

Our Hybrid IT Managed Services for: Microsoft Azure

Consumption-based Managed Services that flex up and down as your needs change. And you only pay for what you use, when you use it.

Support for the complete Microsoft Azure portfolio, including:

Compute:

- Azure virtual machines
- Windows/Linux VM
- Azure Apps

Networking:

- Virtual networks
- Network peering
- Azure load balancer
- Azure DNS
- Fujitsu managed VPN
- Fujitsu managed express route
- Azure CDN
- Traffic manager

Storage:

- Page blobs
- Block blobs
- Azure file storage
- NAS solutions
- StorSimple
- Microsoft Azure backup sets

Databases:

- SQL Server on VM
- Oracle on VM
- Azure SQL
- Azure DocumentDB
- MySQL
- DB2
- Mongo DB
- PostgreSQL

Complete management

Our Hybrid IT Managed Service for Microsoft Azure gives you freedom with costs. It scales up and down as your usage of the service changes. So, we:

- manage configuration changes, and the implementation of new features within the estate.
- monitor usage across the Microsoft Azure estate to identify threshold limits and proactively identify faults.
- support your business with issues relating to your workloads on Microsoft Azure, to ensure smooth running.
- report on your operation including billing, change, incident and monitoring reports.

Complete confidence

We have a wealth of experience in managed services, and we've applied this knowledge to hybrid infrastructures to give you complete confidence in the security and reliability of your estate. With our services, you can:

- comply with regulatory requirements, thanks to three different locations: global delivery, delivery within the EEA, and in-country delivery.
- implement our expert security policies within your Microsoft Azure estate, giving you confidence that it's secure, compliant and resilient.
- learn and receive help from over 130 Microsoft Azure accredited experts, a Microsoft CSP provider, and Gold Partner for cloud competencies.

Fit for the future

We're focused on making sure your hybrid estate continues to deliver for you now, and in the future. How? Through:

- agile service development, offering support for new features as you require them.
- multi-cloud integration, management and optimization, covering the leading public and private cloud platforms.
- further offerings to orchestrate within and between your different platforms, and provide further insight and visibility to continuously evolve your estate.

On your terms

Our Hybrid IT Managed Services have been designed to be as flexible as Microsoft Azure itself. You get:

- daily charging for each day an individual component is used.
- no minimum or maximum number of components to be managed.
- SLAs designed around your specific needs.
