

-Value Chain Emissions-

We strive to mitigate a wide range of the environmental burden, by grasping total GHG emissions from upstream through downstream and reducing them.

Value Chain Emissions (Scope 1 – 3)

Unit: tons-CO₂

*1: "N/A" means items which we regarded as not applicable to our Group. "--" means item which was decided not to calculate because it is practically difficult to calculate and its assumed emission volume is relatively small, although the CAT is applicable to our Group.

*2: GWP (global-warming potential) of "Location-based" is all "0.57 tons-CO₂/MWh". GWPs of "Market-based" are mainly based on data provided by each local electric power company in the territories where our Group Sites are located. The GWPs exclude electricity as RE.
