

Notice Regarding Basic Stance on Share Trading Units

Tokyo, May 12, 2008 – Fujitsu Limited today reiterated its basic stance on sharing trading units.

Basic Stance on Share Trading Units

Fujitsu Limited recognizes that participation in the equity market by individual investors can help promote the vitality of the market as well as foster a stable base of long-term Fujitsu shareholders. We carry out an active investor relations program aimed at making accurate company information available on a regular and timely basis.

Reducing the number of shares constituting one trading unit would help promote the participation of individual investors in capital markets and increase stock liquidity. However, taking into consideration the current level of Fujitsu shares, the total number of shareholders and proportion of individual shareholders, as well as the liquidity of Fujitsu shares in the market, we believe that the current trading unit of 1,000 shares is appropriate.

We will review our stance on this issue as necessary, taking into consideration future trends regarding individual investors in the capital markets as well as changes in the price of our shares and other factors.
