

## Targets and Results

In FY2016, the first fiscal year of Environmental Action Plan VIII, we could materially achieve 5 targets while missing “Reduction of greenhouse gas emissions” among our “Main themes”.

Action Plan VIII (FY2016-FY2018)		Targets and Results (FY2016)		
Themes	Objectives	FY2016 Targets	FY2016 Results	Judge
Our Society	<b>Contribute to sustainable development of society through provision of ICT services.</b> Develop more than 14 environmental contribution solutions from FY2016 to FY2018, to contribute to Sustainable Development Goals (SDGs).	Develop more than 4 environmental contribution solutions by the end of FY 2016.	5 certified environment contribution solutions	S
	<b>Achieve top-level energy efficiency of more than 50% of the newly developed products.</b> Achieve top-level energy efficiency of more than 50% of the products newly developed from FY2016 to FY2018.	Achieve top-level energy efficiency of more than 40% of the products newly developed by FY2016.	50% of the newly developed products achieved the top-level energy efficiency.	S
	<b>Promote eco design for resource saving and circulation and increase resource efficiency of newly developed products by 15%.</b> Promote eco design for resource saving and circulation and increase resource efficiency of products newly developed from FY2016 to FY2018 by 15%.	Promote eco design for resource saving and circulation and increase resource efficiency of products newly developed by FY2016 by 5%.	The resource efficiency of the newly developed products is improved by 140%.	S
Our Business	<b>Reduce greenhouse gas emissions in our business facilities.</b> Control greenhouse gas emissions in our business facilities to less than FY2013 by the end of FY2018.	Reduce greenhouse gas emissions in our business facilities over 3% compared to FY2013 by the end of FY2016. (Tokyo HQ and Niigata Plant)	The GHG emission is reduced by 2.54% compared to FY2013.	D
	<b>Control the amount of waste to less than the average level of FY2012-FY2014.</b> Control the amount of waste to less than the average level of FY2012-FY2014.	Control the amount of waste to less than; Tokyo HQ: 83 ton Niigata Plant: 210 ton by the end of FY2016.	Tokyo HQ: 54.1 ton (-35%) Niigata Plant: 172.5 ton (-18%)	S
Our own Theme	<b>Corporate Citizenship Social Activities related to measures against climate change and protection of biodiversity</b> Support our employees to volunteer social activities with society.	Promote worldwide social activities and expand their number of cases. (Equivalent or more than 45 cases on average)	57 cases	S

Judge legend - S: Sufficiently achieved A: Achieved D: Missed

### Continuous Promotion to Reduce GHG Emissions

We, with cooperation by all the employees, implement energy saving measures, such as energy saving activity in the whole Group, renewal of energy efficient facilities and so on.

Further, in FY2016, we established our own target which are in accordance with our business styles, and made efforts to reduce GHG emissions mainly with energy saving. However, we just missed the target by +0.46% at the end of the FY2016.

Target: Reduce no less than 3% (-161 ton-CO<sub>2</sub>) versus FY2013  
Result: Reduced 2.54% (-137 ton-CO<sub>2</sub>) versus FY2013

### Reinforcement of Environmental Compliance

We annually implement our environmental measurements (for water & noise), and verify that there is no problem compared to our own stricter standards than legal ones.

Regarding waste management, we periodically inspect the internal facilities and contracted waste management vendors to confirm whether or not the operation is properly done, following legal requirements.

To meet the requirements of “the Act on Temporary Measures for Promotion of Rational Uses of Energy” and The Japan Electrical Manufacturers' Association “Action Plan for Achieving a Low-carbon Society”, we work on reducing the energy consumption systematically, and report on our activities to government.

### Environmental Targets for Business

We, in each division, establish our targets for business following main themes of FTEC Group Environmental Action Plan VIII which synchronizes Fujitsu Group one, and promote them.

We promote environmental activities related to our business, which are mainly development of environmental contribution solutions, development of new products excellent for energy & resource efficiency, energy saving in each site, reduction of waste generations and so on, based on the meaning and effectiveness recognized by all the employees in the whole Group.
