We, Fujitsu Frontech Group, aim to be a “DX (Digital Transformation) company at the Forefront of Customer”, based on the concept of “Touch, Connect and Change”.

**Hiromu Kawakami**  
(President and Representative Director)

### Toward Achieving SDGs

In 2019, powerful Typhoon Hagibis (No. 19) tore through Japan. And, in 2020, Coronavirus Disease 2019 (COVID-19), a massive disaster we have never experienced in the 21st Century, is spreading throughout the world. Due to the pandemic, we face many issues like the economy stagnation accompanied by lockdown, and like a crash of the health systems, inevitably. Now is the time for us to think of how to keep sustainable development of “Social and Economy” as well as “Environment”.

We, Fujitsu Frontech Group, push forward with sustainable business, to address the above issues including the environmental actions such as the adoption to impacts of climate change and the protection of biodiversity.

We, have been solving various issues of customers in the markets such as finance, retail, public facilities, health care, logistics and mobility through solutions and services based on hardware products we have developed. In a post-COVID-19 future, we will be able to contribute to the development of sustainable society and economy, because we expect more and more demands for our solutions and unique technologies like Quick Counter used in financial institutions, palm vein authentication and RFID, which let non-face to face and contactless transaction come true.

Based on the concept of “Touch, Connect and Change”, we aim to be a “DX (Digital Transformation) company at the Forefront of Customer” that realizes safe and secure society where everyone can live snugly, by interacting “Mono (product), Koto (Service-oriented way of thinking)” provided by Fujitsu Frontech Group, linking up people with companies and society, and broadening new different world, so that we are able to grow our own business and to help SDGs to be achieved.

### Actions on Important Environmental Themes

We evaluate environmental impacts such as the use of natural resources accompanied by our business activities on a regular basis, so as to identify especially crucial environmental issues for us. After that, we establish “Fujitsu Frontech Group Environmental Action Plan” to address the issues and practice it, in the purpose of protecting global environment sustainably.

In the “Environmental Action Plan IX” (FY2019 – 2020), we made plan to take actions on the 4 categories consisting of “Climate”, “Resources”, “Supply-chain” and “SDGs”. We set the targets such as “To reduce greenhouse gas emissions in our business facilities by 8% or more compared to FY2013.” in “Climate”, “To improve resource efficiency of products newly developed by 20% or more compared to FY2014.” and “To reduce the amount of waste by 27% or more compared to average level of FY2012 – FY2014.” in “Resources”, “To reduce CO<sub>2</sub> emissions derived from product use by 14% or more compared to FY2013.” in “Supply-chain”, and “Development & delivery of SDGs Contribution Solutions and PRs of our activities relevant to ESG (Environmental, Social and Governance)” and “Social activities including protection of biodiversity” in “SDGs”. Now, we push forward with these activities as a unit.

Moreover, we also make efforts on Fujitsu Group Medium/Long-term Environmental Vision “FUJITSU Climate and Energy Vision”, whose goal is to bring the Fujitsu Group’s CO<sub>2</sub> emissions to zero by 2050. In Phase 1 (To reduce CO<sub>2</sub> emissions to 14% versus 2013.), up to now, we have been able to reduce them steadily inside Japan. In Phase 2 (To reduce them to 33% versus 2013.) whose period is from 2021 to 2030, we plan to introduce renewable energy to hit the target in the whole Group.
