

How do you see the invisible?

Fujitsu Computer Vision drives increased revenue and reduced costs through intelligent quality control and maintenance automation.

Achieve
> 80% efficiency gains
across inspection
processes

Apply **deep learning** to
replicate expert
workers' vision and
judgement

Enable **agility** to react
quickly to new and
changing requirements

Quality control - revolutionized!

Defect detection

Improve quality and consistency of inspections through exceptional defect detection accuracy

Reduced risk

Applies a low risk delivery approach to deliver rapid ROI

Fujitsu Computer Vision delivers end-to-end image recognition solutions to automate, analyze and interpret the detection and identification of visual data.

Flexible

- Platform neutral, deployable to cloud or on-premises
- Integrate seamlessly with existing machine vision sensors, CCTV infrastructure, compute hardware and software ecosystems
- Secure Web App and APIs

Scalable

- Scale to support additional users, data, processes and features over time
- Scale across organization operations

Easy to deploy

- Intuitive, customizable UI reduces user learning curve to support role- and use case-specific views to improve business decision making
- Store and process vast volumes of data in real time to provide information when needed

Future-proof

- Continuous refinement of algorithms incorporating user expertise
- Security, performance and functionality through on-going release updates

Customizable

- Predefined, yet modifiable, modules to trial, prove business value and address unique customer challenges

Data-science friendly

- Easy to extend and scale for lower PoC to production costs
- Leverages understanding of domain specific environment to generate and present algorithms and data analysis

"Fujitsu gave us great confidence in the technology and worked closely with our operators. It is clear that this new approach has the potential to transform our quality assurance process"

Aaron Gilbraith,
Project Manager, GKN Aerospace

Fujitsu Computer Vision empowers you to:

Increase revenue

- Driven by:**
- Higher production rates
 - Greater asset availability
 - Improved product quality
 - Better visibility over production processes
 - Enhanced customer satisfaction

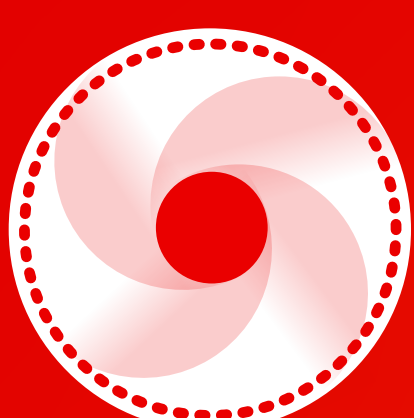

Increase productivity output

- Achieved through:**
- Optimized inspection and monitoring resources
 - Quick and more accurate reactions to unpredictable events
 - Reduction in waste, customer complaints, reclamation and compensation costs

Optimize efficiencies
by **up to 80%**, enabling skilled
operators to prioritize focus on higher
value activities

Fujitsu Computer Vision Quality control - revolutionized!
