

Transform your organisation with Generative AI

Rapidly deploy secure and reliable Generative AI solutions that will streamline operations, automate processes and deliver new services.

Our Generative AI Accelerator is designed to be an **accurate, flexible** and **cost-effective** solution for rapidly establishing a Generative AI application in modern organisations.

Use Generative AI to ask securely questions against your documents and data

Automated evaluation of the accuracy in responding to queries across the knowledgebase

Enterprise solution that easily and reliably integrates with your documents and data

Easy customisation of the solution through Admin Portal to manage UI, prompt engineering and documents

Solution is designed with a focus on providing accurate and reliable responses to queries

Solution installed to your Azure tenant. No data shared outside your control

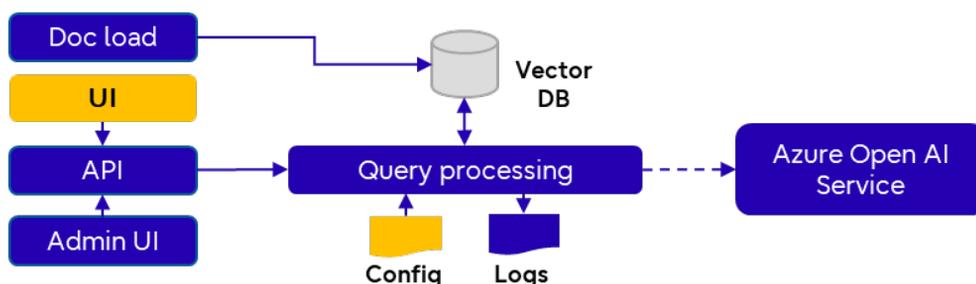

Responses can be easily validated against the original source documents

Solution is secured with access control through Azure AD and protection against prompt-fishing

