FUJITSU

Fujitsu Product Portfolio Update for Government SOA Powering Government Cloud; Enabling IT Transformation

As the world's top five providers of IT Infrastructure systems in particular on server and storage products, Fujitsu has been powering governments around the world for more than 40 years. Aiming to provide integrated solutions by wrapping our leading infrastructure products, data center and managed services with cloud technology, we serve as one stop shop to ensure greater value is delivered for our customers.

Fujitsu Hong Kong is one of the awarded suppliers for the Server Systems and Provision of Related Services to various government departments under Standing Offer Agreements (SOAs) effective from February 2013. Our commitment to the Hong Kong public services is deep, long-term and innovative.

In this workshop, you can arm yourself with our latest cloud technology and platform product portfolio from Fujitsu for the public sector.
