FUJITSU Image Scanner fi-5950

The fi Series flagship model facilitates efficient business performance with ultra-fast CCD and image processing technologies

The fi-5950 scans A4 landscape documents at ultra-fast speeds of 135 ppm/270 ipm* (200/300 dpi). It is capable of scanning A3 portrait sized documents and can load up to 500 sheets at a time.

Boosted productivity through various mechanisms

The fi-5950, the fastest scanner in the fi Series, is equipped with Ultra-fast CCD and image processing technologies. Load your documents with utmost ease, even when document sizes vary, with the scanner's independent side guides. Take scanned documents out without any hassle using the Elevator Stacker function that adjusts stacker position so that scanned documents pile up neatly.

Easy to use with reliable image quality

The PaperStream IP scanner driver, supporting both TWAIN and ISIS, enables users to bypass the inconvenience of making fine adjustments to OCR settings. The software automatically converts scanned images into exceptionally clean images, supporting OCR accuracy even when scanning documents with background patterns or wrinkled and soiled documents. Equipped with distinct intelligent functions, such as Auto Size Detection, Automatic Color Detection, and Blank Page Detection, it makes scanning processes convenient by reducing repetitive and time-consuming tasks before and after scanning.

Advanced software for enhanced efficiency

As software dedicated to batch scanning, PaperStream Capture effectively and efficiently feeds information into your organization workflow. Operation is easy and does not require any special training with its simple and user-friendly UI. With its automatic utilization of data extracted from barcodes and patch codes, the software also determines your preferred saving destinations and eliminates time allocated to routine tasks.

Form management and document tracking support with pre and post imprinter

Two imprinter options are available for the fi-5950: the Pre Imprinter which prints information on the front side of documents prior to scanning and the Post Imprinter which prints information on the reverse side of documents after they have been scanned.

* Scanning speeds may vary due to the system environment used.

^{*1} Actual scanning speeds are affected by data transmission and software processing times. ^{*2} Indicated speeds are from using JPEG compression. ^{*3} Indicated speeds are from using TIFF CCITT Group 4 compression. ^{*4} System requirements (recommended) CPU: Intel® Core™ i5 2.5GHz or higher, Memory: 4GB or higher, HDD: 7,200rpm, Interface: USB3.0/2.0. ^{*5} Selectable maximum density may vary depending on the length of the scanned document. ^{*6} Limitations may apply to the size of documents that can be scanned, depending on system environment, when scanning at high resolution (over 600 dpi). ^{*7} Capable of scanning documents that exceed A3 size in length. Documents that exceed 431.8 mm (17 in.) are limited to 400 dpi for lengths up to 863 mm (34 in.). Documents between 863 mm and 3,048 mm (120 in.) in length are limited to 200 dpi. ^{*8} Maximum capacity depends on paper weight and may vary. ^{*9} Numbers are calculated using scanning speeds and typical hours of scanner use, and are not meant to guarantee daily volume or unit durability. ^{*10} Ultra Wide SCSI interface and USB 2.0 cannot be used simultaneously. ^{*11} Excludes the ADF hopper and stacker. ^{*12} Functions equivalent to those offered by PaperStream IP may not be available with the WIA Driver. ^{*13} Software can be downloaded from the website designated in the Setup DVD-ROM.
