*1: Other chemicals measured were all below standards of both legal and original.

*2: With respect to each item, we disclose both minimum and maximum value at all the measuring points (a minimum value includes "<" which stands for "less than a detection limit").

*3: Both measuring points and measuring areas are determined each other, depending on the kinds of chemicals.

Environmental Accounting

In FY2018, the cost was 320 million JPY; the effect was 1,090 million JPY and cost effectiveness was 760 million JPY. As a result, the effective amount decreased by 10% (-80 million JPY) compared to FY2017.

FY2018 - Results of Environmental Accounting

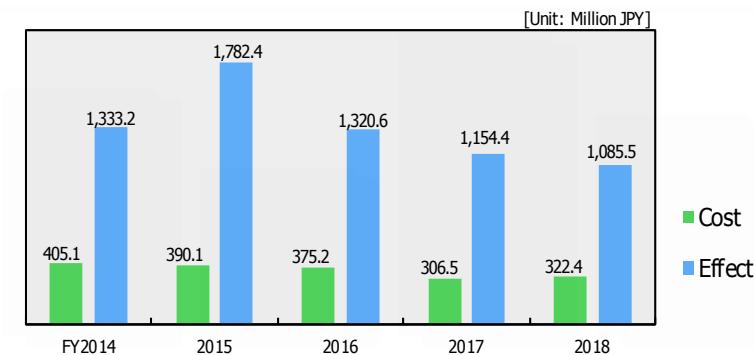

While some effects like "eco protection" increased, the effect of "environmental R & D" decreased, mainly because of transitory saturation of demand for ATMs and bank branch terminals inside Japan. And, total balance decreased compared to last fiscal year.

[Results compared to FY2017]

Cost : +15,911 thousand JPY (306,546 > 322,457)

Effect : -68,869 thousand JPY (1,154,391 > 1,085,522)

Balance: -84,779 thousand JPY (847,845 > 763,065)
