FUJITSU

Essential Eight Assessment

The Essential Eight is the Australian Cyber Security Centre's (ACSC) baseline of mitigation strategies to reduce the risk of a breach.

Assessments and Uplifts

Highlights of a Essential Eight Assessment

✓ Detailed report

✓ Based on the ACSC's guideline

✓ Human-centric security

✓ Leveraging a blend of assessment tools

✓ Tailored to your needs

✓ Clear uplift plan

✓ Route to compliance assurance

Reporting on your Essential Eight maturity is now commonplace, whether it be for internal stakeholders or part of annual legislative and regulatory requirements.

Just because it's commonplace, doesn't mean it's always simple. You need to find an assessor you can trust who understands your organisation's specific security controls who can also give you recommendations to improve your position without impacting your business or disrupting your users.

We implement controls across the Essential Eight to improve maturity levels and reduce risk, with a focus on maximizing ROI from Microsoft 365 licensing. Our team has extensive experience in both assessing and remediating, ensuring a comprehensive approach to elevating your cybersecurity posture.

Our team at Fujitsu Cyber Security Services provide a detailed report with a clear snapshot of your current status and valuable recommendations for improvement, ensuring you are equipped with the knowledge to enhance your cybersecurity posture.

How does your organisation stack up?
...against Australia's benchmark cyber security baseline

Not just for government and critical infrastructure, the Essential Eight is best practice cyber security for every organisation in Australia.

Fujitsu Cyber Security Services

Our approach

1	**Tailored assessment**	We understand that each business has unique needs. Our assessments are customisable, ensuring you get the most relevant and effective strategies.
2	**Best practice alignment**	Based on the ACSC's guideline, and using a combination of their tools, third-party software, and some extras of our own, we provide a report that not only provides a high-assurance scorecard, but also actionable recommendations to improve security without sacrificing user experience.
3	**Insightful reporting**	Combining a proprietary set of tools, vendor partner solutions, and resources from the ACSC. This data-driven assessment is enriched by our team's vast experience, taking into account the crucial human element of security, often overlooked by others in the field.
4	**Clear uplift plan**	Implementing controls across 'the Eight' to improve maturity levels and reduce risk, with a key focus on maximising ROI from Microsoft 365 licensing, plus additional capabilities from Tenable and Ivanti.
5	**Ongoing support**	Our team has experience across a wide range of industries and sizes of organisations, some of whom have just started out on their Essential Eight journey, and others that have been across it since day one. We are here to help you on this journey.

Why choose Fujitsu Cyber Security Services?

Our support of our clients on their Essential Eight journey is unwavering.

We have partnered with organisations spanning various industries and sizes, catering to those who are just starting this journey and those who have been on it since its inception. Remarkably, we've even undertaken assessments on behalf of the ACSC for high-profile Federal Government organisations.

Our pedigree

We have a long history with the Essential Eight as both assessors and remediators. The feather in our cap was our involvement in the Cyber Security Response Fund, engaged to assist high-risk and high-value Departments and Agencies to assess and uplift these environments, on behalf of the ACSC.

Rapid and reliable

Our efficient methodology allows us to quickly assess, report, and recommend improvements, saving you time and enhancing your security posture.