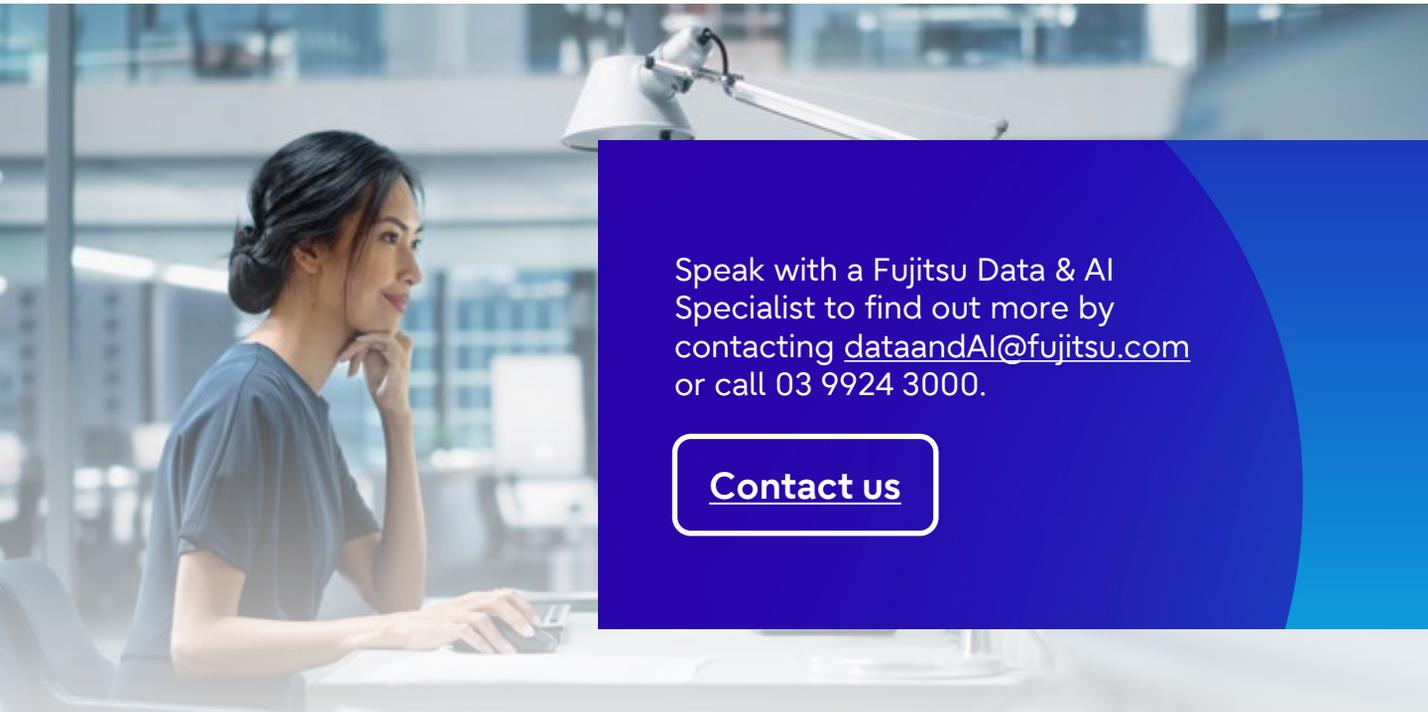

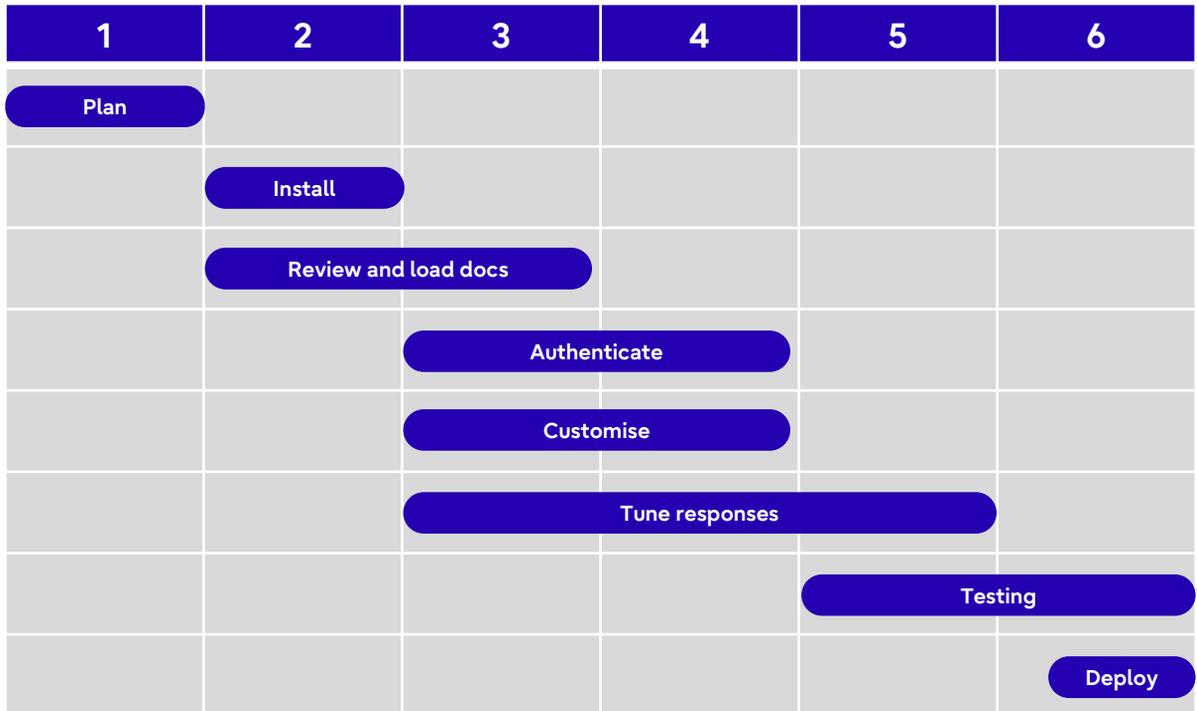

The adoption of Generative AI is not just a trend, but a strategic necessity for companies looking to stay competitive and efficient in a rapidly evolving business landscape.

Fujitsu Generative AI Accelerator
