

Appendix

1. Objective of O<sub>3</sub> Project

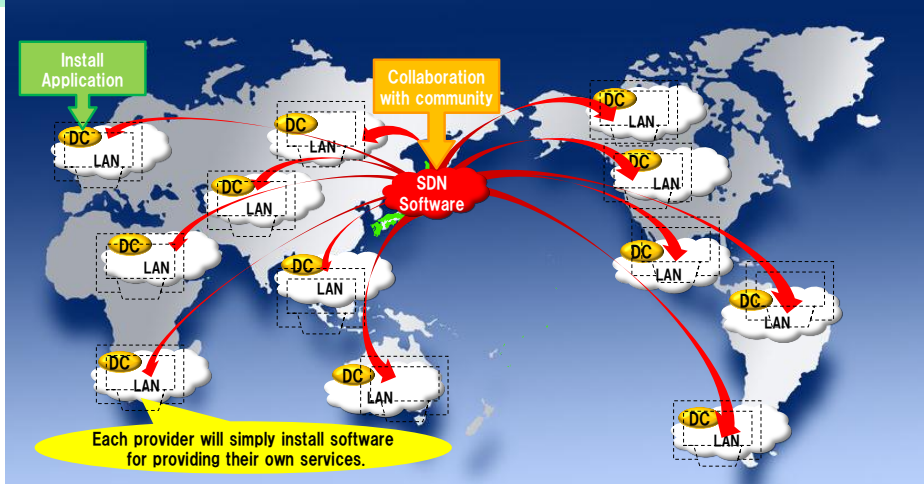

2. Overview of O<sub>3</sub> Project

### 3. Outlook of O<sub>3</sub> Project

## Outlook of O<sub>3</sub> Project

- All providers in the world can use same quality of SDN software and connect each others.
- Application developed in Japan can be localized easily.

Each provider will simply install software for providing their own services.

(Reference) The difference of O<sub>3</sub> Project and existing SDN

## The Difference of O<sub>3</sub> Project and Existing SDN

- Existing SDN: SDN mainly for Data Center
- O<sub>3</sub> Project: SDN for Wide Area Network

Software for network design, construction and operation management	O <sub>3</sub> Project					Existing SDN
network management and control platform software						
virtualization network devices	Hetero Wireless	OpenFlow /Overlay	Packet Transport	Optical Core <b>WAN</b>	OpenFlow /Overlay <b>DC</b>
