What your Authorized Service Provider Will Do to Correct Problems

When you contact an Authorized Service Provider, you must follow the problem determination and resolution procedures specified.

Your ASP will attempt to diagnose and resolve your problem over the telephone, e-mail or through remote assistance. Your ASP may direct you to download and install designated software updates.

If your problem cannot be resolved over the telephone or remotely or through your application of software, your ASP will arrange for service under the type of warranty service designated for the Product agreed by you upon purchase.

If the Product becomes defective during the warranty period, FBTA will at its option repair the Product with new or reconditioned parts. The replaced part becomes Fujitsu's property and the replacement part becomes your property. Only unhampered or unaltered Fujitsu products and parts are eligible for replacement. The replacement product or part provided by Fujitsu may not be new, but it will be in good working order and at least functionally equivalent to the original part. The replacement part shall be subject to warranty for only such period as it remains on the original product.

The Product shall be considered as repaired when it fulfills tests performed according to the original Product specifications and when the operating system has been restored. Service turnaround time depends on product, country/regions and parts availability.

It is the responsibility of the customer to ensure the safe keeping of these 2-level passwords and for the recovery of data from the locked hard disk.
7. Provide your ASP with all system keys or passwords and sufficient, free, and safe access to your facilities to perform service; and
