

Efforts in Products Development

We make eco-friendly efforts, throughout supply-chain as well as spread our own expertise in Financial, Retail and Public Sector on global basis.

Efforts toward "Environmental Action Plan X"

Pursuit of energy and resource efficiency

We take actions on 2 kinds of targets relevant to hardware products development in "Environmental Action Plan X".

1st target is to develop products excellent for energy efficiency, and 2nd target is to pursue resource saving in products. Through these efforts, we aim to help customers to mitigate their environmental burden as well as to make stronger, our position and competitiveness in the market.

Products Introduction

Compact & smart POS fitting any scene, TeamPoS7000 Model C240

In this POS system, we realized the increase of performance, adapting to the latest platform as well as succeeding to the good points of conventional models like compact slim body and usability.

This system is the most suitable for the shop owners, who wish to make their cash counters slim, to harmonize POS system with shop design or the like.

Moreover, the system not only leads to energy savings and mitigation of the environmental burden, but realizes its low noise and mitigation of uncomfortable noise, thanks to the adoption of a low-speed fan with large diameter.

Stylish Banking Terminal, FAINS-NEXT

This device can be connected to many kinds of peripheral equipment such as passbook printer used at a bank counter, scanner, collation device and so on, owing to the adoption of a lot of external interfaces.

In addition, the device can contribute to mitigating the environmental burden because of its long-term cycle of replacement, as well as ensure both high reliability and long-time operation necessary for financial products thanks to the adoption of high-quality circuit boards.

Green Procurement

Fujitsu Group has established "Fujitsu Group Green Procurement Standard" which frames the basic concepts of procuring eco-friendly parts, materials and products, so that suppliers both in and outside Japan can promote the green procurement.

In FY2021, we continued "Responsible minerals procurement" after the previous year. For instance, we asked suppliers to report on whether or not they procure minerals relevant to local conflicts, and obtained the answers of "No procurement" from them.

Furthermore, to reinforce CSR procurement, we conducted a large-scale inquiry which Fujitsu Limited sponsored, so that suppliers can recognize more than ever that they need to promote their procurement following SDGs and legal requirements together with Fujitsu Group.

Management of Chemical Substances in Products

Establishment of Chemical substances Management System

We are asking our parts suppliers to establish the CMS^{*1} based on "Guidelines for the management of chemical substances in products" which are defined as industrial standard made by JAMP^{*2}, in order to enhance the management of the restricted chemical substances contained in the parts and products in the whole supply chain.

*1: CMS--Chemical substances Management System

*2: JAMP--Joint Article Management Promotion-consortium

Acquisition of the information on chemical substances in products

Fujitsu Group, in cooperation with our suppliers, surveys for the information on chemical substances contained in products, and shares obtained information within internal system, by using such chemSHERPA^{*3} provided by the JAMP, to comply with relevant regulations, and to prevent regulated chemical substances contained in products from affecting human health negatively and from contaminating the environment.

*3: It stands for "Chemical information Sharing and Exchange under Reporting Partnership in supply chain", which is a common scheme to communicate the information on chemicals contained in products.

Communication with Suppliers

In FY2021, we held an on-line "Business Briefing" to explain our business and procurement policy to suppliers, although canceled annual "Business Party" with suppliers due to the prevention of expanding COVID-19 infection. Moreover, we presented letters of thanks and souvenirs to the suppliers who made significant contributions to our business, as with FY2020.
