

Hybrid IT

Stories from our customers

Akademiska Hus
Cutting annual costs in half03
Daiwa House
Real-time accounting04
Emerald Performance Materials
Emerald Performance Materials \$20k savings each month

Orion Corporation
Accelerating medical R&D07
University Medical Center Schleswig-Holstein (UKSH)
Workloads completed in <300 μs 08
VTT
Seamless remote collaboration09

Fujitsu is engaged, responsive, helpful, and eager - qualities that have helped make this co-creation project such a success.

Per Brantsing Karlsson, IT Manager, Akademiska Hus

Improving performance and efficiency with cloud for Akademiska Hus

Challenge

Migrate to a private cloud environment and digitize its IT estate to become more efficient and flexible.

Solution

Fujitsu built a plug-and-play PRIMEFLEX for VMware solution: a turnkey, integrated system, which includes all the hardware and software needed to simplify deployment of a hyper-converged software-defined data center.

Outcomes

- Halved costs while doubling efficiency and performance
- Reduced energy consumption, saving SEK400k (approx. US\$46.5k) in one year
- Enabled smartphone access with a fully featured virtual desktop infrastructure (VDI)
- Provisioned new VDIs at the touch of a button, enabling scale-out on demand
- Simplified device management via a single console

AKADEMISKA HUS

Each time a problem occurred, the Fujitsu PoC staff members knew exactly how to resolve it.

Ryuzo Matsuyama, Information Systems Director, Daiwa House

Enabling smarter decision-making at Daiwa House

Challenge

Make management information visible in real time to help support rapid global growth.

Solution

Fujitsu helped Daiwa adopt a cloud-based accounting system as the basis for continuous growth. Fujitsu also provided SAP S/4HANA cloud support to accelerate completion of work on a global accounting network.

Outcomes

- Standardized accounting system through a global shared service
- Created a centralized information infrastructure with seamless system linkage and effective use of accumulated skills
- Deployed short-term public cloud at low cost
- Enabled smarter business decisions with real-time accounting data

Courtesy of Fujitsu's smart planning and management, we are saving up to \$20k per month.

Chris O'Neil, VP Information Technology, Emerald Performance Materials

Cutting costs with cloud migration at Emerald Performance Materials

Challenge

Futureproof more than 40+ business-critical applications hosted on a private cloud and improve cost management.

Solution

Fujitsu designed a cloud-based solution, built on Azure infrastructure, to support a seamless migration. The approach used essential Fujitsu Hybrid IT orchestration services based on a strategic roadmap, existing workloads, and application stack.

Outcomes

- Saved \$120k in annual costs
- Enhanced productivity with an agile environment
- Increased resilience due to high service availability

We needed to achieve real-time understanding of production status and to come up with quick countermeasures to the problems.

Spokesperson, Mitsubishi Heavy Industries

Using IoT to reveal production insight at Mitsubishi Heavy Industries

Challenge

Replace outdated manual systems with a more efficient way of gaining an accurate visualization of aircraft manufacturing status.

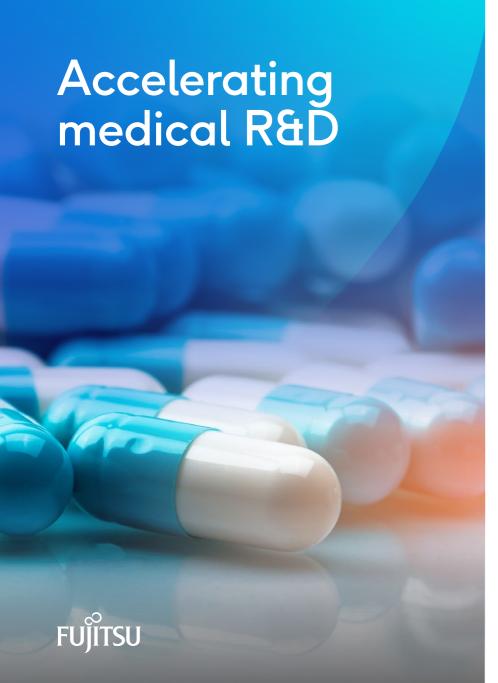

Solution

Fujitsu COLMINA and IoT technology visualized operational status, while Fujitsu User Experience methodology pinpointed problems and actioned countermeasures intuitively, rather than through traditional manual intervention.

Outcomes

- Enabled production problems to be identified in real time
- Remedied issues more efficiently, eliminating error-prone manual intervention
- Increased efficiency of production line

Fujitsu delivered a reliable Azure infrastructure with better data analytics and information, enabling more efficient collaboration.

Outi Anttila, Head of Core Services, Orion Corporation

Delivering scalable data analysis at Orion Corporation

Challenge

Develop new research via a new Data Science Workspace, capable of handling data sharing and analysis for R&D.

Solution

Fujitsu, Orion's existing managed IT infrastructure partner, built the infrastructure in Microsoft Azure, providing a scalable R&D environment for the exploration of real-world use cases.

Outcomes

- Reached patients more quickly with potentially life-saving medications
- Reduced repetitive manual work
- Avoided upfront investment with pay-as-you-go model
- Met demand by scaling user-friendly, integrated tools and computing resources

In developing the solution for our P2N network, Fujitsu gave us expert support from concept to implementation.

Siegfried Troska, IT Infrastructure Admin, University Medical Center Schleswig-Holstein (UKSH)

Establishing an agile base for medical innovation at UKSH

Challenge

Minimize IT workload, while enabling scalability and low latency, by deploying a stable and high-performing technical infrastructure.

Solution

Fujitsu established a hyper-converged infrastructure, based on FUJITSU PRIMEFLEX for Microsoft Azure Stack. This enabled a latency period of less than 300 microseconds for a workload with a 30% write share for data and 400k IOPS (input/output operations per second).

Outcomes

- Ensured availability through failsafe four-node cluster
- Assured minimal latency
- Administered the solution easily and cost-effectively, thanks to Windows Admin Center and FUJITSU Infrastructure Manager

Fujitsu offers a proactive and responsive approach, which combines a great local presence here in Finland with global resources.

Harri Kivimaa, Head of End User Services, VTT

Strengthening a 15+ year partnership with VTT

Challenge

Increase employee adoption of new collaboration tools and help inspire new ways of working by taking advantage of existing investments in Microsoft Office 365.

Solution

Fujitsu managed the hybrid infrastructure, ensured the availability of VTT's applications, and supported workstations. It enabled the Windows 10 migration for 2,100+ employees with ongoing support for Microsoft Office 365.

Outcomes

- Boosted user awareness of new collaboration tools
- Improved productivity and employee satisfaction
- Increased availability and reliability of cloud services
- Encouraged flexible working through secure remote access
- Tracked changes and their impact with proactive support
