

Secure Value Distribution Across Different Ecosystems Utilizing Blockchain Technologies

FUJITSU Enterprise Blockchain/ ConnectionChain (Tentative name)

Demonstration Only

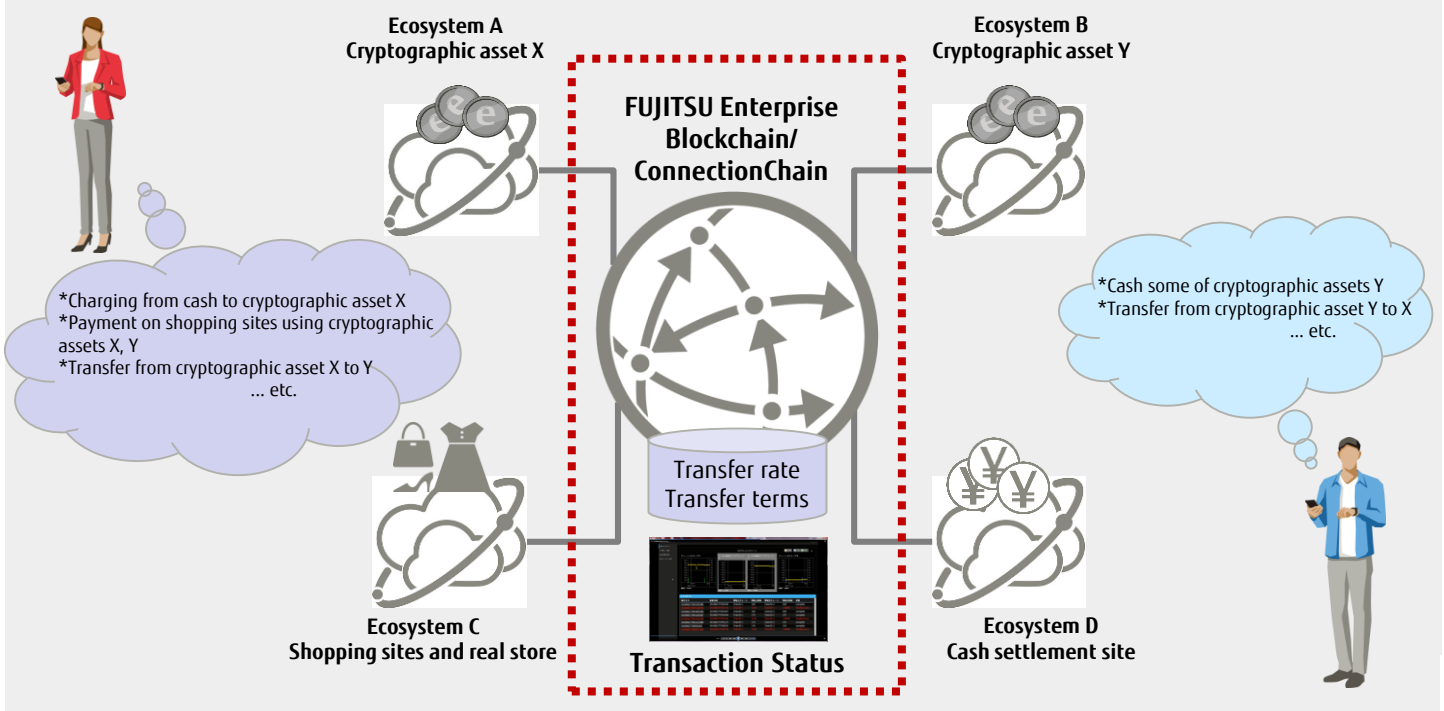

Customer Benefits

- Work with other companies' ecosystems to expand their own ecosystems and businesses
- Provide highly reliable services through transparent value distribution using "Smart contracts"

Businesses are being created one after another to take advantage of new ecosystems such as crypto-asset trading, token distribution and digital payment. On the other hand, in addition to ensuring the convenience of end users and the safety of transactions, the expansion of the ecosystem, including cooperation with other companies, has become a challenge for business success. Our Blockchain Platform "FUJITSU Enterprise Blockchain/ConnectionChain (Tentative name)" will contribute to the expansion and diffusion of ecosystem businesses provided by our customers by building secure value distribution solutions between different ecosystems including Blockchain service.

Patent pending

Example of work with ecosystems and value distribution through "ConnectionChain"

*In this document, references to **Patent pending** include patented technology.
