

Targets and Achievements

Performance of the Fujitsu Group Environmental Protection Program (Stage V)

Five Priority Areas	Stage V Targets (to be achieved by end of FY 2009)	Targets (FY 2009)	Performance (FY 2009)	Status *3	Related Pages
Improving the Environmental Value of Products and Services	Increase the number of Super Green Products*1 Targeting the Green Products being newly developed in all business units, by the end of fiscal 2009 we aim to increase to over 50% the proportion of products that are Super Green Products with top-class environmental characteristics.	Super Green Products ratio: 50%	Certified 30 product families as Super Green Products. Achieved a 63% ratio of Super Green Products in all Green Products from FY2007	○	P57-
	Achieve an improved environmental efficiency factor By fiscal 2009 we will strive to achieve an environmental efficiency factor of "2" relative to products in fiscal 2005 for newly developed Green Products in all business units.	Achieve Factor: 2.0	Achieved a factor of 3.6 on average across the Fujitsu group newly-developed products in fiscal 2009	○	P59
	Maintain resource reuse and recycling rate of recovered end-of-life products*2 Maintain the resource reuse and recycling rate of business IT equipment achieved in the Fujitsu Group Environmental Protection Program (Stage IV) (at 90% or higher).	Resource reuse and recycling rate: 90% or higher	Resource reuse and recycling rate: 90.8%	○	P65-
	Expand environmental solution offerings We will strive to offer Environmentally Conscious IT Solutions in all areas of our business by fiscal 2009.	Expand to 28 the number of areas where our environmental solutions have been certified or registered in the SI and outsourcing areas.	Achieved in FY2008	○	P61-
Global Warming Countermeasures	Reduce CO₂ emissions from energy consumption •Global: Reduce CO ₂ emissions per unit sales to 28% below fiscal 1990 levels by the end of fiscal 2010 •Japan: Limit energy consumption-related CO ₂ emissions at our business sites to below fiscal 1990 levels by the end of fiscal 2010	•Global: Reduce by 73.8% from fiscal 1990 levels •Japan: Hold down to a 0.5% increase over fiscal 1990 levels	•Global: Reduced by 74.4% from fiscal 1990 levels •Japan: Reduced by 6.1% from fiscal 1990 levels	○	P67-
	Reduce greenhouse gases other than CO₂ We will work to reduce emissions of greenhouse gases other than CO ₂ by 10% relative to fiscal 1995 emissions by the end of fiscal 2010.	Hold down to a 10.4% increase over fiscal 1995 levels	Held down to a 5.1% increase over fiscal 1995 levels	○	P67-
	Apply Green Factory and Green Office systems We seek to achieve a two star or higher ranking* in the Green Factory or Green Office systems at all our business sites by the end of fiscal 2009. * Specific achievement level under an original Fujitsu evaluation standard	Achieve two star (★★) or higher ranking at 100% of business sites	•Factories: achieved at 100% of sites •Offices: achieved at 100% of sites	○ ○	P69-
	Reduce VOC emissions We aim to reduce volatile organic compound (VOC) emissions by 30% relative to fiscal 2000 levels by fiscal 2009.	Reduce by 30% from fiscal 2000 levels	Reduced by 31% from fiscal 2000 levels	○	P70-
	Reduce waste generation We will strive to reduce waste generation by 3% relative to 2005 levels by the end of fiscal 2009.	Reduce by 3% from fiscal 2005 levels	Reduced by 18.3% from fiscal 2005 levels	○	P70
	Reduce CO₂ emissions during distribution and transport We will strive to reduce the volume of transport-related CO ₂ emissions by 40% from fiscal 2000 levels by the end of fiscal 2010.	Reduce by 39% from fiscal 2000 levels	Reduced by 45% from fiscal 2000 levels	○	P74
Reinforcing Governance	Improve our environmental management system (EMS) We will strengthen environmental activities in our business by improving our globally integrated environmental management system.	1. Expand the application of EMS to subsidiaries and affiliates 2. Strengthen the environmental programs of main businesses by devolving responsibility to individual BUs (business units) 3. Improve quality of internal auditing by increasing number of publicly-certified auditors 4. Strengthen office environmental activities	1. Introduced EMS to a wider range of companies 2. Continuously implemented environmental activity councils at product BUs 3. Registered 54 publicly-certified auditors 4. Increased number of offices with Green Office status	○	P51-
Reinforcing Risk Management		1. Operate a level II (FJEMS) or higher EMS for 100% of structural material business partners 2. Construct CMS systems for 100% of structural material business partners	1. Operating rate for Level II or higher EMS: 100% 2. CMS construction rate: 98.2%	△ *4	P73
Environmental Contributions to Society		Number of activities that make environmental contributions to society implemented •Japan: One per year at all business sites •Overseas: One every three years at all business sites	•Japan: Implemented at all sites •Overseas: Implemented at all sites	○	P75

*1 As the level achieved in fiscal 2007 far exceeded the original target, the target was increased by 50% from FY 2008 on.

