource reuse and recycling rate for collected end-of-life business-use IT products achieved in Stage IV.	P43~
	Expand environmental solution offerings We will strive to offer Environmentally Conscious IT Solutions in all areas of our business by fiscal 2009.	P42
Global Warming Countermeasures	Reducing CO₂ emissions from energy consumption <ul style="list-style-type: none"> ●Global: Reduce CO₂ emissions per unit sales to 28% below fiscal 1990 levels by the end of fiscal 2010. ●Japan: Limit energy consumption-related CO₂ emissions at our business sites to below fiscal 1990 levels by the end of fiscal 2010. 	P45~
	Reduce greenhouse gasses other than CO₂ We will work to reduce emissions of greenhouse gasses other than CO ₂ by 10% relative to fiscal 1995 emissions by the end of fiscal 2010.	P45~
	Reduce CO₂ emissions during distribution and transport We will strive to reduce the volume of transport-related CO ₂ emissions by 30% from fiscal 2000 levels by the end of fiscal 2010.	P45~
	Apply Green Factory and Green Office systems We seek to achieve a two star or higher ranking* in the Green Factory or Green Office systems at all our business sites by the end of fiscal 2009. <small>*Specific achievement level under an original Fujitsu evaluation standard</small>	P47~
	Reduce VOC emissions We aim to reduce volatile organic compound (VOC) emissions by 30% relative to fiscal 2000 levels by fiscal 2009.	P47~
	Reduce waste generation We will strive to reduce waste generation by 3% relative to 2005 levels by the end of fiscal 2009.	P47~
	Improve our environmental management system (EMS) We will strengthen environmental activities in our business by improving our globally integrated environmental management system.	P35~
Reinforcing Risk Management	Advance green procurement activities We will strengthen environmental activities throughout our supply chain and support the activities of our business partners. <ul style="list-style-type: none"> ●We will promote improvements in our business partners' environmental management systems, for example, encouraging them to obtain third-party certification such as ISO14001. ●We will promote construction of chemical substance management systems (CMS) by our business partners. 	P37
Environmental Contributions to Society	Activities for environmental contributions to society We will carry out locally attuned activities that make environmental contributions to society and in which each of our employees can play an important role.	P38
