

At Fujitsu, we recognize that our role and responsibilities are to support the information and communication technology (ICT) infrastructure that is indispensable to our personal lives and society and to engage in activities in harmony with local communities. Our commitment to fulfill these responsibilities and support a sustainable society is reflected in our corporate vision, the Fujitsu Way, as it clearly states that we “contribute to the creation of a networked society that is rewarding and secure, bringing about a prosperous future that fulfills the dreams of people throughout the world.” In communication with our various stakeholders, the Group seeks to be an ICT company that makes discretionary efforts to many challenges and contributes to the sustainable development of society.
