

Cloud Adoption Accelerator

Overview

Achieve rapid cloud adoption with an organisational level action plan.

As Cloud technology has become a core part of the day-to-day running of many businesses and is opening up doors to innovation and creation. Taking the first step in adopting cloud technology can be daunting because of the implications on your business and technical teams. Even if your organisation is using some cloud services, Fujitsu's Cloud Adoption Accelerator assists taking that first step by developing an actionable plan to ready your organisation for AWS cloud.

Cloud computing introduces a significant shift in how technology is procured, used, and managed. Traditionally, enterprises assumed ownership of all aspects of technology from infrastructure to software however in the cloud. The Cloud Adoption Accelerator helps you simplify your cloud adoption journey through a defined path focusing on how cloud adoption transforms the way you work by providing structure to identify the gaps in people, process and technology needed to successfully adopt public cloud.

The Fujitsu Cloud Advisory Team now offers professional services to help organisations design and travel an accelerated path to successful cloud adoption. Fujitsu Cloud Adoption Accelerator will deliver you an action plan based on the AWS Cloud Adoption Framework (CAF) and the Fujitsu's Your Cloud Framework. The guidance and best practices provided by the framework help you build a comprehensive approach to cloud computing across your organisation, and throughout your IT lifecycle. Using the AWS CAF helps you realize measurable business benefits from cloud adoption faster and with less risk.

Key benefits

- Actionable outcomes to commence your cloud journey
- Using proven AWS methodology

Why Fujitsu?

- One of the world's largest IT service providers with insight into the full potential of AWS.
- Cloud operations expertise in AWS and Fujitsu's own private cloud

shaping tomorrow with you

What can I expect?

The Fujitsu Cloud Adoption Accelerator will conduct a Cloud Envisioning Workshop with the output being an action plan to commence the adoption of cloud technologies in your organisation. Conducted over the course of **1 day**, The Cloud Adoption Workshop brings together stakeholders from both business and technical representatives and considers their needs across perspectives of:

- Business – IT Finance, IT Strategy, Benefits Realisation & Business Risk Management
- People – Resource Management, Incentive Management, Career & Training Management and People Change Management
- Governance – Portfolio Management, Program & Project Management, Business Performance Management and License Management
- Platform – Systems and Solution Architecture, Compute, Network, Storage, Database Provisioning and Application Development
- Security - Identity and Access Management, Detective Control, Infrastructure Security, Data Protection and Incident Response
- Operations - Service Monitoring, Application Performance Monitoring, Resource Inventory Management, Release/Change Management, Reporting and Analytics, Business Continuity/Disaster Recovery and IT Service Catalogue.
