Based on the concept of “Touch, Connect and Change”, we will create more prosperous society with our DX.

To Realize Sustainable and More Prosperous Society

In 1940, the company, a predecessor of Fujitsu Frontech Limited, was founded in present Tsubame-shi, Niigata Prefecture, Japan, under the name of “Kanaiwa Kosakusho Co., Limited” as a manufacturer of western style metal tableware. Since then, while expanding our business into solutions & services based on reliability cultivated by hardware and manufacture, we have supported innovation at front area of customers’ businesses in the wide range of businesses such as in financial, retail, public, medical and manufacturing fields. 2020 was not only our 80th anniversary but a turning point, because Fujitsu Frontech Limited became a wholly-owned subsidiary of Fujitsu Limited, with the aim of creating synergies through strengthened alignment between Fujitsu Group companies and so on.

From a global standpoint, the spread of COVID-19 has no obvious sign of the end. And, due to this, we face paradigm shifts in many scenes like our lifestyle and working styles. In other words, we have already entered into an uncertain world, “new normal” which does not accept conventional common sense.

Under such circumstance, in April 2021, we reformed our organization to a vertical integration in each business field, which is newly composed of 2 Business Groups, that is, “Solution & Service” and “Global Business”, aiming to be “DX (Digital Transformation) Company at the Forefront of Customer”. From now on, we will offer best solutions to customers in each business field such as financial, retail, public, manufacture and global, more speedily than before.

We are going to create sustainable society that companies and people live more prosperous with our DX, under the concept of “Touch, Connect and Change” that customers “Touch” our products, then they “Connect” companies and society and finally it comes to “Change” into the world where people can enjoy services which has never existed.

Actions on Material Environmental Issues

We evaluate environmental aspects such as climate change and resource circulation, so as to identify crucial issues for us. After that, we establish “Fujitsu Frontech Group Environmental Action Plan” to address the issues and practice it, so as to protect the earth environment sustainably.

In the “Environmental Action Plan X” (FY2021 – 2022), we made plan to take actions on the 3 categories consisting of “Actions on Climate”, “Promotion of Resource Circulation” and “Original Themes”. We set the targets such as “Reduce greenhouse gas emissions in our business facilities by 24% or more compared to FY2013”, “Introduce renewable energy equivalent to 8% of total energy use in the whole Group” and “Reduce CO₂ emissions derived from product use by 17% or more compared to FY2013” in “Climate”, “To improve resource efficiency of products newly developed by 10% or more compared to FY2019” in “Resource Circulation”, and “To reduce the amount of waste by 27% or more compared to average level of FY2012 – FY2014”, “Development & delivery of SDGs Contribution Solutions” and “Social activities as good corporate citizenship” in “Original Themes”. Now, we push forward with these activities as a unit.

Furthermore, we also make efforts on Fujitsu Group Medium/Long-term Environmental Vision “FUJITSU Climate and Energy Vision”, whose goal is to bring the Fujitsu Group’s CO₂ emissions to zero by 2050. We are going to accelerate actions mainly by introducing renewable energy, because we need to address the renewed aggressive target of “Reduce CO₂ emissions to 71.4% by the end of 2030”, accompanied by the modification to 1.5°C scenario in SBTi. In addition, we are also planning to assess risks and opportunities in terms of adapting to climate change, so that we are able to make resilience of our Group stronger.

Hiromu Kawakami
President and Representative Director
