Fujitsu Enterprise Wearables for Worker Safety and Wellbeing

Internet of Things is a core enabler for future hyperconnected businesses and reduces the potential for work related incidents.

**Worker Safety**
Monitoring of workers in harsh environments can enable a safer workplace.

**Location Monitoring**
Analysis of tracking data allowing accurate assessment of worker location and optimisation of staffing and layout.

**Driver Safety**
Receiving support that enhances driver safety.

**Worker Efficiency**
Remote support and Augmented Reality helping improve operational efficiencies.

**Vital Sensing Band**
Wearable solution for lone workers that measures environmental temperature and humidity, highlighting levels of risk, predicting and measuring incidents as accurately as possible.

**Location Badge**
Combination of sensor and algorithms. Solution uses GPS for outdoor monitoring and Real Time Location System or Beacons indoors allowing worker location to be accurately monitored or used to 'Respond' when an incident occurs.

**Driver Drowsiness Detector**
Wearable solution to alert drivers when drowsiness is detected. By measuring biorhythms, the device identifies a loss in attention allowing the driver to self-manage their drowsiness and in parallel allowing route optimisation.

**Head Mounted Display**
Enhances training through hands-free use of augmented reality environments. The solution gives immersive training experience for better employee engagement.

We work with our customers to explore, plan and co-create outcome driven solutions, providing actionable business insight. Fujitsu solutions help provide safer working environments by remotely monitoring the wellbeing of workers and issuing alerts when or before accidents occur.

Our capability
- Wellbeing Management
- Status Confirmation
- Danger Avoidance
- Work and Progress Management
- Tracking Analysis
- Site Monitoring