*2 Since the quantity of products recovered decreased as products were downsized, the target was changed in FY 2008 to 'maintain a resource reuse ratio of 90% or higher', and it was redesignated from an action-plan target to an internal management indicator.

*3 A circle (○) indicates full achievement of a target, while a triangle (△) indicates only partial achievement.

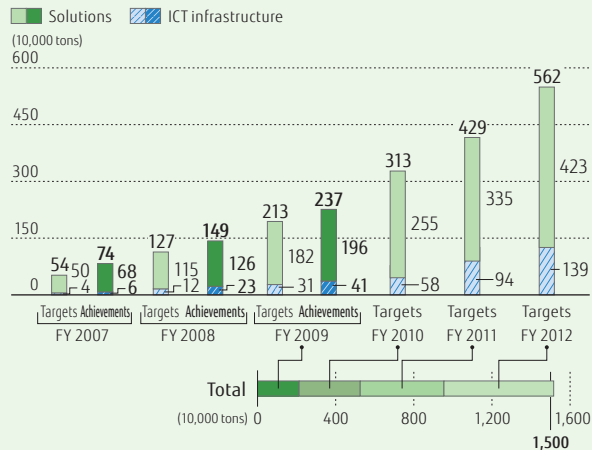

*4 100% achievement in the first half of FY2010.

Green Policy Innovation Project—Achievements in Reducing CO₂ Emissions

Since FY 2007, the Fujitsu Group has been promoting the Environmental Burden Reduction Project by Green ICT, Green Policy Innovation. In FY 2009, Fujitsu set a global target of cutting CO₂ emissions by more than 15 million tons over a four-year period from FY 2009 to 2012. During FY 2009, we exceeded our targets and contributed to a total CO₂ reduction of 2.37 million tons, comprising 0.41 million tons from providing Green Policy Products, which are eco-friendly IT infrastructure products, and 1.96 million tons from providing Green Policy Solutions, which are IT solutions that contribute to reducing environmental burdens.

*Please refer to page 38 for further details on Green Policy Innovation.

CO₂ Emissions Reduction Targets and Achievements Through Green Policy Innovation

The New Environmental Protection Program typifies the Fujitsu Group from the “Green ICT”, “Global” and “Biodiversity” Viewpoints.

The UN Framework Convention on Climate Change (COP15) held in Copenhagen in December 2009 drew attention from around the world. Similarly, the Biodiversity Conference (COP10) to be held in Nagoya in October 2010 is expected to trigger a surge in interest in the responsibility of corporations for preserving biodiversity.

Meanwhile, the Fujitsu Group has been using ICT to help solve various environmental issues for its customers and for society, and to make the products and services it offers, as well as its business activities, more environmentally friendly.

Fiscal 2009 was the final year for Fujitsu Group Environmental Protection Program (Stage V). We managed to achieve our targets in nearly all categories. For example, we greatly exceeded our initial targets for development of “Super Green Products”, and reductions in transport CO₂ emissions. The implementation of the Green Policy Innovation initiative, a Green ICT project, achieved cuts in CO₂ emissions amounting to approximately 2.37 million tons.

Fujitsu Group Environmental Protection Program (Stage VI) was launched in fiscal 2010, designed around the keywords “Green ICT,” “Global” and “Biodiversity.” The essence of Green ICT lies in successfully achieving both economical and environmental performance. Fujitsu has recognized this by strengthening the development of Green ICT from the upstream stage of R&D. Also, Fujitsu Technology Solutions, which

possesses exceptional technologies, expertise, and product development capabilities for Green ICT, was brought into our corporate group from fiscal 2009. By sharing these technologies and expertise with those accumulated by the Fujitsu Group, we will take Green ICT to the next level on a global scale. Moreover, Fujitsu Group Environmental Protection Program (Stage VI) incorporates the new goal of preserving biodiversity as a foundation of sustainable corporate activity, reflecting our search for ways to make a contribution with ICT in the style of the Fujitsu Group.

Stage VI is the next step toward realization of the Fujitsu Group’s medium-term environmental vision, Green Policy 2020. We will make a concerted effort as a corporate group to achieve this goal, and together with our customers and society, seek to realize a prosperous, low-carbon society.

President, Corporate Environmental Strategy Unit
Atsuhisa Takahashi
